Page 8 1 Deposition of MICHAEL BARNES February 11, 2022 2 3 (Reporter disclosure made pursuant to 4 Article 8.B of the Rules and Regulations of the Board of Court Reporting of the Judicial 5 6 Council of Georgia.) 7 VIDEOGRAPHER: Today's date is February 11, 2022, and the time is 9:04 a.m. 9 This will be the remote videotaped deposition 10 of Michael Barnes. 11 Will counsel please introduce themselves 12 and any objection to the witness being sworn in 13 remotely. MR. CROSS: This is David Cross of 14 15 Morrison & Foerster on behalf of the Curling 16 plaintiffs. 17 MS. LaROSS: Diane LaRoss on behalf of the State defendants and Mr. Barnes. We also have 18 19 Danielle Hernandez on the line with us from our 20 team. 21 MR. LOWMAN: And this is David Lowman on 22 behalf of the Fulton County defendants. 23 MS. MARKS: This is Marilyn Marks, 24 plaintiffs' representative, Coalition for Good 25 Governance.

Page 9 MICHAEL BARNES, having been first duly sworn, 1 2 was examined and testified as follows: 3 EXAMINATION BY-MR. CROSS: 4 5 Ο. Good morning, Mr. Barnes. 6 Good morning, Mr. Cross. How are you? Α. Good. How are you? 7 Q. I'm doing well. Happy Friday. 8 9 I'm sure this is the way you always want Q. 10 to spend a Friday; right? 11 Α. Well, I could probably think of some 12 better things to do, but, alas, we have to take care 13 of this. 14 Q. We do. 15 All right. You've been deposed before. 16 In fact, I think you may have been deposed in this 17 case years ago, so you've been through this before. 18 Do you understand that today you're 19 testifying on behalf of the Secretary of State's 20 office as what we call a corporate representative? 21 Yes, sir, that's my understanding. Α. 22 You understand that you are here to 23 testify on behalf of the Secretary of State's office 24 on specific topics; is that right? 25 Yes, sir. Yes, sir. Α.

Page 10 Okay. Do you have Exhibit Share open in 1 Q. 2 front of you? 3 Α. I have access to it. One second. 4 So yes, sir. 5 Ο. All right. So pull up Exhibit 1, please. 6 (Plaintiffs' Exhibit 1 was marked for 7 identification.) 8 THE WITNESS: Under which folder? 9 BY MR. CROSS: 10 Oh, go down to -- you'll see "Deposition of Michael Barnes 2/11." 11 12 A. Actually, I don't see that. I see 2/16, 13 2/3, 2/4, 2/9. 14 Q. Weird. 15 So if you come down, you see where it says 16 "Deposition of Merritt Beaver," and then immediately 17 below that "Michael Barnes"? Or I don't know, maybe 18 you can only see certain things. 19 You don't have a Michael Barnes 2/11/2022? 20 I do not. I have Gabriel Sterling 2/16, Α. 21 Michael Barnes 2/3, Michael Barnes 2/4, Michael 22 Barnes 2/9. 23 MR. CROSS: All right. Let's go off the 24 record. 25 VIDEOGRAPHER: The time is 9:07 a.m. We

```
Page 11
          are off the record.
1
2
               (Off the record.)
3
               VIDEOGRAPHER: The time is 9:12 a.m.
          We're on the record.
 5
     BY MR. CROSS:
 6
               All right. Mr. Barnes, you have
          Q.
7
     Exhibit 1?
 8
               Yes, sir, I do.
          Α.
9
               All right. So take a look at Exhibit 1 in
          Q.
10
     front of you.
11
               And do you understand that you are
12
     designated to testify today on Topic 1?
13
               Yeah, I remember seeing a list of topics
          Α.
     in which I was designated as being the one that
14
15
     would speak.
16
          Q. Okay. So just read through Topic 1, the
17
     subparts a through h, and tell me if you're prepared
18
     to testify on that topic today.
19
               MS. LaROSS: And, David, we're going to be
20
          reserving all objections except those to the
21
          form of the question or responsiveness of the
22
          answer until trial; is that correct?
23
               MR. CROSS: Yeah, that's the default under
24
          the federal rules, yeah.
25
               MS. LaROSS: Sure. And I just -- you
```

```
Page 12
          know, we go into each deposition and often say
1
2
          it or don't, but I just wanted to clarify --
               MR. CROSS: Okay.
3
               MS. LaROSS: -- we just have that standing
 4
 5
          agreement with you guys. That's -- I just
          wanted the record to be clear.
6
7
               MR. CROSS: Okay.
8
               THE WITNESS: I've looked at the items in
9
          point 1a through h, and those are the items I
10
          am familiar with, yes, sir.
11
     BY MR. CROSS:
12
          Q. Okay. Then go on to Topic 2, please, and
     let me know if you're prepared to testify on that
13
14
     today.
15
               MS. LaROSS: David, I believe David
          Sterling is designated for 2c.
16
17
               MR. CROSS: Okay. Great. That's right.
18
          Sorry.
19
     BY MR. CROSS:
20
               So, Mr. Barnes, just look at 2a, b, and d.
21
               2a, b, and d, I -- I believe I'm prepared
          Α.
22
     to testify on those items.
23
              Okay. And then look at Topics -- just to
          Q.
24
    make sure -- yeah, look at Topics 7 through 11, so
     7, 8, 9, 10, and 11, and let me know if you're
25
```

Page 13 prepared to testify on those topics today. 1 2 Yes, sir, I believe I'm prepared. Α. 3 And then the last one is Topic 18, the last one in the list, and let me know if you're 5 prepared to testify on that, too, please. 6 MS. LaROSS: It's my understanding, David, that that one -- that topic was -- we 7 designated David Sterling, Merritt Beaver, and 8 9 Chris Harvey. 10 MR. CROSS: Sorry. 11 MS. LaROSS: And some of the topics in the 12 13 MR. CROSS: Yeah, that's right. Sorry. 14 Yeah. 15 MS. LaROSS: Okay. No -- no worries. 16 And some of the topics in 7 through 11 we 17 also designated either Mr. Sterling or 18 Mr. Beaver, but there is certainly overlap with 19 Mr. Barnes. 20 MR. CROSS: Yeah. Okay. 21 MS. LaROSS: Great. Thank you. 22 BY MR. CROSS: 23 Mr. Barnes, what did you do to prepare to Q. 24 testify on these topics today? 25 I have met with our attorneys. Α.

- 1 Q. And when did you do that?
- 2 A. Let's see. In multiple occasions. Met
- 3 with attorneys last week in preparation for
- 4 deposition and also, I believe, a couple of weeks
- 5 prior to that.
- 6 Q. Okay. About how many hours would you say
- 7 you spent preparing?
- 8 A. Let's see. Last week, I was here in the
- 9 law office for, I believe, three and a half hours.
- 10 In the previous visit to the attorneys' office, that
- 11 was another two- to three-hour meeting.
- 12 And this list of items had been provided
- 13 to me to look over and, you know, keep my memory
- 14 fresh on these items to the best of my ability.
- 15 Q. Okay. And did you review any documents to
- 16 prepare for these topics?
- 17 A. The only documents that I've looked over
- in preparation are previous records in the case,
- 19 previous -- I think some of my previous deposition,
- 20 reviewed that and other filings, I think, a couple
- 21 of times where I testified in court. Those
- 22 documents I reviewed.
- Q. Did you look, for example, at -- at emails
- or documents from the Secretary's office?
- 25 A. I did not go through a list of the emails

- 1 that I maintain in my Secretary of State inbox
- 2 looking for specific topic emails, no, sir.
- 3 Q. Okay. Did you speak with anyone other
- 4 than counsel to prepare on those topics?
- 5 A. No. I've only spoken with counsel.
- 6 Q. All right. Look at Topic 1 if you've got
- 7 that in front of you, please.
- 8 A. Sure.
- 9 Q. And if you look at 1a.
- Walk me through the efforts that have been
- 11 made to determine whether malware has ever been
- 12 located on any component of Georgia's prior election
- 13 system, the DRE system.
- A. With the prior voting system, the system
- 15 that was used in the state from 2002 through, what,
- 16 2018, that system was constantly being inspected and
- 17 tested to make sure that what was installed at the
- 18 local levels matched what had been federally
- 19 certified and state certified throughout the years.
- 20 My office, the Secretary of State's
- 21 office, whenever we were out in the field, in the
- 22 counties, any opportunity that we had to sit down at
- 23 the Election Management computer, we would do a -- a
- 24 verification test based upon hash signatures on the
- 25 applications to validate that what was installed on

- 1 the systems was what was certified for the State.
- 2 And those inspections always came back in line with
- 3 what was expected, not finding anything nefarious.
- 4 Local testing done by local election
- 5 officials prior to every election to validate the
- 6 system was working properly.
- 7 We also conducted parallel testing from
- 8 election to election on same dates of the elections,
- 9 putting in ballots, testing the results that came
- 10 back from the known entries to validate that the
- 11 calculations matched what went in. And in all those
- 12 instances, the system tested accurate, showed
- 13 results that were expected.
- 14 And we continued those operations
- 15 throughout the life history of the previous voting
- 16 system.
- 17 Q. And the testing that you're talking
- 18 about -- you said that the DRE system was constantly
- inspected and tested -- what specific testing are
- 20 you talking about?
- 21 A. Well, prior to every election, of course,
- 22 county election officials had to go through a
- 23 process of logic and accuracy testing where they
- 24 would load the needed election that had been built
- 25 for that particular election onto their election

Page 17 1 equipment. That would be loaded to their DRE 2 equipment. It would be loaded to their absentee 3 scanners. And then a test deck, test ballots, would 5 be entered into the system with a known result prior 6 to entry. 7 Then once those ballots were entered and 8 tabulated and calculated by the DREs, by the optical 9 scan scanners, the results were compared against the 10 test deck. If counties ever found a discrepancy, of 11 course, that piece of equipment would be set aside, 12 would not be used, would be returned to the vendor 13 for repair. 14 T hen if it were sent for repair, the 15 vendor would repair the equipment. Then the 16 equipment would come back through the Center for 17 Election Systems for acceptance testing to verify 18 that repair had been made, that the system was 19 working properly, and that the proper installation 20 of the certified system was installed. 21 And then it would be returned to the 22 county's possession, where the county would then go 23 through a logic and accuracy testing prior to any 24 given election to validate that the system was 25 operational.

Page 18 So you're talking about logic and accuracy 1 Q. 2 testing; right? 3 Α. I am. Are you aware that malware can be designed 5 to defeat logic and accuracy testing on voting 6 equipment like DREs? MS. LaROSS: Object to the form of the 7 question. 8 9 You may go ahead and answer if you know. 10 THE WITNESS: I know that people can --11 can develop malware. What does it do, how does 12 it operate, how does it bypass systems, I cannot speak to that. 13 14 BY MR. CROSS: 15 So who do you rely on for that Q. 16 information? 17 I rely on my IT department for assistance 18 in finding and protecting us from malware attacks. 19 On -- Secretary of State's office, we go 20 through exercises to make sure that we do not 21 have -- that we are trained on how to avoid such 22 attacks. So I am -- I am always depending upon the 23 24 IT services that the Secretary of State's office 25 provides.

Case 1:17-cv-02989-AT Document 1368-4 Filed 04/13/22 Page 19 of 309 Page 19 And is that -- are you talking about 1 Q. 2 Merritt Beaver's department? 3 Α. Yes, sir. 4 Ο. You have your own IT staff in CES? 5 We have a member of the IT department who is located at CES. He is not a member of the CES 6 7 I am not his supervisor. He is a member of the IT staff and is supervised by the IT operation. 8 9 Q. I see. 10 So when it comes to the -- the sort of 11 technical side of election security, do I understand 12 right you and your department in CES relies on the 13 IT department headed up by Merritt Beaver for that? 14 Α. Yes, sir. 15 Is there any other testing that you're aware of that the State did with the DRE system that 16 17 you believe could determine whether there's malware

18 on that equipment, apart from logic and accuracy 19 testing? 20 Well, again, we would do -- we would

21 perform a test on the Election Management computer, 22 which was holding the -- the software that was used 23 to program the equipment, maintains the software 24 that would take the results that came from 25 individual pieces of equipment and tabulate those

- 1 results and produce the results that were used to
- 2 certify the results of the election.
- 3 We would do a hash inspection of that
- 4 computer, and we called -- we used a system that was
- 5 called GEMS Verify. And that operation would look
- 6 at specific files maintained on the GEMS server that
- 7 should be static, that shouldn't be unchanging. And
- 8 those -- some of those files equate back to the
- 9 certified applications.
- And we would do this hash compare, and the
- 11 hash compare was built off of the original
- 12 installation of the software that was obtained from
- 13 the federal testing lab and then used to be
- 14 installed on all of the devices that were rolled out
- 15 to the individual counties.
- And that compare process was done to
- 17 validate that the installation at the county level
- 18 matched what had been through federal testing and
- 19 what had been distributed to the State of Georgia by
- 20 the federal testing lab.
- 21 Q. Okay. When you say "Election Management
- 22 computer," what do you mean?
- 23 A. This is the isolated computer that's
- 24 maintained in the county office that is used to
- 25 program your election voting equipment and also to

Page 21 tabulate the results collected from those pieces of 1 2 equipment. Q. Are you talking about the server at the 3 county level that hosts the Election Management 4 5 software so that --6 Α. Yes, yes. 7 MS. LaROSS: And, Michael, you should wait until he finishes his question --8 9 THE WITNESS: Oh. 10 MS. LaROSS: -- before you begin answering 11 so that the court reporter can get a clear 12 transcript. 13 Excuse me, David. 14 MR. CROSS: Yeah. No, that's helpful. 15 Thank you. 16 BY MR. CROSS: 17 Q. Are you aware that malware can be designed 18 for voting machines that defeats the hash test? 19 MS. LaROSS: Objection to the form of the 20 question. 21 You may go ahead and answer if you know. 22 I -- I personally have not THE WITNESS: 23 seen it demonstrated directly in front of me. 24 So I have heard of such, but I have never 25 interacted with it myself.

- 1 BY MR. CROSS:
- 2 Q. And do I understand correctly you would
- 3 rely on Merritt Beaver's department to handle the
- 4 ways in which the State would protect against that
- 5 sort of compromise?
- 6 A. Yes, sir.
- 7 Q. On the logic and accuracy testing you
- 8 described, is that done with the equipment in a test
- 9 mode?
- 10 A. With the previous system? Is that the
- 11 question?
- 12 Q. Yes.
- 13 A. With the previous system that was used
- 14 between 2002 and 2018, yes, sir, the logic and
- 15 accuracy testing was done -- the way the system was
- 16 designed was done in a test mode environment and
- 17 then, at the conclusion of the testing mode, would
- 18 be transitioned into election mode.
- 19 We would also, of course, as part of
- 20 continuing testing on election day, conduct parallel
- 21 testing, which was separate and apart from logic and
- 22 accuracy testing, but parallel testing was done in
- 23 the standard election mode using -- using the
- 24 election file that had been built for that election
- 25 with the equipment set for election mode, using the

- 1 date itself of the election, and during the full
- 2 12-hour voting period.
- 3 And we would actually conduct the same
- 4 test that we would conduct under L & A, where we
- 5 would put in a test deck with a known result into
- 6 the system and have the system calculate those
- 7 votes, and also we would then check that against the
- 8 known result.
- 9 And the parallel testing showed an equal
- 10 result, just as the logic and -- excuse me -- just
- 11 as the logic and accuracy testing had shown in
- 12 preelection mode.
- 13 Q. Is logic and accuracy testing done today
- on the Dominion system?
- 15 A. Yes, sir, it is.
- 16 O. Is that also done in a test mode?
- 17 A. No, sir. In the Dominion system, the
- 18 system is either in election mode or it's not in
- 19 election mode. There is not a test mode
- 20 environment.
- 21 Q. When logic and accuracy testing is done on
- 22 the Dominion system, is it done on election day or
- 23 before election day?
- A. It's done before election day, but, again,
- 25 we executed a parallel testing done on the equipment

- 1 the day of the election.
- 2 During the November 2020 election, where
- 3 we did the same exercise, where we had a BMD and
- 4 printer set up, an optical scanner set up, and
- 5 produced a set of ballots, put them through the
- 6 machine on election day, just in the same manner as
- 7 we did during logic and accuracy testing.
- 8 Q. And the parallel testing you're talking
- 9 about with the DRE system and the BMD system, just
- 10 so I understand -- I think you said this, but you
- 11 take a single voting machine -- so with the old
- 12 system, it's a DRE; new system it's a BMD -- plus a
- 13 printer, and while the election is ongoing, you're
- 14 running sort of a mock election on that equipment to
- 15 see if it operates as it's expected.
- Is that generally right?
- 17 A. Yes, sir.
- 18 Q. And do you recall Michael Shamos was an
- 19 expert that testified for the State --
- 20 Secretary of State's office in this case?
- 21 A. I -- I remember his name. I remember him
- 22 being a -- a witness. I don't recall any of his
- 23 testimony.
- Q. Did anyone ever tell you that Michael
- 25 Shamos testified that the parallel testing the State

```
Page 25
     does with the single voting equipment is useless for
1
2
     evaluating the security of the voting system?
3
               MS. LaROSS: Object to the form of the
          question.
 5
               You can answer to your understanding.
 6
               THE WITNESS: I -- I do not recall being
7
          told that, no, sir.
 8
     BY MR. CROSS:
9
               Do you know why the Secretary's office
     still does that with a single BMD and printer, given
10
11
     that their own election security expert said it's
12
     useless?
13
               MS. LaROSS: Objection to the form of the
14
          question.
15
               THE WITNESS: All we do in regards to
16
          continued testing of the system is working to
17
         build confidence in the system. We have done
18
          these tests for almost 20 years now as a -- as
19
          a way of seeing and trying to look for any
20
          problems in the system, and we have continued
21
          to use this testing process.
22
     BY MR. CROSS:
23
               Who made the decision at the Secretary's
24
    office to test a single BMD and printer for parallel
25
     testing on election day?
```

Page 26 Well, the process has evolved through the 1 Α. 2 years. When we first started the testing back in 3 2004, I believe we started doing parallel testing, it wasn't just one single unit, it was multiple 5 DREs. 6 We would get -- obtain copies of the 7 election database that had been installed on the 8 county-level computer and have them create a backup 9 copy of that elections project, deliver it back to the Secretary of State's office, and then it would 10 11 be installed on a GEMS computer and then DREs would 12 be programmed. And the DREs, it would be one, two, three, or four that would be programmed with 13 14 multiple elections from different jurisdictions. 15 And as we continued to do that testing 16 and, again, always finding everything was -- was as 17 expected, then that began -- began to be pared down 18 to fewer pieces of equipment because of longer 19 amount of time that the equipment has been in place. 20 And we have just come and settled back 21 into randomly selecting a county, and then once that 22 county is randomly selected, then an elections 23 project is obtained for that -- from that county, 24 brought back into Atlanta, installed on the -- on 25 today's system, onto the Dominion Election

- 1 Management System, and then media created and then
- 2 the testing executed.
- 3 Q. And who decided on that process today?
- 4 A. It was -- I was involved in that decision,
- 5 along with attorneys in the Secretary of State's
- 6 office.
- 7 Q. What attorneys?
- 8 A. When we set it up last was Ryan Germany
- 9 and Kevin Rayburn, when he was deputy general
- 10 counsel.
- 11 Q. When the new system was implemented with
- 12 BMDs, was there any discussion of Mr. --
- 13 Dr. Shamos's testimony and about the need to test a
- whole lot more than a single BMD and printer?
- 15 THE WITNESS: I --
- MS. LaROSS: Objection to the form of the
- 17 question.
- 18 THE WITNESS: I do not recall.
- 19 BY MR. CROSS:
- Q. As the head of CES, is it your view that
- 21 testing a single BMD and printer on election day is
- 22 a reliable way of assessing the security and
- reliability of some 30,000 BMDs and printers across
- 24 the state?
- 25 A. When we enter into the testing, the way

- 1 that the project files are built in regards to
- 2 programming a BMD, when you're within a single
- 3 jurisdiction, there's only one data file created
- 4 from that jurisdiction's data election project
- 5 that's used to program a BMD. So the same data file
- 6 is used to program all BMDs within a single county.
- 7 So if we randomly select a county, have
- 8 them create a backup, bring that backup into
- 9 Atlanta, install that into a Dominion Election
- 10 Management computer, then create the election file
- 11 that's used to program a BMD, we would be putting
- 12 the same file on one BMD or 500 BMDs. So it's an
- 13 expectation that if one BMD shows proper operation,
- 14 that others would as well.
- 15 Q. So is the answer to my question yes, you
- 16 think that is a reliable method?
- 17 A. We have found to be -- we have found it to
- 18 be reliable in the past.
- 19 O. You've found it to be reliable because
- 20 it's never shown malware or a glitch with whatever
- 21 equipment you tested?
- 22 A. We --
- MS. LaROSS: Objection to the form of the
- 24 question.
- You may answer.

Page 29 1 THE WITNESS: We have never encountered 2 any situation where the system did not operate 3 as expected. BY MR. CROSS: 4 5 Ο. Do you have a background in statistics? 6 Α. I took some statistical classes in 7 graduate school, yes, sir. 8 So why doesn't the State test a 9 statistically representative sample of voting 10 equipment, instead of 1 out of some 30,000 pieces? 11 MS. LaROSS: Objection to the form of the 12 question. 13 THE WITNESS: As you speak, there are 14 30,000 pieces of equipment. Depending upon 15 what sampling you were to set up, you would 16 then have to have access to that amount of 17 equipment and a location to set all of that 18 equipment up for testing purposes and manpower 19 to go through that testing exercise. 20 BY MR. CROSS: 21 And that's not something the State can do? Ο. 22 The State, of course, has resources. Α. 23 office has a total of seven individuals, and that 24 would be a hard task for us to execute on a single 25 day.

- 1 Q. Are you aware that there are USB ports in
- 2 the current voting equipment, the BMDs and the
- 3 printers, that are accessible to voters in the
- 4 voting booth?
- 5 A. I am aware that there are USB ports on the
- 6 devices. However, accessible by the voter on
- 7 election day, I would -- I would raise question of
- 8 that.
- 9 Because the B -- the D -- the BMDs on
- 10 election day, the -- the panels where you would find
- 11 those USB ports are behind sealed mechanisms. There
- 12 are seals that are attached on the sides of the BMD,
- 13 there are seals that are attached on the sides of
- 14 the printers, to prohibit access to those locations.
- 15 Q. So it's your understanding that all the
- 16 USB ports on the printers and BMDs are covered by
- 17 seals on election day?
- 18 A. It is my understanding, yes, sir.
- 19 Q. But you haven't inspected those; right?
- 20 A. I have not been out into a county on
- 21 election day, no, sir.
- Q. And who is responsible for inspecting all
- 23 of the seals on all of the voting equipment? Is
- 24 that at the county level?
- 25 A. The counties are responsible for

- 1 maintaining the security of their voting equipment.
- 2 Q. But you're aware that it's happened on
- 3 numerous occasions the counties have used BMDs in
- 4 elections where the seals were broken on election
- 5 day; right?
- 6 MS. LaROSS: Objection to the form of the
- 7 question.
- 8 THE WITNESS: Any notification that we
- 9 have obtained with a county saying that they
- 10 had a unit that the seal was broken, our
- direction has always been, well, that needs to
- be resealed or the unit taken out of operation,
- preferably take the unit out of operation if it
- is election day.
- 15 BY MR. CROSS:
- 16 Q. And under what circumstances would you
- 17 tell a county to just go ahead and reseal a broken
- 18 seal on a BMD on election day, rather than remove it
- 19 for testing?
- 20 A. To be honest, I don't believe I would ever
- 21 tell a county just to reseal it. And if it's in the
- 22 midst of election day, you're going to turn that
- 23 machine off and you're going to set it aside.
- Q. And why is that?
- 25 A. Because we want to try to -- also try to

Page 32 do our best to ensure that the system has not been 1 2 infiltrated in some way. And so if there were a handful of BMDs 3 Ο. 4 that had been infiltrated through, say, the USB 5 ports, is it your belief that parallel testing of a 6 single BMD out of some 30,000 across the state would be a reliable way to identify the infected BMDs? 7 8 MS. LaROSS: Object to the form of the 9 question. 10 THE WITNESS: I am just going to again 11 state that the State has performed this 12 parallel testing on election day in the past 13 and has plans to continue doing it moving 14 forward, and to this date, we have not 15 encountered any issue. 16 BY MR. CROSS: 17 Q. And the State has continued to do that 18 despite the testimony of its own election security 19 expert; right? 20 MS. LaROSS: Objection to the form of the 21 question. 22 THE WITNESS: We have continued to do that 23 testing. 24 BY MR. CROSS: 25 So you talked about hash testing and logic Q.

Page 33 and accuracy testing on the old DRE system. 1 2 Is there other testing that was done to 3 look for malware or some other compromise of the DRE system, to your knowledge? 5 I -- I do not recall at this moment. 6 Do you know why the Secretary's office Q. 7 never performed any forensic examination of any of the DRE voting equipment or the -- or the servers, 8 9 the GEMS servers? 10 MS. LaROSS: Objection to the form of the 11 question. 12 THE WITNESS: No, sir, I do not. 13 BY MR. CROSS: 14 Who would make that decision on whether to Q. 15 conduct that type of examination? I believe that would be a decision that 16 17 would be made by the Secretary. 18 Q. Do you know if there was ever discussion 19 or consideration of that type of examination of the 20 old system? 21 I do not know. Α. 22 Who would you ask if you wanted to know? Q. 23 I -- I would ask, most likely, our general Α.

25 Is that Ryan Germany? Q.

24

counsel.

Case 1:17-cv-02989-AT Document 1368-4 Filed 04/13/22 Page 34 of 309

- 1 A. Yes, it is.
- 2 Q. Are both logic and accuracy testing and

- 3 the hash testing that you described with the old
- 4 system, are those both still done with the new
- 5 system?
- 6 A. Yes, they are.
- 7 Q. And are they still done generally in the
- 8 same way, except that the logic and accuracy testing
- 9 is done in election mode?
- 10 A. That is correct.
- 11 Q. And there's also not been any forensic
- 12 examination of the voting equipment or the -- the
- 13 servers that are used with the Dominion system,
- 14 right, by the State?
- 15 A. At the end -- after the conclusion of the
- 16 November 2020 election, the State did work with
- 17 Pro V&V, who is a federal testing lab, to come in
- and go to a number of counties and did a random pull
- 19 of BMDs and ICP scanners to do a hash validation
- 20 examination on the -- on those devices to see if
- 21 anything had changed in the applications that had
- 22 been installed.
- Q. Right, but that was a -- that was another
- one of the hash tests that you talked about before;
- 25 right?

Page 35 Yeah, that was a -- that was a hash 1 Α. 2 inspect where they would bring -- they -- they removed the application from the devices and did a 3 hash compare based upon the certified -- the gold 5 copy, the copy maintained by Pro V&V of the 6 applications. 7 And so you're not aware of any forensic Q. 8 examination of any of the voting equipment in 9 Georgia with the Dominion system; right? 10 MS. LaROSS: Objection. Form of the 11 question. 12 THE WITNESS: I can only speak to what I just mentioned. 13 14 BY MR. CROSS: 15 Is it your belief that the hash test that 16 Pro V&V did after the November 2020 election, that that's a forensic examination --17 18 COURT REPORTER: Excuse me, excuse me --19 MR. CROSS: Yeah, sorry. Let me say it 20 again. 21 COURT REPORTER: Thank you. 22 BY MR. CROSS: Is it your belief that the hash test that 23 24 Pro V&V did after the November 2020 election, that

that is a forensic examination of the voting

25

Page 36 1 equipment? 2 I'm just thinking that that's a -- that's Α. an examination that was done. Whether that meets 3 the definition of "forensic" in the information 5 sector of the world, I do not know. 6 Is there any other examination of the Q. 7 Dominion voting system that you're aware of that you 8 would think of as potentially a forensic examination 9 by the State or the counties? 10 I cannot think of one, no, sir. 11 Ο. And would that also be -- would you expect 12 that to be the Secretary's decision, as with the DRE 13 system? 14 A. Yes, sir. 15 And do you have any knowledge on whether that's ever been discussed or considered? 16 17 Α. I do not know. 18 I gather you don't know why it's not been Q. 19 done, then? 20 MS. LaROSS: Objection to the form of the 21 question. 22 Go ahead. THE WITNESS: I do not know. 23 24 BY MR. CROSS:

Q. And if you wanted to know if it had been

Page 37 considered, who would you ask? 1 2 Again, I would -- I would -- I would point Α. 3 my question to general counsel. Okay. You mentioned earlier that L & A 4 Ο. 5 testing -- strike that. 6 You mentioned earlier that if a 7 discrepancy arises with voting equipment during 8 logic and accuracy testing, the equipment is -- is 9 not used and -- and may be sent back to the 10 manufacturer for repair; is that right? 11 Α. That is correct. 12 Ο. How often are there those sorts of discrepancies with the Dominion equipment, 13 14 approximately? 15 We are just now entering our second full 16 use of the -- of the system in the Dominion 17 environment. There have not been very many -- I 18 can't think of an instance where the system 19 wasn't -- didn't calculate properly. 20 There have been issue -- instances where 21 the scanner would not take the ballot, the rollers 22 on the ICPs were not pulling properly and the ballot 23 couldn't be processed, and I know that equipment has 24 been returned to the vendor for repair.

I know of LCD screens on the ICPs that are

- 1 not responsive to touch that have been sent back for
- 2 repair.
- But at this point, we have not had a high
- 4 volume of equipment repair come back through our
- 5 office for acceptance testing and redistribution to
- 6 the county.
- 7 O. Has there ever been a time with the
- 8 Dominion system where any of the equipment did not
- 9 pass the hash test?
- 10 A. We have not encountered that at this
- 11 moment in time.
- 12 Q. What about with the prior DRE system?
- 13 A. I can only think of one instance of where
- 14 the Election Management System, when we did the hash
- 15 compare, came back with a single mismatch. And that
- 16 was in a report-generating file that had a mismatch,
- 17 and then, of course, that server was immediately
- 18 replaced with a new server.
- But that is the only -- only instance that
- 20 we've ever had a hash value not come back and be
- 21 equal.
- 22 Q. And when was that?
- A. Honestly, I can't remember the exact year
- 24 that was. It was -- I would -- I would be guessing
- 25 right now to tell you the year, but it was -- it

- 1 would be a guess right now to tell you the year.
- Q. Would you say it was within the last five
- 3 years? Last ten years? What's your best
- 4 approximation?
- 5 A. Within the last ten years, not within the
- 6 last five years.
- 7 Q. Okay. And we're talking about a GEMS
- 8 server; is that right?
- 9 A. Right, this was a -- was a GEMS server.
- 10 Q. Was that county or state?
- 11 A. It was found at the county level.
- 12 Q. Do you recall what county?
- 13 A. I believe it was Newton County, but I
- 14 could be mistaken.
- 15 Q. When was that testing done in relation to
- 16 an election? Was it -- are we talking, like,
- 17 shortly before an election? Shortly after? What do
- 18 you -- what do you recall?
- 19 A. I -- I don't recall the specific time that
- 20 it was done. It was -- I -- I do not recall.
- 21 Q. Okay. Was it being done before some kind
- of election that was upcoming? Is that usually when
- 23 the hash testing is done?
- A. No. The hash testing was normally done
- 25 whenever we were in a county for reason. It could

- 1 have been that they were -- that they had just moved
- 2 into a new elections office and their election
- 3 equipment had to be moved. Whenever that takes
- 4 place, before the equipment can be used again, we
- 5 would appear and do an -- an equipment test and
- 6 validation test to make sure that nothing had
- 7 happened to the equipment during that move.
- 8 So I assume that it was probably in
- 9 conjunction with something of that nature, but I --
- 10 I just -- I don't remember.
- 11 Q. And what happened with the server? What
- 12 did you guys do with it?
- 13 A. The server was brought back to the Center
- 14 for Election Systems, and then my recollection of
- 15 the event was trying to determine, okay, well,
- 16 what -- what created this -- this mismatch.
- 17 And my recollection was -- determined that
- it was never an issue with any application, but it
- 19 was one of the report files -- one of the files
- 20 that's used to generate one level of a -- a
- 21 printable report had -- was given a mismatch and had
- 22 not been installed properly, was what was -- was
- 23 found. That's my recollection.
- Q. How long had that server been used in the
- 25 county?

Case 1:17-cv-02989-AT Document 1368-4 Filed 04/13/22 Page 41 of 309 Page 41 I do not know. I -- I can't recall that. 1 Α. 2 But this -- this wasn't a new server that Q. 3 had just been installed; this was a server the 4 county had used for elections and you guys were 5 doing your hash testing? 6 Yeah, again, I don't recall how old or how Α. 7 many -- if -- if and even that server had been used in an election. I don't know. 8 9 You said that there was an issue with one 10 of the report files. A report for what? 11 12 Again, I don't remember which exact one. It's -- there are a litany of printable reports that 13 14 can be generated from the GEMS computer. It could 15 have been a report showing you the list of districts. I don't know. I -- I don't recall what 16 17 report it was. 18 Ο. Does CES still have the -- that GEMS 19 server, or is it gone? 20 I believe that one is gone, being part of Α. 21 the old system. If -- if -- if CES still has it,

- 22 it's still in our secured closet where we're
- 23 maintaining anything that we had whenever the system
- 24 transitioned over to the new system.
- But, again, I -- I don't -- I cannot speak

Page 42 to that, whether we have that specific box anymore 1 2. or not. 3 Okay. In any of the testing that has ever Ο. been done in Georgia on either the prior or old 4 5 election system that you're aware of, has there ever 6 been any suspicion of malware on any of that 7 equipment? 8 No, sir, not that I'm aware of. 9 Let's talk about Topic 1b, "Any efforts made to 'air-gap' any Components of Georgia's 10 11 Current Election System...." 12 Α. Hold on a second. My Veritext just cut 13 out. 14 Q. Oh. 15 MS. LaROSS: Okay. Hang on for a moment 16 here. 17 MR. CROSS: Sure. 18 VIDEOGRAPHER: Counsel, did you want to 19 stay on the record? 20 MR. CROSS: Yeah, let's go off the record. 21 VIDEOGRAPHER: The time is 9:55 a.m. 22 We're off the record. 23 (Off the record.) 24 VIDEOGRAPHER: The time is 9:56 a.m. 25 We're on the record.

- 1 BY MR. CROSS:
- 2 Q. Do you have Exhibit 1 in front of you?
- 3 A. Yes, sir, I do.
- 4 Q. Okay. So the latter part of Topic 1a --
- 5 we talked about the first part -- the latter part
- 6 references "any exchanges of software or data
- 7 between any Component of the two election systems
- 8 and the use of the same computers, servers, or
- 9 removable media with both systems."
- 10 What, if any, data or software has been
- 11 exchanged between any component of the DRE system
- 12 and the BMD system?
- 13 A. I am not aware of any computers or servers
- 14 that were used at the -- that -- to hold on to the
- 15 GEMS application being used to execute the Dominion
- 16 application in any way. Everything was replaced at
- 17 the county level; everything has been replaced at
- 18 the State level. Computers that were used to
- 19 program a DRE, those were an own set of computers.
- 20 Computers used to program BMDs and run the Dominion
- 21 system was a whole 'nother set of computers.
- 22 Q. So your understanding is at the State
- 23 level, there were no computers that ever were used
- 24 with the DRE system that are now used with the BMD
- 25 system?

- 1 A. There are no computers that I am aware of
- 2 that have been used to execute the GEMS application
- 3 and also used to execute any of the Dominion
- 4 applications.
- 5 Q. So you're talking specifically about the
- 6 computers within what the State calls the air-gapped
- 7 environment for the Election Management server; is
- 8 that right?
- 9 A. Yes.
- 10 Q. What's the basis for your belief that the
- 11 counties made the same equipment replacement?
- 12 A. Well, one, the State went and collected
- 13 all of the GEMS Election Management computers from
- 14 all 159 counties, and then Dominion installed new
- 15 Election Management computers in all 159 counties.
- And those computers were not transferred
- 17 and installed in the county until a member of the
- 18 Secretary of State's office had done an acceptance
- 19 test on those new Election Management computers.
- Q. And when you say that the State installed
- 21 new Election Management computers in the county,
- you're talking the Election Management server?
- 23 A. That is correct.
- Q. The -- the individual desktops or laptops
- 25 that the county officials use to work with that

- 1 server, the State didn't replace all of those,
- 2 though; right?
- 3 A. No, the State replaced all of those.
- 4 Q. The State replaced all of the computers
- 5 and desktops that are also used with the county
- 6 Election Management server?
- 7 A. The -- the State replaced all of the
- 8 computers that a county uses to interact with the
- 9 Election Management System, yes, sir.
- 10 Q. The State did not do the same for
- 11 removable media like USB drives, flash drives;
- 12 right?
- 13 A. As part of the distribution of the voting
- 14 system, the vendor included a large quantity of USB
- 15 drives for use with the new voting system.
- 16 Q. And when were those provided?
- 17 A. Those were provided in -- the exact time
- 18 frame, which date did the county get the supply from
- 19 the vendor, I can't speak to, but they were
- 20 distributed during the distribution of the voting
- 21 system in 2019.
- When the system started, I think there was
- 23 a smaller set of jump drives, USB drives, that were
- 24 distributed to counties, and I think the total
- 25 amount that the vendor was obligated to provide to

Page 46 the counties was completed in 2020, I'm go- -- I'm 1 2 thinking by sometime in early March of 2020. 3 Q. Right. 4 At least in early 2020, say in the 5 January/February time frame, the counties were still 6 reusing their older flash drives from the DRE system 7 with the BMD system; right? In one circumstance -- and I believe this 8 was in January of 2020 -- the -- we had an 9 10 unexpected State election to fill a vacancy, I 11 believe, in the State house, and I believe it was in 12 Southwest Georgia, Decatur County, I think. 13 And as -- being a State election, the 14 county is required to create an export file and 15 transport that export file to the State for election reporting purposes, because it's a State race. And 16 at the time, this jurisdiction -- I think Decatur 17 18 County -- had been a pilot county for the new 19 They had used the system in a preceding 20 November election in which they -- they didn't have 21 to do any election night reporting or upload to the 22 State, but in January they were going to need to do 23 an election -- an upload. 24 And at the time, they did not have another 25 USB drive that they could use to transfer data over

- 1 from the Election Management computer over to the
- 2 computer they use for upload to the Secretary of
- 3 State's Election Night Reporting, and they did ask
- 4 if it would be okay if they would use a drive that
- 5 had been provided by the State previously for those
- 6 same purposes with the old system. And we did give
- 7 them clearance to use that particular drive.
- Q. You're not suggesting that's the only
- 9 instance when a county has used a USB drive from the
- 10 DRE system with the BMD system; right?
- 11 A. I'm just speaking to one instance that I
- 12 am aware of.
- 13 Q. You're saying you're not aware of any
- 14 other instance?
- 15 A. I am just speaking to the one instance I'm
- 16 aware of.
- 17 Q. So, again, does that mean you're not aware
- 18 of any other instance?
- 19 MS. LaROSS: Objection to the form of the
- 20 question.
- 21 THE WITNESS: I -- I am -- I'm stating the
- one that I am aware of.
- 23 BY MR. CROSS:
- Q. Well, are you aware of any other instance
- 25 where anyone at the county or state level used a USB

Page 48

1 drive with the Dominion system that had also been

- 2 used with the GEMS system?
- 3 A. I do not know.
- 4 Q. You just don't know one way or the other?
- 5 A. I -- I do not know the exact individual
- 6 drives that the county uses to interact with
- 7 their -- their system on a -- on an
- 8 election-by-election operation.
- 9 Q. In the current system, counties typically
- 10 reuse flash drives from one election to the next;
- 11 right?
- 12 A. With the current system, yes, they have --
- 13 again, they were provided a set of USB drives that
- 14 were being used to -- to interact with the voting
- 15 system, yes, sir.
- 16 Q. In addition to the -- the Election
- 17 Management server the counties have, they also have
- 18 an Election Night Reporting server or computer that
- 19 they use to send election results to the State;
- 20 right?
- 21 A. Yes, sir. They have to -- they have to
- 22 use a computer in the -- in the office that has a
- 23 connection that allows them to connect to the
- 24 Secretary of State's Election Night Reporting page.
- Q. And when the Dominion system rolled out,

Page 49 the State and counties didn't replace the ENR 1 2 computers; right? 3 No, the State never provided counties with Α. 4 computers for direct connection to the Election 5 Night Reporting System. Those -- the counties have 6 always used county-maintained equipment to access 7 that -- that particular page. In the -- just so I understand the process 8 9 right, do I understand correctly that the way the 10 election night reporting works is the tabulation 11 results are taken from the scanners on memory cards 12 that are then plugged into the county Election Management server, the -- the vote tallies are sort 13 14 of tabulated or aggregated there, and that then 15 comes off the county Election Management server on a 16 USB drive that's plugged into the Election Night 17 Reporting computer, and the results are then sent 18 over the Internet to the State; is that right? 19 On election night, the -- the scanners Α. 20 that are used to scan the ballots and tabulate the 21 results, there are two types of scanners. There's 22 the ICP scanner, which is the ImageCast Precinct 23 scanner used in the polling location. When that

tabulator is closed, a tab- -- a tabulation tape is

produced by that device.

24

25

Page 50 Information that that device collects is 1 2 then stored to two compact flash cards. One of 3 those two compact flash cards is removed from the 4 ICP and transported back to the election -- to the 5 elections office, where it is then uploaded into the 6 Election Management computer using an application 7 called -- RTR is the acronym, RTR. It's -- Results 8 Tally & Reporting is the application. 9 And then information from the compact 10 flash card is -- is uploaded into the Election 11 Management computer through RTR. RTR then 12 aggregates those result files and produces a 13 cumulative result file for the county. 14 The county can then generate an export 15 file from RTR. The export file is in a common -not a commonly delineated -- but a CSV file. 16 17 That CSV file is then transferred from the 18 Election Management computer onto some sort of 19 removable media that is then removed from the 20 Election Management computer and taken over to a 21 county-maintained computer that would be connected 22 to the Internet. 23 That remov- -- removable media is then 24 inserted and then the county signs in to the 25 Secretary of State's Election Night Reporting

Page 51 1 application using username and passwords, and then 2 they upload that CSV file into the Secretary of 3 State's ENR page, and then that -- that service aggregates that file and loads it into a State 5 display of results. 6 That -- the computer where counties Q. typically upload the election results into the --7 8 the Election Night Reporting application, that's not 9 a standalone computer just for ENR purposes; right? 10 Α. It could be in that particular county or 11 it may not be. I -- I do not know. 12 counties -- each county sort of manages that in their own particular way. 13 14 So I have heard of counties that they 15 isolate a specific computer for that and I know of 16 other counties that do not isolate a specific 17 computer for that action. 18 Ο. What data or software -- we talked about 19 equipment, but what data or software, if any, was 20 exchanged between the old election system with the 21 GEMS DREs and the Dominion system? 22 MS. LaROSS: Objection to the form of the 23 question. 24 THE WITNESS: I'm not aware of any 25 specific other applications on the servers --

```
Page 52
          you know, I don't -- I'm not aware of any of
1
 2
          the same version applications or anything that
 3
          was on an old system that was housing GEMS
 4
          versus on a new computer that would be housing
 5
          the Dominion applications.
 6
     BY MR. CROSS:
               Well, the Dominion system also needed
7
          Q.
     access to the voter registration data in the same
 8
9
     way that the GEMS system did; right?
10
          Α.
               Well, no.
                          The -- the GEMS system, the
11
     only avenue for entering in voter registration
12
     information into GEMS was to manually key it in, and
     that is the same that is in place with the Dominion
13
14
              Whenever a county is putting in their total
     system.
15
     number of registered voters within the Dominion
16
     application, they have to open up the Dominion --
17
     they have to go to the Election Management computer,
18
     open up the election project using the application
19
     that's called Election Event & Design, EED, and
20
     inside that application, they can go in and -- and
21
     key in the number of active registered voters per
22
     precinct.
23
               And that's -- there was a similar
24
     operation that was done on the GEMS computers, where
25
     you would open up -- go to the Election Management
```

Page 53 1 computer that was housing GEMS, open up the specific 2 GEMS database, and then enter in your voter 3 registration totals by -- by the base precinct 4 level, I believe it was in GEMS. 5 The ballot -- the ballot-building process requires voter registration data; right? 6 7 Α. The ballot-building process is dependent 8 upon reports that come out of the voter registration 9 And these reports outline the individual 10 precincts that are in a county, the divisions in 11 that precinct, what are the district combinations in 12 those precincts, and what political districts are aligned to those particular district combinations. 13 14 We have to have those reports -- and it's 15 a physical report that comes out of the -- out of 16 eNet, which is the State's voter registration 17 system -- that ballot builders then use to key in 18 that information into the Election Management System 19 computers. 20 So -- so in the ballot-building process, 0. 21 when the ballot builders are looking at voter 22 registration data to build the ballots for a 23 particular election, do I understand correctly

they're relying on hard-copy reports, as opposed to

pulling data out of the voter registration system

24

25

Page 54 and onto whatever computer they're building the 1 2 ballots on? 3 Α. That is correct. 4 0. And what's the basis for that 5 understanding of yours? 6 Α. Well, the basis of understanding is that's 7 how the system is built, is -- in the -- in the 8 previous system, in order to get information that 9 was in the registration system, you had to key it 10 There is no -- there was no -- there's no 11 im- -- there was no import system. There was no 12 report that could be generated out -- out of eNet in any format that could then just be imported into the 13 14 GEMS system. 15 In the Dominion system, it's the same --16 same setup. We have a data set, a printable report 17 that can be generated from eNet, and then we use 18 that same keystroke process of ballot builders 19 looking at the report with their eyes and going into 20 the application, the Dominion application, and 21 building a precinct, and then associating that 22 precinct to the necessary districts that had been 23 built into that election project. 24 Q. In the old GEMS DRE system, the ballot

building occurred at individual contractors' homes.

25

Page 55 1 Do you recall that? 2 That -- that took place in 2018, when the Α. 3 Secretary of State's office was bringing the Center 4 for Election Systems back into the Secretary of State's office at the time. 5 6 And the Secretary of State's office did 7 not have employees at the time who were versed on 8 the Election Management System, on the GEMS Election 9 Management System, and the Secretary of State's 10 office did contract with Election Systems & Software 11 for assistance in building the election databases in 12 2018. And they were built by contractors who were working for Election Systems & Software. 13 14 Q. When the -- since the Dominion system has 15 been implemented, where does the ballot building 16 occur? 17 It's -- it's occurred in two different 18 phases. 19 When the Secretary of State's office 20 completed their contract with Dominion for the new 21 voting system, as part of that contract, Dominion 22 would provide ballot-building services for the State 23 of Georgia from the time that the contract was 24 signed until the end of the State's fiscal year in 25 So up until June 30th of 2021, if an election 2021.

- 1 project was needing to be built, it was built by
- 2 Dominion.
- 3 Since July 1 of 2021, the Secretary of
- 4 State's office has been building the election
- 5 projects that are needed for any election that is
- 6 scheduled within the -- within the state.
- 7 Q. When Dominion was building the ballots,
- 8 where did they physically do it?
- 9 A. They set up location -- they had a office
- 10 location, warehouse location, in Metro Atlanta. It
- 11 was in -- off of Highland Parkway in Smyrna,
- 12 Georgia, and they had their -- their staff set up at
- 13 that location and that is where they were conducting
- 14 their ballot-building operations.
- 15 Q. How did the State and counties get the
- 16 ballot-building files from Dominion in that system?
- 17 A. In that process, when an election project
- 18 was needed, the Secretary of State's office would
- 19 communicate with individual counties and obtain
- 20 whatever information was needed to be placed onto an
- 21 upcoming election ballot, what were the contests,
- 22 who were the candidates.
- The Secretary of State's office would
- 24 generate the voter registration reports, those
- 25 reports we spoke of earlier that outlined the

Page 57 precincts, the combos, the districts that are 1 2 aligned thereto. And all of that information would 3 be compiled and then provided to Dominion, who would then take that product, that information, and 5 produce -- begin building the election project file. 6 When -- there's a -- there's a point when 7 the project file has been built to a point to where it needs to then be proofed to verify that what has 8 9 been built in relation to content is what is needed 10 for the given election. 11 We set up a process where the -- the 12 Dominion side would produce what we would call a proofing packet, and the proofing packet contained 13 14 PDF copies of the ballots as they would be 15 constructed on an optical scan ballot and then a 16 litany of individual Excel reports that outlined the 17 precincts in the project, how the precincts were 18 divided, what were the district combos in the 19 precincts, what ballot styles related back to those 20 precincts and -- and district combos, tabulator 21 reports, what equipment had been set up, to what 22 polling places was it assigned, what type of 23 configurations were assigned to those equipment in relation to how it -- how will it interact with 24 25 ballots. So there was a size -- a number of

Page 58 1 reports. 2 There were audio files for us to review to 3 make sure that candidate names were being read 4 properly. 5 When a proofing packet was ready, it would be brought to the Secretary of State's office, where 6 7 member of CES would then go through the proof package and compare its content based upon what was 8 9 in the original information obtained from the county 10 in relation to, again, precincts, the -- the 11 information within the precincts, the contests, the 12 candidates. 13 If CES found all of that stuff to be correct, CES would then distribute to the counties a 14 15 copy of that -- of that proof packet with instruction on how they would need to go about and 16 17 review that packet to make sure that it is correct. 18 Sometimes counties would get the packet 19 and then they would find mistakes that we had not 20 found in our proofing process. Whenever a mistake 21 was found, a -- a written indication of what the 22 mistake was would be given, and then that correction 23 would be given over again to Dominion for them to 24 then correct the data package, a new proof package 25 would be generated, and it would go through that

Page 59 proofing process a second time, end up in the 1 2 county's hands. 3 Once the county then said, "Yes, 4 everything is complete and accurate in the proofing 5 packet," the county would then send over a sign-off sheet with signature indicating that they had 6 7 reviewed the proofing packet, found it to be 8 correct. When CES was in possession of that 9 sign-off, CES would then notify Dominion that the 10 11 county had signed off on the proofing package. 12 Dominion would then finalize the election project, and that's where the user names and passcodes for 13 14 that assigned county would be set into the elections 15 project and the election project would be made ready 16 for election. 17 That election project would then -- was 18 then hand-delivered to the Elect- -- to CES, where 19 CES would then transfer that election project onto a 20 brand-new, freshly formatted USB drive, and then 21 that USB drive would be placed into a locked bag 22 specifically for the county. 23 And then that locked bag is then delivered 24 to the county for the county to unlock, remove 25 the -- the USB drive, and begin their process of

- 1 installing that election project into their Election
- 2 Management computer.
- 3 Q. How were the proofing packets generated by
- 4 Dominion provided to CES when Dominion was doing the
- 5 ballot building?
- A. It was done in two ways. The election
- 7 project may have been placed onto a jump drive and
- 8 delivered -- hand-delivered to our office.
- 9 When we were in the midst of the pandemic
- 10 and we were not always in the office every day,
- 11 Dominion had set up a secured SFT site on their
- 12 system, and then those proof packets were
- 13 transferred electronically to that SFT site, where
- 14 we would have access to log in and pull that packet
- down that contained the PDF files and Excel reports
- 16 for us to inspect.
- 17 Q. Do you mean SFTP?
- 18 A. Yes, S- -- SFT.
- 19 Q. SFTP?
- 20 A. You -- you may -- I -- I remember it as
- 21 SFT, but you are probably correct as SFTP.
- Q. Okay. Okay. I understand what you're
- 23 talking about.
- 24 In -- in the time frame when Dominion and
- 25 CES were exchanging the -- the proof packets over

- 1 the -- I think it's an FTP site, but SFT, as you
- 2 called it, was that same system also used to get the
- 3 packages to the counties?
- 4 A. No. A different system would be used to
- 5 transfer the -- the -- the packet to the county.
- 6 The Secretary of State's office maintains an FTP
- 7 that each individual county has access into, and CES
- 8 also has access to that FTP.
- 9 And when we would complete our proofing of
- 10 the election packet that had been provided to us by
- 11 Dominion, we would then post to that SOS-maintained
- 12 FTP a copy of the election packet and notify the
- 13 county that the packet had been placed out there for
- 14 their review.
- 15 Q. Okay. And once you got to the final stage
- of the election project coming, so you're beyond the
- 17 proofing packet and Dominion is providing the
- 18 election project, was that also sometimes provided
- 19 to the State over this SFT?
- 20 A. No, sir, it was not. We -- we wanted them
- 21 to bring the election project, the finalized
- 22 project -- hand-deliver that to our office. We did
- 23 not want that election project transferred through
- 24 the FTP means.
- Q. When the project package came in through

Page 62 the SFT, did that go directly into the State 1 2 Election Management server? 3 The -- the proofing -- the proofing Α. 4 Which -- which one are you referencing? 5 Ο. Oh, I'm sorry. I may have misspoken, yes. 6 Back up. 7 The proofing packet that you said 8 sometimes comes in over -- I think you said SFT, did 9 that go directly to the Election Management server? 10 Α. No, because the proofing packet was 11 nothing more than a set of PDF files and Excel 12 files. So that -- it -- it was not a project file, it was information generated from an election 13 14 project file that was used to proof the content of 15 an election project file. It was not the election project file. It was PDF files; it was Excel 16 17 spreadsheets. 18 Q. So that went to a computer in CES? 19 Yes, that would be on a computer in CES. 20 And then you would -- we would review that 21 packet for content to make sure it had the right 22 precincts, the precincts were labeled the right way, 23 that the precincts had been built properly, that the 24 ballots that were resulting from that process 25 contained the right races, were organized in the

- 1 right way.
- 2 And then once we approved of that packet,
- 3 found it to be correct, that packet was then shared
- 4 with the county for their approval.
- 5 Q. At the election project stage, you said
- 6 that that goes from CES to the counties on a new --
- 7 I think you said a brand-new and newly formatted USB
- 8 drive; is that right?
- 9 A. That is correct.
- 10 Q. And that's put in some sort of locked bag;
- 11 is that right?
- 12 A. That's correct.
- 13 Q. And then that bag goes to the county.
- How is that delivered to the county?
- 15 A. It's delivered in one of two ways. It was
- 16 either shipped via UPS with a tracking ID or it
- 17 could be hand-delivered by an SOS investigator,
- 18 depending upon the time frame.
- 19 Q. What is this -- what does this bag look
- 20 like? Is it like one of those bank bags that people
- 21 used to take --
- 22 A. Yes. Sorry. Yes, it's a -- it looks like
- 23 a bank bag, an old bank bag. It is red in color.
- 24 It has the county's name on -- on the bag, also the
- 25 county's numeric number -- like Columbia County is

- 1 36. On the back of the bag is the state seal, and
- 2 it has a -- a zip pouch that has a key lock that
- 3 when you zip it up, you lock it with a key.
- And CES has a key to that bag, the
- 5 Secretary of State's office downtown has a key to
- 6 that bag, and then the individual county that it's
- 7 assigned to has a key to that bag.
- 8 Q. Okay. And when it gets shipped, is it --
- 9 do you put these things in like a box or do you just
- 10 ship the bag?
- 11 A. We put the bag inside a box and then the
- 12 box goes inside a UPS envelope.
- 13 Q. Okay. Does each county have its own
- 14 assigned bag with its own unique lock?
- 15 A. It does.
- 16 Q. And so the county has its own key when
- 17 this thing shows up?
- 18 A. That is correct.
- 19 Q. And who at the county level is responsible
- 20 for maintaining the key?
- 21 A. The election supervisor.
- 22 Q. And do you know -- does the State have
- 23 requirements on how the key is to be maintained, or
- 24 is that for the counties to determine?
- 25 A. That's for the counties to determine.

Page 65 Is there any confirmation protocol for 1 Q. 2 when this thing arrives at a county to confirm that 3 they have received it, they've opened it, the right 4 people have access to it? 5 What we have set up is -- is the following. 6 7 When -- when an election project has been 8 finalized and ready to be shipped or delivered to 9 the county, we post to the county FTP location an 10 informational document that the county pulls down. 11 And that information document gives the county the 12 usernames and passwords they need for the project, but they also are given a CES access code. 13 14 When the election project is placed onto a 15 USB drive for distribution to the county, the -- the 16 file -- we do a password protect on the file onto 17 the USB drive, and you can't remove the file from 18 the USB drive without obtaining the password from 19 CES. 20 And the way you obtain the password from 21 CES is you have to have access to the Secretary 22 of State's FTP site. You have to then download that 23 informational file. You then have to call CES and 24 provide that access code, and at the time of

25 providing that access code, we can then give you the

Page 66 passcode to be able to extract the information from 1 the USB drive. 2. 3 Is that access code the same for all counties? 5 Α. It is not. So each county has its own access code? Q. 7 Α. That is correct. Q. Does each county also have its own 8 9 individual passcode for the election project files on the USB drive it receives? 10 The -- yeah, the election project file --11 Α. 12 every new election project that's generated is given a new set of passcodes for that given election. 13 14 And that would be the same across all Q. 15 counties? 16 No. Each individual county has its own Α. 17 passcode. MS. LaROSS: David, I don't mean to 18 19 interrupt your train of thought, but if there's 20 a point where we can take a break, I would 21 appreciate doing so. 22 MR. CROSS: Sure. Just give me a few 23 minutes, okay, Mr. Barnes? 24 MS. LaROSS: Yeah. Okay. 25 THE WITNESS: Yeah, a few more minutes.

Page 67 1 MS. LaROSS: Yeah, no problem. 2 BY MR. CROSS: 3 Just to wrap up this topic. Q. And so that was the process until -- I 4 5 think you said July of 2021; is that right? 6 Α. Well, it's still the process of today. 7 Sorry. Yeah, let me ask a better Q. 8 question. 9 Dominion was building the ballots for 10 Georgia with its Dominion system until July of 2021; is that right? 11 Yes, sir. 12 Α. 13 Why was Dominion building ballots at any 0. point, rather than just having the State do it 14 15 itself? 16 Because of the knowledge base that was -17 that's needed to gain about an Election Management 18 System and how to build a ballot properly. 19 We -- we signed on with Dominion as our 20 vendor in 2019, and at that time, the State did not 21 have anybody employed that knew enough about the 22 Election Management applications to build a ballot 23 on their own. 24 And to build an election project is --25 is -- is an important task. We want to make sure we

- 1 have it built right. So the State built into its
- 2 contract negotiations with an understanding that it
- 3 was going to take time for the Secretary of State's
- 4 office to build up its internal knowledge on the use
- 5 of the application in order to take over the
- 6 ballot-building operations.
- 7 And the same process was done in 2001,
- 8 2002, when the State contracted with Diebold at the
- 9 time for the new voting system. Diebold built the
- 10 ballots for the State of Georgia for the first year,
- 11 and then the State of Georgia had built its
- 12 knowledge of the application to where it could take
- 13 over that operation.
- 14 Q. And so since July of 2021, CES builds the
- 15 ballots; right?
- 16 A. Yes, sir.
- 17 Q. Who in CES is responsible for that?
- 18 A. We have -- we have four full-time
- 19 employees that are tasked with building election
- 20 project files.
- 21 Q. Are they former Dominion employees or are
- 22 they people Dominion trained?
- 23 A. They are people that Dominion trained.
- None of these four people -- well, one is a former
- 25 Dominion tech. He had worked for us before he was a

- 1 Dominion tech. He was part of our equipment-testing
- 2 group in 2019 and early '20 and then he went to work
- 3 for Dominion as a county tech, and then we were
- 4 lucky enough to hire him on as a full-time employee
- 5 in our office.
- 6 O. And the other three that have been
- 7 building ballots for CES since July of 2021, are
- 8 those -- were those already State employees at the
- 9 time that they began this work?
- 10 A. Right, one is -- one is a full-time,
- 11 permanent employee; the other two are contract, but
- 12 they're contract full time.
- 13 Q. And where do they physically build the
- 14 ballots?
- 15 A. In -- within CES. Within our -- within
- 16 our offices.
- 17 Q. So even throughout the pandemic, they have
- 18 not worked remotely at any point?
- A. Well, again, during 2020, we were not
- 20 building the election projects; those were being
- 21 built by Dominion.
- We, during 2020, were working remotely.
- 23 This was during the time when we were proofing the
- 24 packets. But when it came time to distribute the
- 25 election projects when we have gained possession of

- 1 those, we would be in the office when we would gain
- 2 possession of those, and then they were packaged
- 3 within our office and then shipped out from our
- 4 office.
- 5 Q. But since July of 2021, when CES took over
- 6 the ballot building, the individuals who were
- 7 responsible for that, they never worked remotely on
- 8 that project?
- 9 A. They -- they do not have the ability to
- 10 work with an elections project remotely. They have
- 11 to be inside the office to work on an elections
- 12 project.
- 13 Q. And the computers they do that on, are
- 14 those part of what you consider the air-gapped
- 15 Election Management System or -- or are those
- 16 different computers?
- 17 A. In our -- in our office, our employees
- 18 have two computers at their desk. They have their
- 19 SOS-provided -- SOS computer, which is used to
- 20 communicate with the outside world and to do the
- 21 work that you do as an employee of the Secretary of
- 22 State's office, and then they have a second computer
- 23 that is connected to our private system that is
- 24 air-gapped, that is isolated from outside
- 25 interconnection. And that is the system that they

Page 71 use to produce their election project files. 1 2 So these folks don't do any work on the Q. election project files, including any proofing 3 packets, on the -- the computers that are not part 5 of this air-gapped system; is that right? 6 Α. That is -- that is correct. We -- we do 7 our work on the private side when it comes to 8 election projects. 9 MR. CROSS: All right. Sure, let's take a 10 break. VIDEOGRAPHER: The time is 10:36 a.m. 11 12 We're off the record. 13 (Off the record.) 14 VIDEOGRAPHER: The time is 10:54 a.m. 15 We're on the record. 16 (Plaintiffs' Exhibit 2 was marked for 17 identification.) 18 BY MR. CROSS: 19 So, Mr. Barnes, wrapping up Topic 1a 20 briefly, just so we're clear, you're not aware of 21 any malware or other compromise that affected the 22 election outcome of the November 2020 elections in 23 Georgia; do I understand that right? I am not aware of anything that 24 Α. compromised the system in November of 2020. 25

- 1 Q. And as the head of CES for the State, do
- 2 you have a view on whether the election outcome of
- 3 the presidential election and the other
- 4 November 2020 elections were accurately decided?
- 5 A. In relation to my interactions with
- 6 elections within the State of Georgia, I feel like
- 7 everything was executed as it should have been
- 8 executed.
- 9 Q. You don't -- you don't personally, based
- 10 on your experience and role as the head of CES, have
- 11 any doubts about the election outcome; is that
- 12 right?
- 13 A. I do not have any doubts.
- Q. And you're not aware of any widespread
- fraud in the State of Georgia in the November 2020
- 16 elections?
- 17 A. No, sir, I am not.
- 18 Q. Is that true for any election? Let me --
- 19 well, let me ask a better question.
- 20 Are you aware of any widespread fraud
- 21 affecting any elections in Georgia since the time
- you've been the head of CES?
- MS. LaROSS: Objection to the form of the
- 24 question.
- THE WITNESS: I am not.

```
Page 73
1
     BY MR. CROSS:
2
               Are you aware of any election fraud at all
          Q.
3
     that potentially altered an election outcome in
     Georgia since you became the head of CES?
 5
          Α.
               Not --
               MS. LaROSS: Objection to the form of the
7
          question.
 8
               Go ahead, you can answer to your
9
          understanding.
10
               THE WITNESS: I am not.
11
     BY MR. CROSS:
12
               You're aware of a phone call that was
     publicly reported between the former president,
13
14
     Donald Trump, and Secretary Raffensperger regarding
15
     the November 2020 election; right?
               MS. LaROSS: I -- I object to the form of
16
17
          the question.
18
               THE WITNESS: Yes, sir, I'm aware of the
19
          report.
20
     BY MR. CROSS:
21
               And you're aware that it was reported that
22
     in that call, former President Trump asked Secretary
23
     Raffensperger to find a specific number of votes for
    him in that election.
24
25
               Do you recall that?
```

```
Page 74
1
               MS. LaROSS: I object to the form of the
2
          question.
3
               And, David, can you clarify what topic
          you're asking this question under?
 4
 5
               MR. CROSS: He's also testifying in his
 6
          personal capacity today.
7
     BY MR. CROSS:
 8
              Go ahead, Mr. Barnes.
          Ο.
               MS. LaROSS: Well, I still -- I have an
9
10
          objection to the form of the question.
11
               MR. CROSS: It also goes to 1a, but go
12
          ahead.
13
               THE WITNESS: Can you repeat the question?
14
     BY MR. CROSS:
15
          Q.
               Sure.
16
               Are -- are you aware that, at least
17
     according to the public reports, during that call
18
     between former President Trump and Secretary
19
     Raffensperger, Mr. Trump asked the Secretary to
20
     find, I think was his word, a specific number of
21
     votes for Trump in that election?
22
               Yes, I -- I believe I remember reading
          Α.
23
     that in the paper and hearing that on the news, yes,
24
     sir.
25
               And picking up on what you just said, do
          Q.
```

Page 75 you have any personal knowledge from your work at 1 2 the Secretary's office about that conversation, or 3 is everything you know only what you read in public news? 4 5 I, of course, was not on that phone call, and I am aware of that phone call through the news, 6 7 through reporting, for -- reading articles online, 8 watching the news. I have not had any conversations 9 with anybody within the office who -- who were 10 reported to have been on that phone call or engaged 11 in that phone call and asked them any questions 12 about what was it like to be on that phone call. So I -- I do not -- all I can speak to is what I've 13 14 heard in the news. 15 Okay. Were you aware of any efforts by anyone in the Secretary's office or at the 16 17 Secretary's office's direction or any county in 18 Georgia to try to find or generate votes for Trump 19 in that election? 20 Α. No, sir, I am not. 21 And is that also true for votes for Biden? Ο. 22 Yes, sir, that -- that is -- I am not 23 aware of any -- any -- any message, any directive, 24 anything from the Secretary of State's office out to 25 counties for them to do anything in relation to what

Page 76 was reported in that phone call. 1 2 Okay. Thank you. Q. 3 All right. Let's look at 1b, please. 4 We talked about this briefly before, but I 5 want to make sure I understand. This is "Any 6 efforts made to 'air-gap' any Components of Georgia's Current Election System, and the success 7 8 or failure of any such efforts." 9 The first question I have is the -- what you refer to as the air-gapped Election Management 10 11 server and the network that are part of the -- that 12 include certain computers, is that physically housed 13 at CES? 14 Α. It is. 15 So your group is responsible for securing that network; is that right? 16 17 Α. Secretary of State -- SOS IT is --18 oversees all of the infrastructure that's used by 19 our office. So we use the system that has been 20 provided to us by SOS IT. 21 Got it. Okav. Ο. 22 But you rely on the Secretary of State's 23 IT department to secure that system; is that right? 24 Α. That is correct.

And does that include physical security as

25

Q.

- 1 well?
- 2 A. The -- the server that -- that our
- 3 private-access computers are connected to is
- 4 physically located within the Center for Election
- 5 Systems inside a secured room that is under 24-hour
- 6 video surveillance. So it's -- it's in a secured
- 7 server room in a rack isolated from other devices.
- 8 Q. And what are all the devices that are
- 9 included in that room with the Dominion EMS server?
- 10 A. SOS IT could -- could tell you more about
- 11 what's all in that room. I don't even have direct
- 12 access into that room.
- But it -- you know, it's -- it's -- it
- 14 houses all of the connecting points for CES into the
- 15 SOS public system, as well as it -- it's a room that
- 16 houses the -- the -- the private network as well.
- 17 We have cabling in the center that's specifically
- 18 designed for the public systems and cabling that's
- 19 specifically designed for the private systems.
- Q. And when you say that it houses all the
- 21 connecting points for CES into the Secretary of
- 22 State public system and the private system, are you
- 23 talking -- this is inside I think what you said is a
- 24 locked room; is that right?
- A. Yes. It's inside our server room, yes.

- 1 Q. Okay. And have you personally been inside
- 2 that room?
- 3 A. Oh, I have, yes.
- 4 Q. But you said you don't have access to it,
- 5 someone has to give you access?
- 6 A. That is correct.
- 7 Q. Who has access to that room?
- 8 A. Our IT support person on-site has access
- 9 to that room. So if something is wrong inside the
- 10 server room, we have to get the IT support service
- 11 personnel to go and swipe his card key in order to
- 12 gain access to the room.
- 13 O. Who is that?
- 14 A. John Francis is the current member of the
- 15 IT staff that's housed at CES.
- Q. And so do I understand correctly you rely
- on Merritt Beaver's department, the Secretary's IT
- department, to ensure that there are no connections
- 19 between the public server system in that room and
- 20 what you call the private system?
- 21 A. Yes, sir.
- Q. And there was at least a period of time
- 23 when there was also a GEMS server that was set up in
- 24 that room after the Dominion system rolled out;
- 25 right?

- 1 A. Yes, sir.
- 2 Q. Do you know whether there were any
- 3 connections between those two servers or systems?
- 4 A. I am not aware of any connections between
- 5 the Dominion system server and the GEMS server.
- Q. Fair to say you rely on Mr. Beaver's
- 7 department to ensure that that was the case?
- 8 A. Yes, sir.
- 9 Q. Is there any remote access to the
- 10 private -- what you call the private server or
- 11 private network in that room?
- 12 A. No, sir.
- 13 Q. Let's just be clear we're talking about
- 14 the same thing.
- 15 There are -- I think you said before --
- 16 let me back up.
- 17 You said before that employees in CES, at
- 18 least some of them have two computers, one that's
- 19 their public-facing computer provided by the
- 20 Secretary's office and then there's a computer that
- 21 is on the private network; right?
- 22 A. Yes, sir.
- Q. And the computers that are on the private
- 24 network, are those hard-wired into that server?
- 25 A. Yes, sir, they are.

- 1 Q. And, again, you rely on Mr. Beaver's
- 2 department for that; is that right?
- 3 A. Yes, sir.
- Q. Do those computers have any Internet
- 5 capability?
- 6 A. They are directly connected in to the
- 7 private network. They are not plugged into any type
- 8 of outward-facing network line.
- 9 Q. Do they have Wi-Fi or Bluetooth
- 10 capability?
- 11 A. I do not know.
- 12 Q. All right. Is that a question you would
- 13 ask Mr. Beaver or his department?
- 14 A. I -- I would have to ask Mr. Beaver, his
- 15 department, if those boxes are enabled -- have the
- 16 ability to be enabled Wi-Fi or Bluetooth connection.
- 17 I am unaware.
- 18 O. Does the server itself that sits on the
- 19 private network, does it have any Internet
- 20 connections?
- 21 A. To my knowledge, it does not. But, again,
- 22 that is a question that would need to be asked of
- 23 the IT support team.
- Q. Does it have any Wi-Fi or Bluetooth or
- other remote capability, to your knowledge?

- 1 A. To my knowledge, I do not believe so.
- 2 But, again, you would need to follow up with that
- 3 question to the IT support team.
- 4 Q. Since the private network was set up, has
- 5 anyone from Dominion had access to it, such as for
- 6 support, tech support?
- 7 A. No, sir.
- 8 Q. Did Dominion set the private network up or
- 9 did the Secretary's office do that?
- 10 A. I believe the Secretary of State's office
- 11 worked with personnel from Dominion in setting up
- 12 the system; that Dominion was on -- on-site working
- 13 with SOS IT staff to make sure that SOS IT staff set
- 14 up the -- configured the system properly, that the
- 15 applications were installed in the right locations.
- 16 Q. We talked before the counties have their
- 17 own Dominion EMS server; right?
- 18 A. Yes, sir.
- 19 Q. Are they individually responsible for
- 20 maintaining the security of those servers?
- 21 A. Yes, sir.
- Q. Do you know whether county-level EMS
- 23 servers in the Dominion system have Internet
- 24 connections or capability?
- 25 A. Is there a network port on the back of the

- 1 computer? There is, but those computers are not
- 2 plugged into any type of outside network.
- 3 Q. And that, you rely on the counties to
- 4 maintain that; right?
- 5 A. Yes, sir.
- 6 Q. Has the State ever done a security
- 7 assessment where it has gone in and inspected a
- 8 random sampling of counties' Election Management
- 9 servers for security purposes?
- 10 A. What we have done, again, is any time that
- 11 we are present in a county elections office, we
- 12 always put our eyes on the Election Management
- 13 computer to verify when we are there in person that
- 14 the system is not public-facing in any way, shape,
- 15 or form.
- Q. When you say "we are there," who do you
- mean?
- 18 A. A member of CES. If we have reason to
- 19 visit a county elections office, whether we've been
- 20 asked by the elections office to come and test their
- 21 equipment, do an acceptance test on their server, or
- 22 if they've recently moved, changed location, we go
- 23 on-site, look at the equipment, and, again, always
- 24 verify that it is not connected. Any time that we
- 25 visit an elections office, we always look for that.

- 1 Q. But that's only if you happen to be there
- 2 for another purpose.
- 3 You -- you haven't done the sort of
- 4 security assessment that I've described; right?
- 5 A. That's correct.
- 6 O. Does -- does CES have direct access to
- 7 county-level EMS servers or do you have to get that
- 8 access from someone at the county?
- 9 A. Oh, we have to get that access from the
- 10 county. We don't just walk into a county elections
- 11 office and go to their Election Management computer.
- 12 We always go to the election supervisor and then
- 13 have them walk us to that location.
- 14 Counties are supposed to have logs for us
- 15 to sign to validate that we are there, that we're
- 16 there for a reason. We show our IDs. We don't have
- 17 unfettered access into the system. We -- we -- we
- 18 access the system how anyone else should, and that's
- 19 through the election supervisor.
- 20 Q. Does the State have written guidance or
- 21 requirements for how the counties maintain their
- 22 Election Management servers from a security --
- 23 A. There are -- excuse me.
- 24 There are SEB rules in place that govern
- 25 access to the Election Management System, and those

- 1 are the rules that county election officials are
- 2 supposed to be following.
- 3 Q. Are counties required to log the time and
- 4 individual or purpose for anyone who has access to
- 5 their EMS server?
- 6 A. I believe there is an SEB rule in place
- 7 that outlines that counties should be maintaining an
- 8 activity log.
- 9 Q. Does the State receive those logs or the
- 10 counties maintain those?
- 11 A. I believe those are just maintained and
- 12 held at the county. I do not believe that there's
- 13 any current practice in place for those logs to be
- 14 shared with the State periodically or with us.
- 15 Q. Does the Secretary maintain a similar log
- 16 for its own EMS server, its own private network?
- 17 A. In our facility, there is a -- there is a
- 18 checklist going in and out of the server room.
- 19 Thankfully, I don't have to go in there very often,
- 20 so I do not know how accurate that log is at this
- 21 moment in time. But I do know that it exists.
- Q. Who is responsible for maintaining that
- log now?
- 24 A. That is an IT operation.
- Q. And it's in hard copy?

- 1 A. Yes, sir. I remember seeing it on the
- 2 door day before yesterday.
- 3 Q. So it hangs on the door, and anyone who
- 4 goes in is supposed to sign that they went in and
- 5 the time?
- A. Yes, sir. And, again, it's under video
- 7 record, so it's -- it's documenting who's
- 8 been in and out of that room.
- 9 And we retain -- I believe the copy is
- 10 retained videoally [sic] -- on video, we can run it
- 11 back three days.
- 12 Q. All right. Take a look at Topic 1e.
- 13 A. Okay.
- Q. Are you aware of any failure of any
- 15 component of Georgia's Dominion election system to
- 16 correctly tabulate, tally, record, store, or
- 17 maintain any ballot cast in any 2020 election in
- 18 Georgia?
- 19 A. I am not.
- Q. Is that the same answer for any 2021
- 21 election in Georgia?
- 22 A. That is correct. I am not aware of any
- 23 circumstance of that nature.
- Q. Are you aware of any efforts taken by the
- 25 State, by the Secretary's office, to determine

Page 86 whether anything like this occurred in the 2020 or 1 2021 elections? 2 3 Again, the one thing I would point back to 4 is the exercise that took place postelection in 5 November '20, where Pro V&V was brought in and did 6 an inspection of equipment, random selection of BMDs 7 and ICPs, to validate that the applications running 8 on those devices were what was certified for use in 9 the state. 10 Is there anything else you had identified? Q. There is not. 11 Α. 12 All right. We covered 1f. Q. 13 Take a look at 2c, if you would, please. 14 MS. LaROSS: I think 2c --15 MR. CROSS: Oh, yeah. 16 MS. LaROSS: -- we've designated 17 Mr. Sterling. 18 MR. CROSS: Right. Right. 19 MS. LaROSS: Sorry about that. Let me 20 turn that off. 21 BY MR. CROSS: 22 All right. Take a look at 2d. Q. 23 So this is "Documentation - including 24 research, reports, assessments, findings, studies,

publications, memoranda, and communications -

25

Page 87 regarding the security, integrity, reliability, or 1 2 accuracy of any component of Georgia's Current 3 Election System." Are you aware of any such documentation 4 5 apart from the Pro V&V report and anything coming 6 out of logic and accuracy testing that you 7 identified? 8 No, sir, I am not aware of any other Α. 9 things. 10 Okay. All right. Take a look at Topic 7, Q. 11 please. 12 So at a high level, it's "Policies and practices for scanning and tabulating paper ballots 13 14 under Georgia's Current Election System," and then 15 there are three subtopics. 16 Do you see that? 17 Α. Yes, sir, I do. 18 Do I understand correctly that with the Q. 19 current Dominion system, what the system actually 20 tabulates for voting purposes when a -- when a BMD 21 printed ballot goes through the scanner is the QR 22 code? 23 That is correct. Α. Do you know why the decision was made 24 Q.

to -- to adopt that tabulation process, rather than

25

Page 88 to simply tabulate the human-readable portion of the 1 2 ballot? 3 MS. LaROSS: Object to the form of the question. 5 THE WITNESS: I do not know why Dominion chose to write their application in that 6 7 manner. No, sir, I do not know. BY MR. CROSS: 8 9 Well, I'm asking you a different question. Q. 10 Are you aware that the current BMD system 11 that you have in the State of Georgia can actually 12 tabulate the human-readable portion of the ballot rather than the QR code? 13 14 I am not aware of that. My understanding Α. 15 of the Dominion system is that it scans the QR code, and inside the QR code is a -- a set of coordinate 16 17 positions that relate to the candidate selected and 18 the contest to which that candidate is selected 19 within the ballot that is displayed in the 20 human-readable text below. 21 Ο. You're aware that the same Dominion system 22 also scans and tabulates hand-marked paper ballots 23 on an absentee basis at least; right? 24 Α. The hand-marked -- the hand-marked optical scan paper ballots, which are on a different format 25

Page 89 than the BMD ballot, is based upon a grid system. 1 2 The tack marks -- the timing marks that 3 you see around the optical scan ballot establish a 4 grid, and then the ovals that are present on the --5 on the optical scan ballot fall within particular grid points within that grid. 6 7 And when you fill in the oval, that grid area becomes darkened, and that becomes the point 8 9 that the scanner is interpreting for marking and 10 recording the result indicated from the voter. 11 Q. Right. 12 And is it -- are you not aware that the 13 current Dominion system, the equipment you have, can 14 do a similar thing with the hand -- with the 15 human-readable portion of BMD-generated ballots? 16 MS. LaROSS: Objection as to form. THE WITNESS: I believe that Dominion may 17 18 be building new applications that allow their 19 BMD ballots to generate a ballot from the 20 printer that looks similar, if not identical 21 to, a preprinted optical scan ballot. 22 BY MR. CROSS: 23 Did you have any involvement in the 24 decision-making by the Secretary's office to choose 25 the Dominion system in 2019?

- 1 A. I was not part of the evaluation
- 2 committee.
- 3 Q. Do you have any understanding or insight
- 4 into why the Secretary's office chose a QR code
- 5 system, rather than a non-QR code system, given that
- 6 there were non-QR code systems in the RFP process?
- 7 A. I was not a member of the evaluation
- 8 committee, so I did not have a say in what was --
- 9 what systems were valued higher or lower. So I
- 10 cannot speak to why that decision was made.
- 11 Q. But as the head of CES, you never -- never
- 12 had a conversation with anyone as to why they chose
- 13 a QR system?
- 14 A. In the evaluation process in 2019, I was a
- 15 subject matter expert; I was not a member of the
- 16 evaluation committee. I know that the evaluation
- 17 committee reviewed various systems. Some created a
- 18 bar code; some created a 2D bar code that was read
- 19 for scanning; others read and tabulated the optical
- 20 scan ballot.
- But the evaluation committee used the
- 22 protocols of the Georgia Department of
- 23 Administrative Services for procurement, and to my
- 24 knowledge, they followed that protocol and a
- 25 decision was made in the evaluation process.

Page 91 So you never talked to anyone in the 1 Q. 2 Secretary's office about why the decision was made 3 to choose a QR code system; is that right? Again, I point to the evaluation committee 5 made a determination upon the products that were 6 presented for evaluation. They rated those 7 products. There was also a cost proposal that was 8 involved, and all of those things were weighted and 9 a decision was made on what vendor was selected. 10 Q. Mr. Barnes, yes or no: Have you ever had 11 a conversation with anyone in the Secretary's office 12 about why a QR code system was selected in 2019? 13 MS. LaROSS: Object to the form of the 14 question. 15 The only conversation I can THE WITNESS: 16 say is I was a member of the Secretary of 17 State's office when a decision was made to go 18 with Dominion voting. Why they chose a QR 19 system over a non-QR system, I don't know the 20 answer to that question. 21 I just know that an evaluation committee 22 followed protocol, reviewed RFPs, reviewed bids 23 under the protocols of the State of Georgia for 24 procurement purposes, and this vendor was 25 selected.

Page 92 BY MR. CROSS: 1 2 Q. If you wanted to know who -- strike that. 3 If you wanted to know why the Secretary 4 chose a QR code system, who would you ask? 5 I would imagine you would have to ask the 6 Department of Administrative Services, because 7 they're the ones that put out the bid and they're 8 the ones that worked with the vendor in finalizing 9 the bid, along with members of the Secretary of 10 State. Perhaps Gabe Sterling would also be asked 11 that question. Well, wasn't it Secretary Raffensperger's 12 0. 13 decision as to what system was selected? 14 Again, I was not part of the evaluation Α. 15 committee. I was not privy to any of those discussions when they were taking place and the 16 17 negotiations between the vendors. I don't know 18 what -- what was said or when it was said or how it 19 was said or by whom it was said. 20 You still haven't answered my question. 0. 21 Have you personally had a conversation 22 with anyone in the Secretary's office about why a QR 23 code system was selected in 2019? Yes or no? 24 MS. LaROSS: I object to the form of the 25 question.

```
Page 93

               THE WITNESS: Again, in my role with the
2
          Secretary of State's office, it is our job to
3
          interact with the voting system. An evaluation
          committee was used to --
 5
     BY MR. CROSS:
 6
          Q.
               Mr. --
7
          Α.
               -- evaluate proposals.
               -- Barnes, you've got to answer my --
 8
          Q.
9
          Α.
               A voting system --
10
          Q.
               -- question.
11
          Α.
               -- was selected.
12
               That group determined that the system with
     a QR code was what was needed and what the State of
13
14
     Georgia should procure, and that's what the State of
15
     Georgia did.
16
               I have not asked a general question,
17
     "Well, why did we pick a QR system?" I have not
18
     asked that question.
19
               Okay. So just so we're clear, you have
20
     never asked anyone in the Secretary's office why a
21
     QR system was selected in 2019; is that right?
22
     that your testimony?
               MS. LaROSS: Object to the form of the
23
24
          question.
25
               THE WITNESS:
                             Yes.
```

Page 94 BY MR. CROSS: 1 2 Okay. Thank you. Q. 3 And you understand that voters cannot read a QR code when they -- if they inspect their ballot 5 before it's scanned in an election; right? 6 Α. Yes, sir. 7 And are you aware that the current Q. 8 Dominion system can be hacked or compromised in a 9 way that would change the QR code from what's 10 actually reflected in the human-readable portion of the ballot? 11 12 MS. LaROSS: Object to the form of the 13 question. 14 THE WITNESS: I am not. 15 BY MR. CROSS: You've never heard that before? 16 17 I have heard people say that I'm sure that 18 it could be, but I have not -- I have not seen it. 19 I have not seen it executed, so I -- I -- I 20 haven't -- I'm -- I'm not aware if it can be done. 21 So nobody told you that in September of 22 2020, Dr. Alex Halderman did a demonstration for the 23 Court with Dominion's voting equipment provided by 24 Fulton County where he printed ballots that had a 25 different QR code than what was indicated in the

Page 95 human-readable portion and what -- and from what had 1 2 actually been selected on the BMD? No one ever told 3 you that? MS. LaROSS: Objection as to form of the 5 question. 6 THE WITNESS: No, sir, they have not. 7 BY MR. CROSS: 8 As the head of CES, wouldn't you expect 9 somebody to tell you that? 10 MS. LaROSS: Objection to the form of the 11 question. 12 THE WITNESS: Yes. I am a member of the 13 Secretary of State's office and I am the 14 director for CES, but that doesn't mean I hear 15 everything that's said within the Secretary of 16 State's office. 17 BY MR. CROSS: 18 Q. Well, wouldn't you expect that if -- if an 19 expert had done an in-court demonstration where they 20 had hacked your voting system, that someone in the 21 Secretary's office would have alerted you to that, 22 as the head of CES? MS. LaROSS: Objection as to form of the 23 24 question. 25 I can just say that no one THE WITNESS:

Page 96 has brought that to me. 1 2 BY MR. CROSS: 3 Are you aware that Dr. Halderman prepared a report that was submitted to the Secretary's 4 5 office -- or to their counsel, I should say, on 6 July 1 of 2021, where he did a further inspection of 7 the Fulton County voting equipment? 8 MS. LaROSS: Objection to the form of the 9 question. 10 THE WITNESS: The only thing I'm aware of 11 is a report that was referenced in a news 12 article of a couple of weeks ago. But that is all the knowledge I have of that. 13 14 BY MR. CROSS: 15 So before that news article, you had not Q. 16 heard anything about this report from Dr. Halderman 17 regarding the Fulton County voting equipment? 18 Α. No, sir, I had not. 19 So no one in the Secretary's office ever 20 told you that a -- an expert had prepared a nearly 21 100-page report detailing numerous security 22 vulnerabilities in the voting equipment that you're 23 responsible for as the head of CES? 24 MS. LaROSS: Objection to form of the 25 question.

Page 97 THE WITNESS: No, sir, they had not. 1 2 BY MR. CROSS: 3 Do you have any insight into why the Q. decision was made at the Secretary's office not to 4 5 share anything about the fact that Dr. Halderman had 6 found these vulnerabilities with you, with David 7 Hamilton, with James Oliver, with Merritt Beaver? 8 Do you know why that is? 9 MS. LaROSS: Objection to the form of the 10 question. 11 THE WITNESS: No, sir, I do not. 12 BY MR. CROSS: 13 Does that strike you as odd? Q. 14 MS. LaROSS: I object to the form of the 15 question. 16 THE WITNESS: I'm sure that members of the 17 Secretary of State's office are doing the 18 things that they feel are necessary need to be 19 done. 20 BY MR. CROSS: 21 Who would you ask if you wanted to know 0. 22 why the decision was made not to share any 23 information, including that Dr. Halderman had found 24 vulnerabilities, with you and others in the office? 25 Who would you ask?

Page 98 My question would probably be asked of 1 Α. 2 general counsel. Mr. Germany? 3 Q. A. Yes, sir. 4 5 Would you expect the Secretary's office to 6 take measures to mitigate vulnerabilities that were 7 identified in the current voting system? 8 MS. LaROSS: Object to the form of the 9 question. 10 THE WITNESS: It's my expectation that the Secretary of State's office would do what it 11 12 needs to do to make sure that the voting system 13 is functioning properly. 14 BY MR. CROSS: 15 Properly and securely; right? Q. 16 Yes, sir. Α. 17 Q. And including taking measures to mitigate 18 any vulnerabilities that were identified with that 19 system; right? 20 MS. LaROSS: Objection to the form of the 21 question. 22 Again, I can't speak to what THE WITNESS: 23 may or may not be in the item that you're 24 discussing, so I -- I -- I don't know what the 25 State would need to do to address them.

Page 99 BY MR. CROSS: 1 2 Fair enough. Q. 3 You don't know the specifics, but you 4 would expect the State to take some measures to 5 mitigate vulnerabilities, whatever those measures 6 might be; right? MS. LaROSS: Objection to form of the 7 question. 8 9 THE WITNESS: I have confidence that the 10 State would continue doing its job as the --11 you know, we are the elections division for the 12 State. We're part of the elections division, 13 and I would -- I would have a belief that the 14 Secretary of State's office would continue 15 doing its due diligence. 16 BY MR. CROSS: 17 Q. Well, given none of the senior leadership 18 in the Secretary's IT department and you, as the 19 leader of CES, were informed about anything that 20 Dr. Halderman had found, including even that he had 21 found vulnerabilities at all, who is it you believe 22 in the Secretary's office is actually dealing with 23 those vulnerabilities, if anyone? 24 MS. LaROSS: Objection to form of the question. 25

Page 100 1 I do not know. THE WITNESS: 2 BY MR. CROSS: 3 Who would you ask if you wanted to know? Q. 4 Again, the people -- the person that I ask 5 the most questions of in our office is our general 6 counsel. 7 Q. Mr. Germany? 8 Yes, sir. Α. 9 As you sit here, though, you're not aware Q. 10 of any specific measures -- there are no measures 11 you can point me to that have been adopted since 12 July 1 of 2021 to address the vulnerabilities of Dr. Halderman's report; right? 13 14 MS. LaROSS: Object to the form of the 15 question. 16 THE WITNESS: That is correct. 17 BY MR. CROSS: 18 Q. And you can't point me to any measures 19 that have been adopted since September 2020 taken by 20 the Secretary's office to address the hack that he 21 demonstrated in that hearing; right? 22 MS. LaROSS: Object to the form of the 23 question. 24 THE WITNESS: I cannot. 25

- 1 BY MR. CROSS:
- 2 Q. Have you participated in any discussions
- 3 with anyone in the Secretary's office regarding
- 4 Dr. Halderman generally or his work?
- 5 A. No, sir, I -- I can't recall any direct
- 6 conversations with anybody in the Secretary of
- 7 State's office in relation to Dr. Halderman.
- 8 Q. Are you familiar with the name Dr. Juan
- 9 Gilbert.
- 10 A. I believe he is associated with the
- 11 University of Florida, or -- or was at some point in
- 12 time.
- 13 Q. And have you worked with him at all or had
- 14 any communications with him about his work in this
- 15 case? Just yes or no.
- 16 A. No.
- 17 Q. Are you aware that he has -- he was
- 18 retained and offered testimony on behalf of the
- 19 Secretary's office as an election security expert in
- 20 this case?
- 21 A. I am not aware.
- Q. Were you aware that Dr. Gilbert testified
- in his deposition that if he wanted to have a
- 24 cybersecurity assessment done of voting equipment
- 25 like that used in Georgia, he would turn to two

```
Page 102
    experts, Dr. Alex Halderman and Dr. Andrew Appel?
1
2
               MS. LaROSS: Object to the form of the
3
          question.
               THE WITNESS: I am not aware of what
 4
 5
          Dr. Gilbert may have said in his deposition.
 6
    BY MR. CROSS:
7
              Are you aware that Dr. Gilbert had access
          Q.
8
     to Dr. Halderman's full July 2021 report on the
9
    Fulton County voting equipment?
10
               No, sir, I am --
          Α.
11
               MS. LaROSS: Object to the form of the
12
         question.
13
               THE WITNESS: No, sir, I am not aware.
14
    BY MR. CROSS:
15
               Were you aware that Dr. Gilbert testified
16
    under oath that he did not disagree with any of the
    technical vulnerabilities identified in that report?
17
18
               MS. LaROSS: Object to the form of the
19
         question.
20
               THE WITNESS: No, sir, I'm not aware.
21
    BY MR. CROSS:
22
          Q. All right. Take a look at Topic 9,
23
    please, if you would.
24
         A. Sure.
25
          Q. Looking at Topic a, are you aware of any
```

- 1 suspected or actual unauthorized access to software
- 2 or data on any component of the -- of Georgia's
- 3 Dominion system?
- 4 A. No, sir, I'm not.
- 5 Q. Are you aware of any suspected or actual
- 6 unauthorized copying or alteration of software or
- 7 data on any component of Georgia's Dominion system?
- 8 A. No, sir, I'm not.
- 9 Q. Did you undertake any investigation or any
- 10 research in preparation for today to determine
- 11 whether that happened?
- 12 A. No, sir, I have not.
- 13 Q. Looking at Topic 9c -- I'm sorry, just
- 14 actually before we leave 9a, if you were to do some
- 15 research or some sort of investigation on 9a, who
- 16 would you ask? Who would you expect to know the
- 17 answer to that?
- 18 A. I really don't know where I would start
- 19 with that.
- 20 Q. Would the current elections director be a
- 21 good start?
- 22 A. I have discussions with him on a weekly
- 23 basis, if not more than weekly, about our voting
- 24 system. But any time that we feel like we would
- 25 need to start looking into something, he would be

- 1 something that I -- he would be whom I would talk
- 2 to, he and general counsel.
- 3 Q. All right. Looking at 9c, we -- we've
- 4 talked about some of this equipment already, but
- 5 just to close the loop, do any of the printers used
- 6 in the Dominion system have Internet capabilities,
- 7 whether by Wi-Fi, Bluetooth, or other means?
- 8 A. All of the printers in the voting system,
- 9 when they were bought off the shelf, I believe they
- 10 did have a -- a Wi-Fi or network capability, but
- 11 have since been placed into a secured setting
- 12 parameter that prohibits that connection from being
- 13 made.
- In addition, we place security seals over
- 15 the network port area on the back of the printers so
- 16 that a network connection can't be made without
- 17 detection.
- 18 Q. And the -- and the printers are HP
- 19 printers; is that right?
- 20 A. That is correct.
- Q. When you say "bought off the shelf," what
- do you mean?
- 23 A. Well, a lot of the equipment in the voting
- 24 system is COTS, commercial off-the-shelf, equipment,
- 25 and the printers are one of those items.

- 1 Q. And just so everybody is clear, when you
- 2 say commercial -- or COTS, commercial off-the-shelf,
- 3 what does that mean?
- 4 A. That's terminology for equipment that can
- 5 be obtained. It's a -- it's -- it's an -- I don't
- 6 know, you know, who came up with the terminology; it
- 7 is just common terminology in relation to when
- 8 you're procuring electronic equipment, is it
- 9 equipment that is built specifically for an action
- 10 or is it equipment that's commercially available.
- 12 So let's see if I have it. So, for
- 13 example, the Dominion BMDs you would not say are
- off-the-shelf because those are built specifically
- 15 by Dominion; is that right?
- A. It's not a tablet that is, I believe,
- 17 obtainable through other means. I think Dominion
- does work with a vendor to have that tablet built
- 19 for that purpose.
- 20 Q. Right.
- 21 But the printer is commercial
- off-the-shelf because it's generally commercially
- 23 available; is that the idea?
- 24 A. Yes, sir.
- Q. Okay. All right. Thanks.

Page 106 1 Take a look at Topic 10, please. 2 Are you aware of any instance in 2020 when 3 a person or entity other than an authorized election worker or Georgia State or county election official 4 5 obtained voting data from a Georgia election or 6 images of voting equipment used in a Georgia 7 election? I am not. 8 Α. 9 Q. Okay. Is that the same answer for 2021? 10 Yes, it is. Α. 11 And did you undertake any investigation or Q. 12 research or study to determine whether this happened before your deposition today? 13 14 I did not. Α. 15 Who would you ask if you wanted to know 16 whether this had occurred? 17 Α. In regards to investigations, we would --18 I would be asking general counsel or the head of the 19 Secretary of State's investigative unit. 20 Who is that today? 0. 21 I -- honestly, I do not know who the head Α. 22 of the investigative unit is today. 23 And it used to be Frances Watson? Q. 24 Α. It did. All right. Take a look at Topic 11, too, 25 Q.

Page 107 please. 1 2 Uh-huh. Α. 3 Are you aware of any changes to any of the Q. software or firmware used on any component of the --4 5 Georgia's Dominion system since September 1, 2020? 6 The only change that I am aware of since Α. 7 September 1, 2021 [sic], is we did have to update 8 the -- the application version on the BMDs. the ICX application. 9 10 When the BMDs were initially rolled out in 11 Georgia in late 2019, early 2020, the version was 12 ICX 5.5.10.30, and that application had to be 13 upgraded to 5.5.10.32 because of how the ballot 14 needed to be displayed to show all candidates for 15 the special election for United States Senate in 16 November of 2020. The previous version of the 17 application was unable to show all 21 candidates 18 that were qualified for that election on one screen, 19 but the upgrade to 5.5.10.32 allowed that race to 20 be -- and all of its candidates to be displayed on 21 one single screen so that the voter did not have to 22 scroll up or down in order to see all candidates. 23 And that software change was made in the Q. 24 September/October time frame of 2020; right? 25 It was. Α.

- 1 Q. Did you have any involvement in that
- 2 personally?
- 3 A. My involvement in that process was the
- 4 vendor brought forth a solution once the Secretary
- of State's office said that, you know, "We -- we've
- 6 got to work to improve how this ballot is -- how the
- 7 ballot image is being displayed." The vendor then
- 8 brought forth this new application.
- 9 That application was then submitted to
- 10 Pro V&V for two purposes. It was submitted to
- 11 Pro V&V in Huntsville, Alabama, for federal
- 12 certification and also for state certification.
- When Pro V&V finished their analysis of
- 14 the application, they submitted a letter to EAC, and
- 15 I believe the letter iterated that they felt like
- 16 this -- that the application, the new application,
- 17 should be approved as a de nimus [sic] change -- I
- 18 think I'm saying that right -- to the software's EAC
- 19 certification.
- Q. Did you have any involvement in the
- 21 decision that that software change was de minimus or
- 22 did you defer or rely on Pro V&V or others for that?
- 23 A. We relied on Pro V&V for that.
- Q. Were you aware that the Secretary of
- 25 State's office made a recommendation to Pro V&V that

- 1 they viewed it as a de minimis change?
- 2 A. I don't recall such, but I'm not
- 3 100 percent sure at this moment.
- 4 Q. If you wanted to know whether that
- 5 decision was made and who made it, who would you
- 6 ask?
- 7 A. I would probably have to go back through
- 8 my emails, because I would have been the individual
- 9 communicating with Pro V&V, but also with Dominion's
- 10 certification group as well.
- 11 And I -- I don't -- again, I don't recall
- 12 the Secretary of State making statement that it was
- 13 a de nimis [sic] -- that it was -- that that was
- 14 being a claim made from Dominion, because they were
- 15 attempting to become federally certified with that
- 16 application, and also it was being made from Pro V&V
- 17 as the testing agency.
- 18 Q. Okay. But that's not a decision you would
- 19 have made; right?
- 20 A. Correct.
- Q. All right. Take a look at Topic 18,
- 22 please.
- MS. LaROSS: Okay. This is a topic that
- 24 we've not designated him.
- MR. CROSS: Oh, is that right? Sorry.

```
Page 110
1
              MS. LaROSS: Yeah, that's okay. I think
         we did --
2
              MR. CROSS: Yeah. Yeah, I have the list.
3
         Yeah, sorry. I forgot about that.
 4
5
              MS. LaROSS: Yes. Okay.
6
    BY MR. CROSS:
7
         Q. All right. Let me pull up another exhibit
8
    here, Mr. Barnes.
9
              (Plaintiffs' Exhibit 3 was marked for
10
         identification.)
              MS. LaROSS: And then once he tells us
11
12
         it's up, then you just hit the "Refresh"
13
         button.
14
              MR. CROSS: Oh, you know what, I had
15
         actually already put it in. Sorry. Pull up
         Exhibit 2.
16
17
    BY MR. CROSS:
18
         Q. So Exhibit 2 is a copy of your LinkedIn
19
    profile we found online.
20
              You see that?
21
         A. It does look like that.
22
              In the -- is the "Education" information
         Q.
23
    here accurate?
24
         A. Yes, sir, that is accurate.
25
         Q. Okay. And the "Experience," it's got
```

```
Page 111
     "Center for Elections - Kennesaw State University,
1
2
     Director, June 2005 - present."
3
               Do you see that?
 4
          Α.
               Yes, sir.
 5
               The Kenne- -- the Kennesaw State
          0.
     University part doesn't apply since about 2018;
 6
7
     right?
               It does not apply as of January 1, 2018,
 8
9
     yes, sir.
10
               Okay. So you got your master's in 2002
          Q.
11
     and your current role you've had since June 2005.
12
               What did you do in that three-year gap?
13
               Let's see. In 2002, I was the assistant
          Α.
14
     director for elections for the Secretary of State's
15
     office, and served in that capacity until June of
16
     2005.
17
          0.
               So -- okay. So right out of your master's
18
     program, you joined the Center for Elections in
19
     Georgia; is that right?
20
                    I -- I completed my master's in 2002,
          Α.
21
     and then I remained with -- and I was actually
22
     working with the Secretary of State's office.
23
     started with the Secretary of State's office in 1998
24
     and then began my master's program while I was
25
     employed with the Secretary of State's office.
```

- In 2001, I transitioned to be the
- 2 assistant director of elections for the State of
- 3 Georgia and the Secretary of State's office while I
- 4 was in graduate school. I completed graduate school
- 5 in 2002, and then I remained with the Secretary of
- 6 State's office in the -- in the role as assistant
- 7 director of elections until June of 2005.
- 8 Q. What did you do at the Secretary of
- 9 State's office between 1998 and 2001?
- 10 A. From 1998 through 2001, I was a special
- 11 assistant to two Secretaries of State. I started
- 12 under Secretary of State Lewis Massey in August of
- 13 1998, served as a special assistant, and then I
- 14 served as a special assistant under Secretary of
- 15 State Cathy Cox from January 1999 until sometime in
- 16 2001.
- 17 Q. And were you employed between 1996, when
- 18 you got your bachelor's degree, and 1998, when you
- 19 started at the Secretary's office?
- 20 A. In 1997, I was employed by the Lewis
- 21 Massey campaign for governor that he -- when he ran
- for governor in 1997 and early 1998.
- Q. Do you have any other professional work
- 24 experience that we've not covered?
- 25 A. No, sir, I have not.

- 1 Q. When CES was still at KSU, were you an
- 2 employee of KSU or you were an employee of the
- 3 Secretary's office?
- 4 A. I was an employee of Kennesaw State
- 5 University.
- 6 Q. So when did you first become an employee
- 7 of KSU?
- 8 A. In June of 2005.
- 9 Q. So when you were an assistant director,
- 10 you were employed by the Secretary's office in CES?
- 11 A. When I was the -- when I went to work
- 12 in -- at Kennesaw State University, I was no longer
- 13 a member of the Secretary of State's office. I was
- 14 hired by Kennesaw State University and became a
- 15 full-time employee of Kennesaw State University as
- 16 the assistant director for the Center for Election
- 17 Systems in June of 2005.
- 18 Q. Okay. But maybe I missed something. I
- 19 thought you started working for CES before 2005.
- Is that -- am I wrong?
- 21 A. No, I did not start working for CES as a
- 22 member of Kennesaw State University until June of
- 23 2005. In my role as the assistant director of
- 24 elections in 2002, 2003, 2004, and in early 2005, I
- 25 worked with the Center for Election Systems, but

Page 114 through my capacity with the Secretary of State's 1 2 office. I was not at the Center for Election 3 Systems. I was still downtown at the Secretary of State's office, but I would spend some days at the 5 Center for Elections. I was sort of the liaison 6 between the Secretary of State's office and the 7 Center for Election Systems. 8 Okay. Got it. Q. 9 MR. CROSS: Sorry. I was going to pull up 10 another exhibit, but Exhibit Share just crashed. Give me a second. 11 12 All right. Here we go. 13 (Plaintiffs' Exhibit 4 was marked for 14 identification.) 15 BY MR. CROSS: 16 All right. Grab Exhibit 4, if you would, Q. 17 please. 18 Α. I'm refreshing right now and it hasn't 19 refreshed. 20 Okay. Yeah, give it -- it should pop up. Q. 21 A. You said Exhibit 4? 22 Yes. Q. 23 Α. Okay. 24 Q. All right. So do you see Exhibit 4 is an 25 email that you sent to Scott Tucker on January 15,

Page 115 2020; right? 1 2 Α. Yes, sir. 3 If you come down, the earliest email in the thread is one that Dedrick Smith at Dominion 5 sent to Scott Tucker on the same date. 6 Do you see that? 7 Α. Yes, sir. And he asks "I was wondering if" -- he 8 9 asks "I was wondering if you could ask the state if 10 there is a special usb they are supposed to be 11 sending out to the counties to submit their L&A 12 exports and the exports for election day. They have a usb that they normally send the export files on, 13 14 but they are old." 15 Do you see that? 16 Yes, sir. Α. 17 Q. And then you -- sorry -- Mr. Tucker 18 forwards this on to you and asks "...is the state 19 providing new USB drives for the counties to send 20 their L&A exports and E-Day exports to you...or 21 should they use the USB drive they had from the 22 previous system?" 23 Do you see that? 24 Α. Yes, sir. 25 And then you write back "They can use the Q.

Page 116 USB that the state has previously provided." 1 2 Do you see that? 3 Yes, sir. Α. 4 And so in January of 2020, when the 5 Dominion system was still being rolled out, do I 6 understand correctly that on at least this occasion, 7 your direction was for the counties to continue to 8 use the USB drives they had from the old system? 9 This was where I was referencing earlier Α. 10 this morning in relation to a election that popped 11 up on us in early January of 2020 to fill a vacancy 12 in a State house seat. 13 And I believe this, again, was for Decatur 14 County and their house -- the house district at the 15 time, where they were going to have to have an 16 election for a State race. And part of that process 17 requires the County to transfer -- export files into 18 the Secretary of State's ElectioNet reporting 19 So to facilitate that election, that was 20 the circumstances for this discussion. (Plaintiffs' Exhibit 5 was marked for 21 22 identification.) 23 BY MR. CROSS: 24 Q. All right. Grab Exhibit 5, please. 25 Refreshing. Α.

```
Page 117
1
               Okay. Exhibit 5?
2
               Yes. Let me know -- do you have that in
          Q.
     front of you?
3
 4
          Α.
               I do.
 5
               Okay. Do you see -- Exhibit 5 at the top
     is an email from Chris Harvey to Scott Tucker on
 6
7
     January 27, 2020; right? Do you see that?
 8
               Yes, sir.
          Α.
9
               And if you come down, you'll see the email
          Ο.
10
     in the middle of the page is one that you were
11
     copied on, also between Mr. Tucker and Mr. Harvey
     and also on January 27, 2020; right?
12
13
               I am looking. So I'm at the bottom of the
          Α.
14
     first page?
15
               Well, you're -- if you look at -- you can
16
     look at either. The middle or the bottom, you'll
17
     see you're on the email thread between Mr. Harvey
18
     and Mr. Tucker.
19
               Do you see yourself cc'd?
20
               I do.
          Α.
21
               And if you come down to the earliest
22
     email, there's an email from Nancy Gay, the
23
     executive director for the Columbia County Board of
24
    Elections.
25
               Do you see that?
```

Page 118 I do. 1 Α. 2 And if you look at the last paragraph of Q. 3 her email to Mr. Harvey, she asks "Can I have the 4 ICC (computer/scanner) setup in our main office and 5 then transport election tallies out to the warehouse 6 on election night once complete?" 7 Do you see that? I do. 8 Α. 9 And then Mr. Harvey forwards this on to Q. 10 Mr. Tucker and copies you, and he indicates that he 11 talked to Nancy about this. 12 Do you see that in the first sentence? I do. 13 Α. And then he writes "Does the central 14 Q. scanner have to be hooked up to EMS when scanning?" 15 Do you see that? 16 17 Α. Yes, sir. 18 Mr. Tucker responds "Yes, that is possible 19 to set the ICC up that way. You would need to copy 20 the data to an external drive and then upload into 21 RTR," which is the "Results Tally and Reporting." 22 Do you see that? 23 Α. I do. 24 Q. Are the central scanners hooked directly

to the EMS servers at the counties?

25

- 1 A. It is dependent upon the county's setup.
- 2 Most counties, the majority of counties -- small
- 3 counties that we have in Georgia, everything is
- 4 contained within the elections office, where the
- 5 Election Management computer is in one -- one corner
- of the office, perhaps, or one side of the desk, and
- 7 on the other side of the desk is the -- what we
- 8 classify as the ICC workstation, which is a computer
- 9 that is then connected to the central scanner. And
- 10 that ICC workstation, that computer, is directly
- 11 connected through a network connection with the
- 12 Election Management computer.
- And when ballots are scanned, ballots are
- 14 scanned on the ICC -- through the ICC scanner, image
- is saved to the ICC workstation as -- along with
- 16 tabulated results that the scanner has tabulated,
- and then those files are transmitted through the
- 18 network connection directly into the Election
- 19 Management computer.
- 20 (Plaintiffs' Exhibit 6 was marked for
- 21 identification.)
- 22 BY MR. CROSS:
- Q. All right. Grab Exhibit 6, please.
- 24 A. Okay.
- Q. All right. So if you look at Exhibit 6,

```
Page 120
     do you see there's an email from Marjorie Howard to
 1
     you on February 26, 2020?
 2
 3
               Yes, sir.
          Α.
              Do you know who Marjorie Howard is?
          Q.
               She was the election supervisor for Talbot
 5
          Α.
 6
     County.
 7
          Q.
              And she -- the subject line of her email
     indicates an
 8
        right?
 9
10
               That's what the subject line says, yes,
          Α.
11
     sir.
12
          Q. And " is shorthand for logic and
13
     accuracy testing; right?
14
          A. Yes, sir.
15
              And if you read her email, she writes "
16
17
18
19
20
21
22
23
               Do you see that?
24
          Α.
               I do.
25
               Then she goes on
          Q.
```

```
Page 121
1
 2
 3
 4
               Do you see that?
 5
          Α.
               I do.
               Do you remember this situation?
          Q.
7
          Α.
               I do not.
 8
               When she says that there was --
          Q.
9
                                      , do you know what
     she's referring to?
10
11
               I would be speculating with an answer to
12
     that question right now. I just -- I don't recall
     this situation. Clearly, I was involved with it, I
13
14
     see my name in the email exchange, but I don't --
15
     I'm trying to piece it back from memory of what we
16
     were discussing at the time.
17
          Q.
               When she's talking about "
18
     there, do you know what -- what she means? What's
19
     the -- what coding is there in this context with
20
     the -- the ballots?
               What my -- what I am thinking that she is
21
          Α.
22
     referencing here is relating back to the data set
23
     that has to be loaded onto a polling pad in order
24
     for it to function properly.
25
               So a data file has to be built prior to
```

- 1 logic and accuracy testing that allows the Poll Pad
- 2 to create voter access cards for given polling
- 3 locations so that it can create the voter access
- 4 card, then be placed inside a BMD device to validate
- 5 that the proper ballot is displayed, and then the
- 6 county goes through the process of testing the BMD
- 7 to make sure that it's responsive to the actions of
- 8 the voter.
- 9 So in reference to this email, I'm trying
- 10 to figure out are we talking about a logic and
- 11 accuracy data set that had not been properly
- 12 configured where it had everything that it needed in
- 13 it or not, or if this was a scenario where she had a
- 14 logic and accuracy data set on a polling pad when it
- 15 was supposed to have an election day data set on the
- 16 polling pad.
- So I'm -- I'm uncertain of -- of
- 18 the circumstances surrounding on this right now.
- 19 Q. What's the difference between a logic and
- 20 accuracy data set and a election day data set for
- 21 the polling pad?
- 22 A. The main difference is the presence of
- 23 voter information, is that the -- the polling plaid
- 24 [sic] -- the polling pad data set for logic and
- 25 accuracy does not contain voters. It contains a

- 1 list of precinct and district combos per precinct
- 2 that are related to activation codes that are placed
- 3 onto a voter access card that a BMD device didn't
- 4 recognize as -- so it displays the proper ballot.
- 5 Q. And getting back to the email, do I
- 6 understand right that in the database files that go
- 7 to the counties for elections, there's executable
- 8 code that's used, at least in part, to generate the
- 9 cards that they need on election day?
- 10 A. Ask that question again.
- 11 Q. Yeah.
- Do I understand correctly that in the
- 13 database files that go to counties for elections,
- 14 that those files include some executable code that's
- 15 used to create the cards that are used on election
- 16 days, like the voter cards, the poll worker cards?
- 17 A. Are we talking about the ExpressPoll data
- 18 set or are we talking about the election project
- 19 data set? Which -- which database are you
- 20 referring?
- 21 Q. The database that -- the election project
- 22 that goes to the -- the BMDs.
- 23 A. The election project file has a list
- 24 contained within the election project file -- has a
- 25 list of activation codes. And what these are are

Page 124 a -- a numeric code that is used to activate a 1 2 ballot display on the BMD. 3 And in every election database, there is a 4 precinct, and then inside the precinct there is a --5 what's called a precinct portion, and that is, like, their district combo number. And that precinct 6 7 portion is related to a specific set of political 8 districts, and by relation to those political 9 districts, it is connected to any contests that are 10 in those political districts. And that's what 11 relates it to the physical ballot that's needed. 12 So every precinct portion in the database has a specific ballot activation code that when you 13 14 enter that ballot activation code on the BMD, it 15 displays that ballot. When the ballot is voted, then the BMD ballot that's printed out contains that 16 17 precinct portion designation so that when the ballot 18 is scanned, the results from that ballot are applied 19 back to that particular precinct portion within the 20 project file. 21 Okay. And -- and I was asking something 22 different. 23 Are you familiar with the term "executable code"? 24 25 Yes, I'm -- I'm familiar with executable Α.

- 1 code, but I was just answering the question that you
- 2 asked in the best way that I could.
- 3 Q. Right. And I just wanted to make sure we
- 4 weren't missing each other.
- 5 So you were talking about activation
- 6 codes, but do you understand executable code is
- 7 different? I'm asking about something different
- 8 than activation codes.
- 9 A. Yes, yes.
- 10 Q. So the question I'm trying to understand
- 11 is in the database files, the election project files
- 12 that go to the counties, that get uploaded to the
- county EMS and the BMDs, do you know whether they
- 14 include executable code?
- 15 A. I do not believe they include any
- 16 executable code. The executable code is already
- installed on the Election Management computers that
- 18 are at the county office; that -- the only thing
- 19 that is distributed to the county from the Secretary
- 20 of State's office is an election project file.
- 21 And then that file is loaded into the
- 22 Election Management computer by using an executable
- 23 application, and that application resides on the
- 24 computer at the elections -- at the election office.
- 25 Q. If you wanted to know for sure whether the

```
Page 126
     election project files include any executable code,
1
2
     would that be a question for someone in IT?
               That would be a question for someone in
3
          Α.
     Dominion, I believe.
5
          O. Got it.
 6
               All right. Grab Exhibit 7, if you would,
7
    please.
8
               (Plaintiffs' Exhibit 7 was marked for
9
          identification.)
10
               THE WITNESS: All right. Exhibit 7.
    BY MR. CROSS:
11
12
          0.
               So Exhibit 7, do you see -- this is an
    email that you sent to Samantha Sheldon on
13
14
     February 26, 2020; right?
15
          A. It is.
16
          Q. And you were responding -- well, actually,
17
    strike that.
18
               You were forwarding to her an email from
19
     Susan Gray at Jefferson County.
20
               Do you see that?
21
          A. Yes.
22
              And Ms. Gray indicates to you on
23
     February 26, 2020, "
24
25
```

```
Page 127
1
 2
 3
               Do you see that?
          Α.
               I do.
 5
               Do you remember this situation?
          Ο.
               Not directly. I mean, clearly I was
 6
          Α.
7
     involved with it because it has my email address to
     it, but I don't remember this specific conversation,
9
     no, sir.
10
               Is it unusual for an election worker to
          Ο.
     take off BMWs' -- BMD serial number seals?
11
12
               It is not unusual for an elections
          Α.
     officer, election official, to remove seals from the
13
14
            It is unusual for them to remove a seal that
     BMDs.
15
     would be on the left-hand side of the BMD.
16
               The left-hand -- the seals that are placed
17
     on the BMD -- and there are two -- were placed by
18
     CES, by the Secretary of State's office, during the
19
     initial acceptance testing of the devices, and there
20
     are two seals. There's a -- there's a taped seal
21
     that is over an access panel that is -- that is
22
     resistant evident, and then there's also a wire seal
23
     that you would have to physically break in order to
24
     remove.
25
               Now, the -- the doors on the right-hand
```

- 1 side of the BMD are seals that poll workers are
- 2 removing from election to election. They're used to
- 3 close the compartment preelection; they're used to
- 4 open and -- open -- be removed in order to power the
- 5 machine on, and then seal's replaced, attached, and
- 6 then they stay in place on election day and then
- 7 they're removed at the end of election day to power
- 8 the machine off and then new seals placed on for --
- 9 for delivery back to the Elections office.
- But the seals on the left-hand side of the
- 11 unit, those have been placed there by the Secretary
- 12 of State's office.
- 13 Q. Okay. What -- what's the difference
- 14 physically between the seals on the left-hand side
- and the ones on the right-hand side?
- 16 A. The difference between -- when you say
- "difference physically," what do you mean?
- 18 Q. Are they -- is it a different design? Do
- 19 they look differently? Do they function
- 20 differently? How are they physically different?
- 21 A. They are a different design. They are a
- 22 wire seal. The ones -- a wire seal that sort of has
- 23 a twist of the wire to secure the wire.
- And then the second seal that's placed on
- 25 is a -- is a -- again, is a tamper-evident tape seal

Page 129 that has a State of Georgia seal on it. It has --

- 2 it has -- it says that it's a -- and it's -- it is
- 3 an acceptance testing sticker and then it has a
- 4 numeric code value on it.
- 5 And it's sort of twofold, is that if by
- 6 some chance the wire seal that the State has
- 7 attached to that door became damaged or
- 8 inadvertently removed, then we also have that
- 9 secondary seal there that if someone then attempted
- 10 to open that compartment, we would see that through
- 11 the tamper-resistant tape being removed and it
- 12 would -- it would actually leave tape on the side of
- 13 the device.

1

- So we have two -- two areas to see to what
- 15 level of extent someone may have been interfering
- 16 with that side compartment if they had been working
- 17 with that sealed area.
- 18 O. Are the wire seals on the left side?
- 19 A. The wire seal is on the top left side,
- 20 along with the tamper-evident tape.
- 21 And then on the right side, counties may
- 22 choose to use a wire seal or they may use a plastic
- 23 seal.
- Q. The seals on the left side, you said
- 25 they're -- are they on -- is it a wire, you said,

```
Page 130
     that's twisted together? Is it twisted together by
1
     hand? What do you mean?
2
3
               The seal itself, you feed the wire through
          Α.
     and then there is sort of a twist mechanism in the
5
     seal itself that you twist to lock the wire into the
     seal.
7
          Q.
              And how is that seal removed? What's the
8
    process?
9
               It has -- it has to be cut to be removed.
          Α.
10
               So looking back at Exhibit 7, the BMD --
          Q.
11
     the BMD -- I just can't say that today. Let me try
12
     this again.
13
               Looking back at Exhibit 7,
14
15
16
17
18
          Α.
19
20
          Q.
21
22
23
          Α.
24
25
```

Page 131 1 2 3 5 Ο. The seals on the left side, these wire seals, does each one have a unique serial number? 6 7 Α. They do. And does your office maintain an inventory 8 9 of every seal that it puts on a machine? 10 When we were in the phase of doing the Α. 11 acceptance testing of the equipment in 2019 and 12 early '20, when we would assign seals to the devices, we would make record of the seals that were 13 14 attached. So those were put into the inventory 15 system at the time of acceptance testing. 16 And you're talking acceptance testing when 17 the equipment first came in for Dominion to be 18 rolled out as the new election system? 19 Α. Yes, sir. 20 Would the standard county have any reason Q. 21 to remove those seals since that acceptance testing 22 in the ordinary course? 23 The only reason that there would be need Α. 24 to remove that seal on the left-hand side was if 25 they needed to plug in a -- a headset that's used in

- 1 order to access the audio ballot for visually
- 2 impaired voters. Where you would plug in that
- 3 device is in -- is behind that door in the top
- 4 left-hand side.
- 5 Q. Is that sometimes referred to as an ATI?
- 6 A. It is.
- 7 Q. And so if they're using a BMD for a voter
- 8 that needs an ATI, they would have to cut that seal
- 9 to get access to the panel; is that right?
- 10 A. Well, what we did in the distribution of
- 11 equipment at the time is we actually went ahead and
- 12 preconnected ATI devices to some BMD units so that
- 13 they were already connected, and then the door was
- 14 then -- even then sealed with those two seals that
- 15 I've spoken of.
- 16 But if that ATI device has now become
- 17 unoperative [sic] and it had to be replaced, then
- 18 the county would need to gain access to that slot in
- 19 order to unplug and plug in a new one.
- 20 Q. So the BMD can be sealed with both of
- 21 those two seals on the left side and still have an
- 22 ATI connected to it; right?
- 23 A. That is correct.
- Q. So here, when Ms. Gray indicated that

25

```
Page 133
1
     and she said,
                                                     , you
2
     wrote back to her "
3
     sorry, you forwarded this on to Samantha Sheldon and
     wrote "
 5
 6
               Do you see that?
7
          Α.
               I do.
               And do you recall, did you have any
 8
9
     response to Ms. Barn- -- or, sorry, to Ms. Gray
10
     about this?
               I don't have direct recollection of
11
12
     conversation with her. What I hope I've told her
13
     was that, A, "Okay, what has happened? Tell me
14
     what's happened." And I probably asked her the
15
     question of, "Okay, what is the status of the tape
16
     that is also in place? Has -- is there any evidence
17
     of that tape being removed or cut or anything of
18
     that nature?"
19
               And the fact that
20
                                 -- where a wire seal
21
     would be placed leads me to indicate that there was
22
     no evidence that the tamper-resistant tape had been
23
     removed or been cut or anything of that nature.
24
     Because if that had been the case, then we would
25
     have sent someone directly to the county and would
```

Page 134 have done a new acceptance test on these devices and 1 2 then attached new -- new tamper-resistant tape seals and additional wire seals. 3 Q. She doesn't indicate 5 ; right? 6 Α. Based on this one, that is correct. 7 And you don't have a memory of actually Q. speaking with her, do you? 8 9 I -- I don't have direct memory of having 10 a conversation with her on this fact. 11 Q. So do I understand correctly that when she 12 indicates 13 14 15 Yes, sir. Α. 16 Where -- so do counties have access 17 themselves to the -- to the wire seals that the 18 Secretary's office puts on the left side of the 19 machines? 20 They have access to wire seals. They 21 don't have direct access to these wire seals that we 22 placed on the devices ourselves. 23 So we can tell the difference between the 24 wire seal that SOS office placed on a device versus 25 a wire seal that a local county may have placed

Page 135 1 there. 2 And then why did you ask Ms. Sheldon Q. 3 4 5 Well, we wanted to make sure and have a record in the system that the seal number had been 6 changed, that it had been changed from a previous 7 8 seal number that was attached. 9 And what is EasyVote? 0. 10 EasyVote is an application that the 11 Secretary of State uses for maintaining the list of 12 equipment inventory. 13 Ο. Is that hosted by a third party, like a 14 vendor? I believe it is, yes, but I'm not 15 Α. 16 100 percent certain. 17 Q. Do you know what the company is called? 18 Α. The company is called EasyVote. 19 Ah, okay. Q. 20 What -- what is -- can you just give me an 21 overview of what the information is that sits in 22 EasyVote? 23 It is an outline of what equipment has 24 been -- it's what equipment is in the state of 25 Georgia and where it is, where it is currently.

Page 136 1 So it gives you a list of BMD serial 2 numbers, seals that were attached at the time of 3 acceptance testing. It also indicates when it was last acceptance tested. 5 Counties also have access into this 6 inventory system, and some counties use it to 7 document local logic and accuracy testing that's 8 been performed on the equipment prior to various elections. 9 10 Any time seals are broken or changed, is 11 that indicated in the EasyVote database, too? 12 It has the ability of maintaining, I believe, a history of seal numbers, but I would have 13 14 to double check. 15 So, for example, here, 16 17 18 19 20 21 I believe it maintains a record of change Α. 22 of when it was changed and what was changed, but, 23 again, I'd have to double check. 24 Q. Does the EasyVote system interact at all 25 with any other election systems, like eNet, EMS

Page 137 servers, voter registration, ENR, anything like 1 2 that? 3 No, sir, it does not. Α. Does it interact with Poll Pads? 4 0. 5 It does not, not this -- not this application that we use from EasyVote. 6 EasyVote has other applications that they 7 8 use with counties. EasyVote is used in some 9 counties for preparing absentee ballot applications. 10 When people go in to vote via in-person 11 advance voting, EasyVote -- the county contracts 12 with EasyVote for this application and the county provides EasyVote a list of voters that are 13 14 registered to vote in that county. 15 And then the county uses EasyVote to 16 basically check voters in -- check voters in during 17 advance voting and to prepopulate their absentee 18 ballot application for the voter to then sign and 19 then provide back to the county before being gained 20 access to the voting equipment. 21 And what's the equipment that they use? Ο. 22 The counties that use EasyVote, what is -- what's 23 the equipment they use for that process? Is it a 24 computer or a tablet or...

A. That's -- that's county-owned computer

Page 138 that they access EasyVote on. I don't know what 1 2 devices they use, whether they use a -- a desktop 3 computer or a laptop to access. I do not know. The counties that don't do that process by 4 5 EasyVote, how do they do that process? 6 When they are interacting with -- when Α. they are managing voters during advance voting, then 7 8 if they're not using EasyVote, then they're using 9 the Secretary of State's eNet system to manage voters, to check voters in, to -- to mark them as 10 11 participating in advance voting. 12 And then second and apart from that, even 13 if they were using EasyVote, they would use a Poll 14 Pad to create the voter access card that would be 15 given to the voter. 16 Okay. Before we leave Exhibit 7, are you 17 aware of any investigation or assessment that was 18 done to make sure that 19 20 I -- I -- I do not remember or recall. 21 Okay. All right. Grab Exhibit 8, if you 0. 22 would, please. 23 (Plaintiffs' Exhibit 8 WAS marked for 24 identification.) 25 THE WITNESS: Okay.

```
Page 139
1
    BY MR. CROSS:
2
               All right. So do you see here similar
          Q.
     email to the one we just saw, but different county.
3
               Here, the first email in the thread is an
 4
5
     email that you received from Denise Maddox in Grady
6
     County on February 27, 2020; right?
7
          Α.
               Yes, sir.
               And the subject is "
8
                                               "; right?
          Q.
9
              Yes, sir.
          Α.
10
          Q. And Ms. Maddox writes "
11
12
13
14
15
               Do you see that?
16
               Yes, sir.
          Α.
17
          Q.
               So this is a situation we talked about a
18
    moment ago where
19
20
21
22
               Yes, sir, that's what this appears to be.
          Α.
23
               Okay. And then you write -- you forward
          Q.
     this again to Ms. Sheldon --
24
25
```

- 1 Do you see that?
- 2 A. I do.
- 3 Q. And do you make it a practice or does
- 4 CEA -- CES make it a practice to hold on to
- 5 notifications from counties whenever seals are
- 6 broken or removed or tampered with?
- 7 A. We make it a practice to basically hold on
- 8 to anything we receive from a county. We try to
- 9 hold on to emails. We try to hold on to, you know,
- 10 any type of notification from a county in pertation
- 11 [sic] to their equipment and to -- in relation to
- 12 seals themselves.
- Q. Where are those communications typically
- 14 maintained at CES?
- 15 A. They're maintained electronically on the
- 16 computers of the workers at our office.
- 17 Q. Is there like a -- a network or a server
- 18 folder or someplace? Where do you -- where do you
- 19 tend to keep those, store those so that you have
- 20 them?
- 21 A. We tend to keep them within our email
- 22 environment, basically leave the email intact, leave
- 23 the attachment to the email, and leave the emails in
- 24 place.
- Q. Okay. So when you wrote to Michelle,

```
Page 141
1
     then, "
2
     do you mean the two of you just keep it in your
3
     inbox, it doesn't go into a particular folder
     somewhere or a file?
 5
               Right. We're just keep -- we're just
     keeping this record, keeping it in the inbox.
 6
               Okay. And do you know whether there was
7
          Q.
     any examination done
 8
9
10
          Α.
               Again, I do not recall.
11
               If you had called for a BMD to be examined
          Q.
12
     because you were concerned that there may have been
     some sort of tampering or you just wanted to confirm
13
14
     that there wasn't, that's the kind of thing you
     would probably recall asking for; right?
15
16
               I -- yes, sir, I would hope. Because I
17
     have sent members of my staff to counties in some of
18
     these circumstances where the seal was broken and
19
     there looked to be something not right with the tape
20
     that was also in place. So out of abundance of
21
     caution, I would send them to the site, tell the
22
     county to set that unit aside, and we would test it
23
     when we would be there on-site. So I -- I have
24
     sent -- I have sent people in the field in the past
25
     and will continue to do so.
```

- 1 O. Tell me about those instances.
- 2 A. Instances, again, similar to these, where
- 3 the -- the seal had been broken, but no one could
- 4 explain why it had been broken, why -- why did it
- 5 come back in that nature, why was it in that nature,
- 6 and there looked to be some damage to that second
- 7 seal that we would have to damage in order to open
- 8 that side compartment. When we have those
- 9 instances, we go and we do an acceptance test of
- 10 that device to make sure that nothing has happened.
- 11 Q. About how often has that happened in the
- 12 last, say, couple of years?
- 13 A. I would say less than ten times.
- 14 Q. And do you remember the counties that were
- 15 involved?
- 16 A. I do not.
- 17 Q. Who do you send out to do the -- to
- inspect the equipment in those instances?
- 19 A. In those instances, the person that I send
- 20 is Chris Bellew. He is my equipment specialist
- 21 at -- at CES.
- 22 Q. How do you spell his last name?
- 23 A. B-e-1-1-e-w.
- Q. And does he have IT training?
- 25 A. He -- he has been with our center since

- 1 2018. He has his master's degree from Georgia Tech.
- 2 I can't -- I don't remember exactly what his
- 3 specialty is.
- 4 He is a graduate -- undergraduate of
- 5 Kennesaw State University, and he actually worked at
- 6 the Center for Election Systems as a student
- 7 assistant in 2010 and 2011, I believe.
- 8 Q. Okay. But he's not -- he doesn't -- he's
- 9 not an IT guy, right, like in Merritt Beaver's
- 10 department; right?
- 11 A. Right, he is not. He is not. He is -- he
- is what we deem as our election equipment
- 13 specialist. He knows a lot about the applications
- 14 that we use on the -- within the voting system.
- 15 Q. And when you send him out in the instances
- 16 you talked about, what does he do? What do you
- 17 expect him to do to validate the equipment?
- 18 A. Oh, I expect him to run -- to basically
- 19 inspect the -- the area to see if he sees anything
- 20 that's out of -- out of sorts.
- 21 And then he's going to do an acceptance
- 22 test of the -- of the equipment, whether it's a BMD,
- 23 whether it's an ICP, whether it's the ICC, the
- 24 election server, whatever it may be, and validate
- 25 that the system is operating as it should and that

- 1 it only contains the applications that it should.
- 2 Q. Does he do logic and accuracy testing?
- 3 A. He does not do logic and accuracy testing.
- 4 That is a count- -- that is a county test.
- 5 Q. And I assume --
- 6 A. The acceptance -- the acceptance test has
- 7 portions of the logic and accuracy test within it.
- 8 Q. The acceptance testing that -- that you
- 9 do -- that you did when the machines came in, you
- 10 mean?
- 11 A. Right. The acceptance testing isn't --
- 12 isn't just logic and accuracy testing; it's checking
- 13 application install and such of that nature. But it
- 14 also incorporates portions of a logic and accuracy
- 15 test similar to what a county would perform when
- 16 preparing for an election.
- 17 Q. But are you saying when Mr. Bellew goes
- 18 out in these instances where there's a concern about
- 19 access to the BMD or whatever the voting equipment
- 20 might be, you -- he's doing acceptance testing all
- 21 over again on that equipment?
- 22 A. Yeah, he performs an acceptance -- any
- 23 time we have a question about a piece of voting
- 24 equipment, we perform a new acceptance test on that
- 25 piece of equipment.

- 1 Q. Okay. And you're saying logic and
- 2 accuracy is part of that?
- 3 A. Part of the acceptance test, part of the
- 4 acceptance protocol, is a -- is a logic and accuracy
- 5 process where we will load an election file onto the
- 6 BMD, we will generate a number of ballots from the
- 7 BMD, and then we will scan those ballots into an ICP
- 8 to validate that the BMD not only produces a ballot
- 9 as it should, but that that ballot, when paired with
- 10 a scanner, is processed properly.
- 11 Q. When Mr. Bellew goes out on these
- 12 occasions, does he do the hash value test that you
- 13 talked about before?
- 14 A. He does.
- 15 O. So he's able to do the hash value test
- 16 without the help of Pro V&V or IT?
- 17 A. He is.
- 18 Q. Is there any other testing that he does on
- 19 the equipment on those occasions?
- 20 A. There is not.
- 21 Q. In any of the instances where he's been
- 22 out, have you taken any of the equipment out of use?
- 23 A. I do not recall any equipment being taken
- 24 out of use on the trips that he has executed out
- 25 into the field.

Page 146 1 I know that we have had repaired equipment 2 come back from Dominion to our facility, and then we 3 go through testing and they may not have completely 4 finished repairing the unit, they were supposed to 5 finish -- fix a cracked screen and they didn't fix a 6 cracked screen and we would have to send it back for 7 repair. 8 But has he ran into a situation that 9 required him to take possession or return or have 10 the county -- return the equipment to the county? 11 cannot think of one. 12 Are there seals on the USB ports on the 13 equipment, the printers, the scanners, and the --14 the BMDs? 15 Α. There are seals attached on the left-hand 16 side, again, that were attached by the State. 17 are seals placed on the two -- two openable doors on 18 the right-hand side of the BMD. Those seals are 19 attached locally by the county at the end of logic 20 and accuracy testing. 21 And also, after opening the polls on 22 election day, they have to reseal the unit, and then 23 at the end of election day, they have to break a 24 seal to power the machine off, and then they put a 25 seal back on it for transport to the elections

- 1 office.
- 2 So seals on the right-hand side that cover
- 3 any available ports, they're placed there and
- 4 maintained by the county.
- 5 Q. Okay. I was asking a more precise
- 6 question.
- 7 Do you know whether any of the seals that
- 8 are placed by the State or the counties on any of
- 9 the voting equipment covers all of the BMD ports?
- 10 A. All of the doors that give you access to
- 11 the ports are closed and sealed.
- 12 Q. And are those State seals or county seals
- 13 that cover those doors, or is it --
- 14 A. On -- on the left-hand side, it is a State
- 15 seal. On the right-hand side, it is county seals.
- 16 Q. So where there are USB ports on the
- 17 right-hand side, those would be county seals?
- 18 A. That is correct.
- 19 O. We talked -- we talked a lot about the
- 20 State seals, the wire seal.
- 21 What does the county seal look like?
- 22 A. It, too, could be a wire seal, but it's a
- 23 wire seal that goes through like a little red brick
- 24 that is then pressed and locked by pressing in.
- The other seals that counties use is more

- 1 like a wraparound plastic seal that, basically, it
- 2 feeds through and the teeth grab it. And then you
- 3 can't pull the seal back out, it has to be cut and
- 4 removed.
- 5 Some counties use like a -- like a -- it's
- 6 almost like a loop seal. It's a little plastic loop
- 7 seal. They use those primarily, I think, on their
- 8 optical scan units. But it could -- there's a
- 9 litany of various seals that counties opt to choose
- 10 to use.
- 11 Q. Where do they get their seals?
- 12 A. They're -- they get seals from the
- 13 Secretary of State's office. The Secretary of
- 14 State's office maintains a set of different type
- 15 seals, and then they can request those seals as part
- 16 of their election supplies.
- 17 Q. Does the State have any security
- 18 requirements on how seals are to be maintained when
- 19 they're not on the equipment, meaning seals they
- 20 have to replace for purposes at the county level?
- 21 A. I -- I -- I do not know.
- Q. All right. Grab one more exhibit and then
- 23 we can take a break. This should be short.
- Grab Exhibit 9, if you would, please.
- 25 (Plaintiffs' Exhibit 9 was marked for

```
Page 149
          identification.)
1
               THE WITNESS: Okay.
2
     BY MR. CROSS:
3
               So if you look at Exhibit 9, it's a
 4
 5
     two-page document. If you come to the bottom of the
 6
     first page, do you see there's an email from
7
     Jennifer Phipps?
 8
          Α.
               I do.
9
              And that is sent to
          Q.
10
     ElectionCenter@sos.ga.gov on May 11, 2020.
11
               Do you see that?
12
          Α.
               I do.
13
               And then if you come up, there's an email
          Q.
14
     forwarded on from that Election Center address to
15
     Cathi Smothers at Dominion copying you.
16
          Α.
              Uh-huh.
17
          Q. Yes? Do you see that?
18
          Α.
               I do.
19
               And that looks to be sent -- if you look
20
     at the signature block, the email from Election
21
     Center looks like it was actually sent by Chris
22
     Bellew, who you were just talking about; right?
23
               Correct.
          Α.
24
          Q.
               And then if you come up to the top,
25
     there's another email from Election Center.
                                                  This is
```

Page 150 sent to Election Center on May 12, 2020. 1 2 Do you see that? 3 Α. I do. And the signature there is "Michael," so 5 it looks like this indicates you sent that email; right? 6 7 Α. Yes. What is the ElectionCenter@sos.ga.gov 8 9 email account? It's an email account that we use for 10 Α. 11 communication purposes that a county, instead of 12 having to email me directly or email Chris Bellew or any other member of our team, they can email -- send 13 14 an email to CES@sos.ga.gov, and that goes into a 15 separate inbox that we monitor to make sure that we 16 are hearing what we need to hear from the county. 17 Q. Do you know what measures, if any, were 18 taken to preserve potentially relevant 19 communications in that Election Center email box for 20 the litigation? 21 My understanding is IT is holding on to Α. 22 any and all -- any and all election -- any and all 23 emails regarding elections in -- under the 24 litigation hold purposes. 25 So anything that's in CES or anybody at

- 1 CES, all of their emails are being held until
- 2 litigation is over.
- 3 Q. And -- and is that something that CES
- 4 relies on the IT department to manage?
- 5 A. Yes.
- 6 Q. Do you know whether the Election Center
- 7 email account we were just talking about, whether
- 8 that was searched for production in this case?
- 9 A. I do not know.
- 10 Q. Did you have any involvement in collecting
- or identifying potentially relevant documents for
- 12 discovery in the case?
- 13 A. In regards to email searches, I know all
- of the email searches that are being done for
- 15 discovery are being handled through IT because of
- 16 how they archive all of the emails in our system.
- So I -- from that perspective, I -- I was
- 18 not involved in searching through for emails. I
- 19 have been involved in searching through for
- 20 documents that I may have possession of on my
- 21 computer, but in relation to all emails, that has
- 22 been handled -- or I have been told that is being
- 23 handled through IT.
- Q. What have you done personally to locate
- and collect potentially relevant documents?

- 1 A. Anytime I'm asked by counsel to look
- 2 through my computer, go through my records to find
- 3 anything that I may think is -- applies to a
- 4 request, I do that.
- 5 I go through my -- I haven't deleted
- 6 emails off my computer in a very, very long time, so
- 7 I have those, and then I also have all of my
- 8 documents that I create and maintain within my
- 9 computer.
- So I would go through searching through
- 11 those documents to find anything that counsel tells
- 12 me that I need to be looking for.
- 13 Q. Is that -- do you recall when you did
- 14 that?
- 15 A. I don't recall the last time I did that.
- 16 We've -- we've been -- we've been going through
- 17 these -- process of trying to find, you know, things
- 18 for discovery for a while now, but I can't remember
- 19 the last time I went through that.
- 20 Q. Do you know if it was last year or was it
- 21 years ago?
- 22 A. I feel like there was a time last year
- 23 that I had to go through and look through documents,
- 24 but a lot of the years are starting to run together.
- Q. Okay. All right. Just to wrap up on this

```
Page 153
     document, looking at Exhibit 9, do you see the --
 1
 2
     the email that Chris Bellew -- Chris Bellew sends --
 3
     well, actually, he's just copying and pasting
     Jennifer Phipps.
 4
 5
               If you look at her email, she indicates
 6
 7
 8
 9
               Do you see that?
10
          Α.
               I do.
11
               And then you write to your colleagues in
          Q.
12
     CES
13
14
15
               Do you see that?
16
          Α.
               I do.
17
          Q.
               Do you remember this situation and -- and
18
19
20
               I don't remember the exact situation, but
          Α.
21
     I believe the resolution to it -- we determined that
22
     the -- the ballot proof that they had been sent did
23
     have the party question on No. 7 present and they --
24
     and they were given the production file that that
25
     printed ballot had been -- had been built from. So
```

- 1 it was the actual correct project.
- 2 But what we found later on was that the
- 3 BMD ballot had that -- the contest in question had
- 4 had a setting placed on it to where it was only
- 5 appearing on the printed ballot and not on the BMD
- 6 ballot as it should have. And then once that
- 7 setting was corrected, then the -- the question was
- 8 showing up on the BMD -- BMD ballot as it should.
- 9 Q. Okay. How was that corrected?
- 10 A. It is a setting that was changed at the
- 11 project level. I -- I don't remember if we had --
- 12 we took the project, made the correction, and then
- 13 sent a new, revised project to the jurisdiction, or
- if we worked with the jurisdiction and -- and gave
- 15 them direction over the phone on how to update the
- 16 project so that it would be corrected. It was one
- 17 of those two methods.
- 18 O. And what was Cathi Smothers' role with
- 19 Dominion at this time?
- 20 A. She was the one that was building the
- 21 election projects.
- MR. CROSS: Okay. Let's take a break.
- VIDEOGRAPHER: The time is 12:47 p.m.
- We're off the record.
- 25 (Off the record.)

Page 155 1 VIDEOGRAPHER: The time is 1:33 p.m. 2 We're on the record. BY MR. CROSS: 3 Q. Mr. Barnes, before we look at the next 5 exhibit, we talked earlier about EasyVote. 6 Α. Yes. 7 Have you -- are you aware of any reports 8 that -- that EasyVote experienced a data breach 9 recently? 10 I believe there was a report earlier this 11 week about some voter information that they had on 12 their system being accessed. 13 And what all do you know about the data Q. 14 breach to EasyVote? 15 What I know about it was it was a few 16 county -- they had information from a few 17 counties -- how many, I don't know -- and that 18 the -- it did not contain any Social Security 19 values. It did contain name and, I believe, full 20 date of birth. But that's all I'm aware of. 21 Ο. Do you know what -- what the circumstances 22 of the data breach were in terms of how -- what the 23 intrusion was or who it was? 24 A. I do not. Do you know if anyone at the Secretary's 25 Q.

- 1 office has been tasked with investigating this?
- 2 A. I do not. I know the elections director
- 3 was notified by EasyVote and the elections director
- 4 notified the Secretary of State's general counsel
- 5 and others, but I do not know what other actions the
- 6 Secretary of State's office has taken at this time.
- 7 Q. Sorry. The current elections director, is
- 8 that Blake -- what's his last name?
- 9 A. Blake Evans.
- 10 Q. Thank you. Okay.
- In the data that was compromised, do you
- 12 know whether it included driver's license numbers?
- 13 A. I do not know. All I -- all I was told
- 14 was that it was a -- a subset of counties and that
- 15 it had -- that the -- the PII information was date
- 16 of birth.
- 17 Q. Okay. Do you know what connections there
- 18 are, if any, between the EasyVote database where
- 19 this compromise occurred and the EasyVote
- 20 application that you guys use to track things like
- 21 BMD seal inventories?
- 22 A. There -- there is no commun- -- no
- 23 connection at all, in my understanding. Those are
- 24 two separate applications, two separate and apart,
- 25 and they do not reside in the same environment.

- 1 Q. What's the basis for your belief that the
- 2 data in those applications doesn't reside in the
- 3 same environment at EasyVote?
- 4 A. The -- the application that we use, I --
- 5 I've never seen it have anything connected to the
- 6 application that counties use for generating
- 7 absentee ballot applications.
- 8 To my knowledge and understanding,
- 9 EasyVote is the vendor for both of those
- 10 applications, but those two applications are not ran
- in the same suite. So that's my understanding.
- 12 Q. The -- the inventory data that you guys
- 13 have on the EasyVote, is that hosted locally on
- 14 servers at the Secretary's office or is that hosted
- in the cloud at EasyVote?
- 16 A. I believe it's hosted via EasyVote, but
- 17 that's -- that may be a better question for IT. We
- 18 use -- we use the application and nothing more.
- 19 Q. Got it. Okay.
- Okay. So you don't -- you -- just to be
- 21 fair, you don't -- you don't know where the
- 22 underlying data physically resides, where the
- 23 servers are that hold that data?
- A. Correct.
- Q. Do you know whether the EasyVote

Page 158 applications we've been talking about, whether they 1 2 operate on the same computers that use the eNet 3 system? I don't know. Again, I don't know how the 5 counties use -- or what computers the counties use 6 to interact with their EasyVote application if they choose to use that application. I don't know if 7 8 that's the same computer that they may also be 9 accessing the State's registration system. I -- I 10 just do not know. 11 Q. What about at the State level? 12 The -- we access in to the EasyVote Α. application using -- using our public computer. 13 14 when we access the registration system, we are using 15 that public computer. 16 Is there any access to EasyVote from the computers that are used with the State's Election 17 Management server? 18 19 There is not. Α. 20 Is there any access to eNet from those? Q. 21 There is not. Α. 22 Okay. Grab the next exhibit, if you Q. 23 would, please, Exhibit 10. 24 (Plaintiffs' Exhibit 10 was marked for 25 identification.)

Page 159 1 THE WITNESS: Okay. 2 BY MR. CROSS: 3 Do you have that in front of you? Q. I do. 4 Α. 5 Okay. So Exhibit 10 is an email that you received on June 1 of 2020, along with some other 6 7 folks at the Secretary's office. 8 Do you see that? 9 Yes, I do. Α. 10 And this is an email, you can see, that Q. 11 you received from Scott Tucker; right? 12 Α. Yes. 13 And what was Scott Tucker's role with Ο. 14 Dominion at this time with respect to Georgia elections? 15 16 Scott was -- I don't recall what his 17 direct title was, but Scott worked with the -- the 18 rollout of the system. He worked -- communicated 19 with counties. 20 He also helped oversee the county 21 technicians that had been dispersed to the 159 22 counties and sort of was their point of contact, if 23 a county tech ran into issues with the equipment, it 24 got reported back in to -- up to Scott and then 25 Scott would relay that information to the Secretary

- 1 of State's office.
- 2 Q. Is it fair to say -- was Scott Tucker sort
- 3 of the primary contact at Dominion with respect to
- 4 issues that came up with the Dominion system in
- 5 Georgia?
- 6 A. He was -- he was one of the contacts. The
- 7 project manager was Tom Feehan, who's also cc'd on
- 8 this email. So Tom Feehan was the -- was the
- 9 top-level contact within the state of Georgia, and
- 10 then Scott worked under him.
- 11 Q. And this is in June -- this is on June 1
- 12 of 2020.
- Do you recall there was a -- a primary
- 14 election in Georgia on June 9, 2020?
- 15 A. I seem to recall that there was one on
- 16 June 9, yes, sir.
- 17 Q. So is this about the time where you would
- 18 expect counties were doing logic and accuracy
- 19 testing?
- 20 A. This is a combination of counties doing
- 21 logic and accuracy testing at this time and then
- 22 also counties would have been executing advance
- 23 voting at this time.
- Q. And that gets to a question I was going to
- 25 ask.

Page 161 1 So if you look at the first line here, 2 there's indication that "Gwinnett replaced an ICP 3 that is showing continual ballot misreads." 4 Do you see that? 5 Α. I do. 6 Do you know whether that was in logic and Q. 7 accuracy testing, or was that during the advance 8 voting? 9 I do not recall. Α. 10 And then if you come down, do you see Q. 11 where, on the fourth line regarding Clarke County, 12 it writes "Clarke EMS getting message that it cannot open a USB, working on this issue." 13 14 Do you see that? 15 Α. I do. 16 Do you know whether that involved advance Q. 17 voting? 18 Α. I do not know. I would imagine that that 19 had to do not with advance voting, but it may have 20 done with either programming a USB in order to then 21 transfer information to a BMD prior to logic and 22 accuracy testing, or it could be where the county is 23 trying to create an L & A export file for uploading 24 to the Secretary of State's Election Night Reporting 25 System for testing purposes.

- 1 Q. Are there any other purposes that election
- 2 workers would have to access a USB port on the EMS
- 3 server?
- 4 A. Those are the two that I am most familiar
- 5 with, are those two actions.
- 6 The third -- a third would be if you were
- 7 uploading the Election Management project you
- 8 received from the State, that that would be through
- 9 a USB drive.
- 10 Q. Given the election was on June 9 and they
- 11 were already in advance voting, would you expect
- 12 that to have happened already?
- 13 A. No, I would think it would be one of the
- 14 two things that I mentioned.
- 15 Q. Okay. Thank you.
- MR. CROSS: All right. Let me pull up the
- 17 next exhibit.
- 18 (Plaintiffs' Exhibit 11 was marked for
- 19 identification.)
- MR. CROSS: Yeah, it's already there.
- 21 BY MR. CROSS:
- Q. All right. Grab Exhibit 11, if you would,
- 23 please.
- 24 A. Okay.
- 25 Q. And you see that Exhibit 11 -- make sure I

Page 163 got the right one. Yeah. 1 2 All right. Exhibit 11 is an email from 3 Scott Tucker to you and others at the Secretary's office on June 1, 2020; right? Yes, sir. 5 Α. 6 And here, you see the subject line Q. 7 "Advanced Voting June 1st"? 8 Α. Yes. 9 And do you recall that advance voting had Q. 10 begun at least as of June 1, 2020, for the primary? 11 Α. With the primary being on the 9th, we 12 would be in the back end of it, probably leading 13 into the last week of advance voting, so yes. 14 The first bullet here from Mr. Tucker Q. 15 reads "Clarke county is going to use the ICC 16 attached to the server and not transfer results over 17 USB." 18 Do you see that? 19 I do. Α. 20 So is this one of the situations we talked Q. 21 about before where counties will sometimes connect 22 their scanner to the Election Management server 23 rather than moving tabulation results between the two devices on like a USB drive? 24 25 It is. Α.

- 1 Q. And do you have any insight into -- into
- 2 how the counties decide whether to do that, meaning
- 3 put a direct connection to the scanner as opposed to
- 4 using removable media?
- 5 A. I think it depends upon how they are
- 6 planning to go about maintaining the transparency of
- 7 their tabulation process. Each county elections
- 8 office is, of course, configured differently and
- 9 each county elections office determines how they're
- 10 going to set up the ability for the public to watch
- 11 the tabulation process. The public's not allowed to
- 12 interfere with the tabulation process, but they are
- 13 allowed to watch the tabulation process.
- So it -- it all gets back to how the
- 15 county is setting up to maintain the transparency in
- 16 that process.
- 17 Q. Who actually puts the ballots through the
- 18 ICC at the [audio interference] in the ordinary
- 19 course?
- 20 A. I'm sorry. Ask -- ask me again.
- Q. Yeah. Sorry.
- In the ordinary course of an election,
- 23 when a county's using an ICC, who feeds the ballots
- 24 into the ICC?
- 25 A. Poll workers, absentee ballot clerks that

- 1 the county has deputized, you know, to process and
- 2 handle absentee ballots for counting purposes.
- 3 So it's done under the purview of the
- 4 election supervisor, but they then assign people to
- 5 handle the process of using the scanner and feeding
- 6 ballots through.
- 7 Q. And are ICCs only used with absentee
- 8 ballots?
- 9 A. ICCs are primarily used for mail-in
- 10 absentee ballots and provisional ballots.
- 11 ICCs are also used whenever a jurisdiction
- 12 has to do a recount postelection day. So an ICC is
- 13 a central scanner. It's a device that has the
- 14 ability to scan any -- any type of ballot that the
- 15 voting system produces.
- 16 Q. Are there ever occasions when voters would
- 17 put their ballot into an ICC?
- 18 A. I am not aware of an occasion.
- 19 Q. All right. Grab Exhibit 12, please.
- 20 (Plaintiffs' Exhibit 12 was marked for
- 21 identification.)
- THE WITNESS: Okay.
- 23 BY MR. CROSS:
- Q. All right. Do you see at the top of
- 25 Exhibit 12, this is an email that Kevin Rayburn sent

```
Page 166
     to you, Veronica Johnson?
 1
 2
          Α.
               Yes.
 3
               And you see Mr. Rayburn sent this email on
     June 2, 2020; right?
 5
          Α.
               That is correct.
 6
          Q.
               And is Veronica Johnson with one of the
 7
     counties?
               She is the election supervisor in -- in
 8
          Α.
     Lee County down in Southwest Georgia.
 9
10
               If you look at the middle of the first
          Q.
11
     page, Ms. Johnson sends an email to you,
12
     Mr. Rayburn, and Dennis Carbone, all at the
13
     Secretary's office, on June 2, 2020; right?
14
               Yes.
          Α.
15
               And the subject line is "
          Q.
16
17
               Do you see that?
18
          Α.
               I do.
               And she indicates she has a quick
19
20
     question, and then she writes "
21
22
23
               Do you see that?
24
          Α.
               I do.
25
               Do you recall what the
          Q.
```

```
Page 167
 1
                               at this time?
               I believe what this is in reference to is
 2
          Α.
 3
     there is a specific export file format that the
     State of Georgia uses that creates an export file
 5
     that is then loaded into ENR.
 6
               And in this circumstance, that particular
 7
     format had not been included in Lee County's
     election project file, so they need- -- they needed
 8
 9
     to have that particular export format installed on
     their election project file so that the election
10
11
     project could then create the needed export file in
12
     the proper format.
13
               Okay. And then Ms. Johnson goes on in her
          Ο.
14
     email and indicates
15
16
17
               Do you see that?
18
          Α.
               I do.
19
               Then she writes "
20
21
22
23
24
               Do you see that?
25
               I do.
          Α.
```

```
Page 168
1
               And then Mr. Rayburn responds "
          Q.
 2
 3
 4
               Do you see that?
 5
          Α.
               I do.
 6
               Was the solution proposed by the Dominion
          Q.
7
     tech, was that the solution implemented?
8
               I believe it was.
9
              And is it common to connect Dominion tech
     laptops, either directly or through removable media,
10
11
     to county EMS servers?
12
          Α.
               It is not.
              Do you know who the Dominion tech was
13
          Q.
14
    here?
15
          Α.
              I do not know.
16
               Dominion techs are often temporary
17
     short-term employees that are hired just to support
18
     an election; right?
19
               MS. LaROSS: I object to the form of the
20
          question.
               THE WITNESS: Dominion had techs that they
21
22
          recruited from within the state and from
23
          outside the state and brought those people in,
24
          trained them, and then distributed them to the
25
          counties as part of their contract requirement.
```

- 1 BY MR. CROSS:
- 2 Q. And -- and there are literally hundreds of
- 3 techs that are deployed across the 159 counties
- 4 during an election, particularly a major election
- 5 like November 2020; right?
- 6 A. Yes, sir.
- 7 Q. And do I understand correctly that the
- 8 State and the counties rely on Dominion for
- 9 background checks and other security measures that
- 10 are taken with respect to the techs?
- 11 A. I believe as part of the contractual
- 12 relationship between the State and Dominion, that
- 13 Dominion was required to have back- -- background
- 14 checks performed on all the people that they brought
- 15 in.
- 16 Q. So in determining whether any of the
- 17 hundreds of Dominion techs that are deployed across
- 18 the state in an election cycle, whether they are
- 19 reliable and trustworthy, is that something you
- 20 depend on Dominion to assess?
- 21 A. That was something that Dominion was
- 22 tasked on bringing on the techs, training the techs,
- 23 doing background checks on the techs, and then
- 24 assigning techs to counties.
- 25 And then counties, when they interacted

- 1 with the techs, if they felt any level of uncomfort
- 2 [sic] with the techs, then the county could contact
- 3 the vendor and have the tech replaced, removed,
- 4 switched for -- with a different technician.
- I know we had instances where counties did
- 6 not like the techs that had been assigned to them,
- 7 and those techs were removed and changed with --
- 8 with additional technicians.
- 9 Q. In those situations, why were the techs
- 10 removed?
- 11 A. I can't speak to why they were removed
- 12 other than the county expressing to Dominion that
- 13 they just did not -- they did not seem to get along,
- 14 they did not seem to work well with that assigned
- 15 tech.
- 16 Q. As the head of CES, have you ever had a
- 17 concern about Dominion techs, who, again, are often
- 18 short-term, temporary hires --
- 19 A. The --
- 20 Q. Sorry. Let me finish the question.
- 21 -- having access to components of the
- 22 election system in Georgia?
- 23 A. The Dominion techs that I have encountered
- 24 as being director of CES have always struck me as
- 25 people that are people of good standing, that have

- 1 an ability to navigate a computing system, a
- 2 computing program, and able to then share and help
- 3 the county to which they are assigned.
- 4 Now, I have not met all of the techs that
- 5 Dominion pulled in, trained, and distributed out to
- 6 counties. I've only been -- I've only met a handful
- 7 of those. But those that I have met I have never
- 8 walked away feeling uncomfortable about.
- 9 Q. Have you ever had a concern about any
- 10 election worker or poll worker, any other individual
- 11 who has authorized access to components of the
- 12 election system? Have you ever had any discomfort
- 13 about whether they could be trusted?
- 14 A. To my recollection, the people that I have
- interacted with at the county level with this vendor
- and with the preceding vendor, I cannot think of an
- 17 instance where I -- I didn't feel like the person
- 18 that I was working with, communicating with, were
- 19 lacking trust.
- 20 Q. Is that true for the -- the county
- 21 employees as well?
- 22 A. Again, with the -- the county employees
- 23 that I have interacted with -- of course, I have not
- 24 interacted with all poll workers and I have not
- 25 interacted with every county election employee. I

Page 172 have -- I've encountered a good number of them in my 1 2 20 years with the Secretary of State's office, with 3 Kennesaw State, in interacting with the counties, and I have not come across people that I feel like 5 were untrustworthy or un- -- unbecoming of someone that should be involved in elections. 6 7 In your 20 or so years working with Q. elections in Georgia at the Secretary's office, have 8 9 you ever come across anyone who has had access to 10 any aspect of Georgia's election system that you 11 felt uncomfortable with them having that access? 12 MS. LaROSS: Object to the form of the 13 question. 14 THE WITNESS: No one comes to mind at this 15 point in time. 16 BY MR. CROSS: 17 Q. So one of the key arguments the Secretary 18 has made against the use of hand-marked paper 19 ballots is that they're -- can be manipulated by 20 what he and his experts have called insiders, which 21 they refer to as people who have authorized access 22 to components of the voting system. 23 Have you heard that argument? 24 MS. LaROSS: Object to the form of the question. 25

```
Page 173
1
               Go ahead.
 2
               THE WITNESS: Yes, sir, I have heard that.
 3
     BY MR. CROSS:
               What's the basis for that concern, given
 4
          Ο.
     that you, as -- as the head of CES, in all your
 5
     years have never come across anyone that you didn't
 6
7
     trust who has access to the election system in
 8
     Georgia?
9
               MS. LaROSS: Object to the form of the
10
          question.
11
               THE WITNESS: Certainly, my -- my
12
          interaction with county election officials has
13
          always been a positive one. I have a level of
14
          trust with all 159 county election
15
          superintendents and I have a -- a trust that
          they are doing their job to the best of their
16
17
          abilities.
18
               What -- the opinions that others may have
19
          on their trustworthiness, of course, every
20
          individual has the ability to make up their own
21
          mind about how they feel about people. But how
22
          I feel about election supervisors and elections
23
          employees at the county level, I feel like they
24
          are solid people.
25
```

- 1 BY MR. CROSS:
- 2 Q. Have you ever conveyed that view to the
- 3 Secretary?
- 4 A. I have always expressed my confidence in
- 5 election officials to the Secretary of State when
- 6 asked.
- 7 There are always degrees of knowledge
- 8 within the counties, that some county election
- 9 supervisors are on their -- on the -- they're still
- 10 learning the process, so they don't know everything.
- 11 There are election officials that have been involved
- 12 with it for many, many years and that are very
- 13 well-educated in the process. So there are leveling
- 14 degrees of knowledge from county to county.
- But I've always found that the county
- 16 election officials, for lack of a better way of
- 17 saying it, have their heart in the right place, and
- 18 they are trying to do the best job that they can
- 19 with the resources they have.
- 20 Q. So based on your years of experience
- 21 working with elections in Georgia, do you have any
- 22 insight as to why the Secretary believes that
- 23 hand-marked paper ballots are unreliable because an
- 24 election insider may manipulate them in some way --
- MS. LaROSS: Objection --

```

1
    BY MR. CROSS:
          Q. -- or why he has that concern about
2
    election officials and other insiders?
3
              MS. LaROSS: Objection to the form of the
5
          question.
              THE WITNESS: I can't speak to why the
7
          Secretary may have that thought of concern.
    BY MR. CROSS:
8
9
          Q. That's not something you've ever discussed
    with him?
10
11
         A. That is not --
12
              MS. LaROSS: Objection to the form of the
13
         question.
14
              Go ahead.
15
              THE WITNESS: That is not a conversation
16
         he and I have had.
    BY MR. CROSS:
17
18
          Q.
              Have you ever talked with anyone in the
19
    Secretary's office about any concerns about the
20
    reliability of -- of what they call election
21
    insiders?
22
         A. I --
23
              MS. LaROSS: Objection to the form of the
24
          question.
25
              Go ahead.
```

```
Page 176
1
               THE WITNESS: I have not.
2
               (Plaintiffs' Exhibit 13 was marked for
          identification.)
 3
     BY MR. CROSS:
 4
 5
          0.
               All right. Grab Exhibit 13, please.
 6
               Okay.
          Α.
7
               All right. Do you see at the top there's
          Q.
8
     an email from Chris Harvey to you and others at the
9
     Secretary's office that you received on June 3,
10
     2020?
11
          Α.
              Yes, sir.
12
               At this time, Chris Harvey was still the
13
    elections director; right?
14
               That is correct.
          Α.
15
               If you come down to the bottom of the
16
     first page, you'll see the header on the earliest
17
     email on the thread from Scott Tucker to you and Tom
18
     Feehan on June 30 -- or, sorry, June 3?
19
               At the bottom of the first page or top of
          Α.
20
     the second page?
21
               In mine, it's on the bottom of the first
          Ο.
22
     page. You'll see Scott Tucker's email?
23
               I see an email from Scott Tucker to me,
24
     and Tom Feehan is copied.
25
               Right.
          Q.
```

Page 177 And then that email continues on to the 1 2 top of the second page with the subject "Fayette 3 county server." Do you see that? 5 Α. Yes. Yes. 6 And Mr. Tucker writes to you "Michael, we Q. 7 just got off the phone with the tech in Fayette county and he came in today to find the server was 8 9 moved and the password is no longer working. No one 10 in the office knows why and don't know that anything 11 was moved. The tech notified the supervisor that we 12 will need to get the server back. We have an 13 accepted Express server here and will swap it out 14 and restore the backup from the county." 15 Do you see that? 16 Α. I do. 17 Do you recall this situation? 18 I don't recall this particular situation, 19 but I have no doubt in that it -- it transpired just 20 because of this email. 21 Okay. If you -- you respond to this in 0. 22 the middle of the first page on the same day, within 23 three minutes, actually, quite promptly. You wrote 24 back "Thank[s]...for letting us know. When you 25 recover the original server from Fayette County,

Page 178 please tag it and don't do anything else to it." 1 2 Do you see that? 3 Α. I do. And then Mr. Harvey responds later in the 4 5 afternoon "I spoke with the Election Director. 6 'moved,'" which he puts in quotes, "they meant that 7 the table may have been bumped or slightly 8 rearranged (in the immediate vicinity of where it 9 was). The county didn't relocate the server, nor 10 did anyone else. Dominion is trying to determine 11 why the server isn't working." 12 Do you see that? 13 Yes. Α. 14 And he goes on to say "Obviously, they Q. will need either that one reset or a new one ASAP." 15 16 Do you see that? 17 Α. I do. 18 Do you recall whether a new server was Q. 19 provided to Fayette County at this time? 20 I do not recall whether we ended up Α. 21 changing that server out or not. I just -- I do not 22 recall. 23 And do you recall any instance where a 24 county Election Management server has been replaced 25 because of a -- a situation like this where there

Page 179 was some concern about its reliability? 1 2 MS. LaROSS: Objection as to form. 3 Go ahead. THE WITNESS: Again, as you'll notice with 5 the email that I had sent immediately to Scott was basically outlining that in this 6 7 circumstance, any time a server became involved, we wanted to, you know, be certain of 8 what was going on to the best of our abilities 9 10 before moving forward. And that was -- there 11 was reasons why I responded to Scott and also 12 responded to Chris and included others in that 13 email. So we always do what we can to protect 14 the server. 15 We have had to replace servers that became 16 inoperable, that -- we've had power surges in 17 the field where you have a power surge and 18 suddenly the box is unresponsive and we have to 19 replace that server. 20 You know, other things can transpire where 21 hardware on the server itself fails, where the 22 C drive becomes un- -- unaccessible [sic] and 23 we have to replace the server. 24 So we -- we have replaced servers in the past and I'm sure we will replace servers in 25

Page 180 the future. 1 BY MR. CROSS: 2 But you're not aware of any forensic 3 examination that's ever been done of a county EMS 4 5 server; right? 6 Α. That is correct. 7 Q. And that includes the one here in Fayette County in June of 2020; right? 8 9 Again, I don't recall what the next steps were in this situation. 10 11 Q. Okay. Let's grab the next exhibit. 12 (Plaintiffs' Exhibit 14 was marked for 13 identification.) 14 BY MR. CROSS: 15 Q. Grab Exhibit 14, please. 16 A. Okay. I'm refreshing. 17 Okay. 18 Q. All right. So Exhibit 14 is an email that 19 you sent to Scott Tucker and Cathi Smothers at 20 Dominion on June 4, 2020; right? That is correct. 21 Α. And this is actually a forward of an email 22 23 you received from Dennis Carbone on the same day; 24 right? 25 A. It is.

- 1 Q. And Dennis Carbone, you can see here, was
- 2 an elections liaison for the Secretary of State's
- 3 office; right?
- 4 A. He was.
- 5 O. Is he still there?
- 6 A. He is not.
- 7 O. When did he leave? Just --
- 8 A. I think Dennis left sometime in 2020, but
- 9 I'm not 100 percent certain.
- 10 Q. Did he -- was it his choice to leave or
- 11 was he terminated?
- 12 A. I honestly don't know. I think he left on
- 13 his own. I don't think he was terminated, but I do
- 14 not know.
- Okay. Do you know where he is now?
- 16 A. I do not.
- 17 Q. All right. So Mr. Carbone -- oh, sorry.
- 18 One other question.
- 19 What's the role of the elections liaisons
- in the Secretary's office?
- 21 A. The election liaisons are sort of county
- 22 contacts for the Secretary of State's office, is
- 23 that -- the Secretary of State's office has the
- 24 state divided into regions, and then there are a
- 25 number of counties in each of these regions and then

- 1 the Secretary of State's office has an election
- 2 liaison assigned to that region. So that person
- 3 becomes the primary point of contact between the
- 4 county and the Secretary of State's elections
- 5 division.
- 6 One of the main tasks that the election
- 7 liaisons serve is helping those counties in using
- 8 the voter registration system and making -- making
- 9 sure people are registered properly, that
- 10 applications are processed timely, and stuff of that
- 11 nature.
- 12 Q. Okay. So if you look at Mr. Carbone's
- 13 email, he indicates in the first sentence "...I
- 14 think there is an issue down in Camden County with a
- 15 candidate not appearing on the BMD's."
- Do you see that?
- 17 A. I do.
- 18 Q. And so this is June 4, 2020, and do you
- 19 understand this was -- this was arising in advance
- 20 voting?
- 21 A. This -- this would be most likely
- 22 happening during advance voting for the June
- 23 primary.
- Q. And then you and -- you forward on to,
- 25 again, Mr. Tucker and Ms. Smothers at Dominion

Page 183 asking them to get in touch with the tech in Camden 1 2 County and see if this can be resolved. 3 Do you see that? I do. Α. 5 What do you recall about this specific Ο. 6 situation? 7 I -- I do not recall the specific situation. 8 Okay. So do you know, for example, 9 0. 10 whether there were voters who had voted on this BMD, 11 you know, at some point during the day before this 12 issue had been flagged, before election workers 13 realized there was a candidate that was not 14 appearing on the BMD? 15 MS. LaROSS: Objection as to form of the 16 question. 17 You can answer. 18 THE WITNESS: I do not know if anyone had 19 already used this BMD prior to this instance, 20 but I also do not know whether they had 21 programmed the voter access card to actually 22 display the proper ballot with what -- that 23 voter's candidate that they were looking for. 24 So I -- I do not know. 25

- 1 BY MR. CROSS:
- 2 Q. You just don't recall anything about this
- 3 incident one way or the other?
- 4 A. I do not recall, no, sir.
- 5 Q. So is it fair to say you don't recall
- 6 whatever the solution was either?
- 7 A. I do not.
- 8 Q. And then when you sent this on to
- 9 Mr. Tucker and Ms. Smothers, why was it Dominion's
- 10 responsibility to figure this out, rather than
- 11 County or State election officials?
- 12 A. At this point, this is, again, where
- 13 Dominion had built the elections projects, and they
- 14 would actually have more knowledge, at this point in
- 15 time, on how a candidate could be missing on a
- 16 ballot, if it was missing, and if it was missing on
- 17 a ballot, how do we go about getting that candidate
- 18 placed into the system so that their name does
- 19 appear on the ballot.
- 20 And if -- whatever that solution is, what
- 21 does it involve being done to the elections project.
- 22 Is that something that has to be done away from the
- 23 County, meaning back in the Atlanta area at the
- 24 Dominion location, or is it a task that the County,
- 25 with help from their local Dominion tech, could they

Page 185 be walked through via a phone call from Dominion on 1 2 the tasks at hand to make sure that correction was 3 made. So having -- we've spent a lot of time 5 reading through a lot of documents that the State 6 produced and Dominion produced. It seems like since 7 this system rolled out, when issues like this come 8 up, any issue involving the Dominion voting 9 equipment, you or Mr. Harvey or others typically refer to Scott Tucker to deal with that. 10 11 Was that sort of the general practice in 12 2020 and 2021? 13 MS. LaROSS: Object to the form of the 14 question. 15 THE WITNESS: In 2020, when we had some 16 sort of equipment issue, whether it be the 17 generation of the ballot, the display of the 18 ballot, the execution of the equipment, the 19 operation of the equipment, if there was a 20 concern about a technician at the county level, 21 yes, that was -- that was reported back to 22 Scott and to Tom Feehan. 23 BY MR. CROSS: 24 Q. And usually there would be a Dominion tech

that would be dispatched either physically or

25

- 1 remotely, by phone, for example, to help with that;
- 2 is that right?
- 3 A. Yes. They had technician -- Dominion had
- 4 techs on-site at the county, but then they also had,
- 5 like, regional managers. And I think these regional
- 6 managers were, you know, a higher-trained elections
- 7 tech who would then oversee 10 to 12 counties, and
- 8 then the county tech would report to the regional
- 9 tech, the regional tech would report back to Scott
- 10 and his team.
- 11 And then when an issue -- if the State
- 12 took an issue to Dominion, took it to Scott, took it
- 13 to Tom, then they would follow back up through that
- 14 chain of command down to the county.
- 15 Q. Was that the same process with ES&S under
- 16 the old GEMS DRE system, meaning the State and
- 17 county relied significantly on ES&S techs during an
- 18 election?
- 19 A. Well, it was a different dynamic with ES&S
- 20 at the end of their -- at the end of their contract.
- 21 When Diebold was the initial vendor for
- the State back in 2002-2003, the same dynamic that
- 23 we were executing with Dominion in 2019 and 2020 was
- 24 similar to what was being executed in 2002-2003 in
- 25 regards to Diebold when that voting system was

Case 1:17-cv-02989-AT Document 1368-4 Filed 04/13/22 Page 187 of 309 Page 187 originally rolled out. 1 2 By the time that ES&S had taken ownership of the -- of the system in 2010, by that point in 3 time, a lot of counties had become self-sufficient 4 5 in the use of the voting system and getting them 6 prepared. And then for technical support, that was 7 8 phone calls in to the Secretary of State's Center 9 for Election Systems or Kennesaw State's Center for 10 Election Systems in regards to -- if there was a 11 problem with a server, if there were problems with 12 DREs or optical scan units. 13 And now in 2022, the support obligations 0. 14 Dominion originally had under its contract, those 15 have expired; is that right? 16 That is correct. Α. 17 Q. What, if any, continuing obligations does 18 Dominion have with respect to supporting the 19 election system in Georgia? 20 MS. LaROSS: Object to the form of the 21 question. 22 Yeah, that's a question in THE WITNESS:

THE WITNESS: Yeah, that's a question in regards to what are they contractually bound to, and I can't speak to that. I don't have intricate knowledge of the State's contract

Page 188 with Dominion. 1 2 However, Dominion still contracts with 3 individual counties for technical support if 4 that county is so choosing. So if there's a 5 contract in place between the county and Dominion for technical support, they're still 6 7 beholden to that contract. The Secretary of State's office still has 8 9 a relationship with Dominion as -- as our 10 vendor. If we, in the process of building 11 election project files, come across a 12 circumstance where we're not quite certain how 13 to set something up in the application, then we 14 will pick up the phone and we will call 15 Dominion and ask them to sort of, you know, 16 refresh our memory how -- how do we need to 17 make -- how -- what is the setting we need to 18 have in place to make sure that the ballot is 19 displayed in this such manner if necessary or 20 how best to, you know, organize the list of 21 candidates so that we are getting the -- you 22 know, the right display on the BMD, that it --23 it -- the display will make sense to the 24 voters. 25 So we still have a very good working

```
Page 189
          relationship. I -- I personally do not speak
1
 2
          to Scott Tucker very often now. He is still
          working with the State of Georgia as a customer
 3
          service representative. I think he sort of
 5
          focuses on a certain set of counties now.
 6
               But they have, I think, a group of three
7
          regional service managers that communicate with
          certain counties and provide services to
 8
          counties if -- if required.
9
10
     BY MR. CROSS:
11
          Q.
               The services that are provided to counties
12
     now that you said the counties can opt for from
13
     Dominion, do the counties pay for that?
14
          Α.
               They do.
15
               Putting aside -- and I understand the
     point about contractual obligations. Let me ask the
16
17
     question a different way.
18
               What expectation do you have going forward
19
     with respect to Dominion providing support for
20
     counties of the State for the -- the Dominion
21
     election voting equipment that's used, technical
22
     support?
23
               MS. LaROSS: I object to the form of the
24
          question.
25
               THE WITNESS: My expectation of Dominion
```

Page 190 is as long as the State of Georgia is using a 1 2 Dominion product, that we should be able -- the Secretary of State's office should be able to 3 4 pick up the phone, call someone at Dominion, 5 who can then help us resolve the problem we may be having. 6 7 BY MR. CROSS: And as the head of CES, do you believe 8 9 that the counties now -- that the election workers at the county level are sufficiently trained and 10 11 proficient with the Dominion equipment that they can 12 support this through elections without separately paying for Dominion techs? 13 14 It's my belief that counties are getting Α. 15 to that point. Are they already at that point? 16 Some may be, based upon their resources, the amount 17 of staff that they've had on board throughout '20 18 and now in -- and now through all of '21. 19 A lot of counties have had multiple 20 elections in '20 and '21, and with every election, 21 you gain additional knowledge and -- and comfort 22 with the voting system. 23 The Secretary of State's office, we do 24 training classes. We're in the midst of conducting 25 training classes right now for counties. We've been

- 1 conducting training classes in January and we'll be
- 2 conducting them the rest of this month, where
- 3 counties come in and we give them, you know, again,
- 4 a full overview of the voting system, its
- 5 components. We go through the logic and accuracy
- 6 procedures. We go through the process of setting up
- 7 their BMDs, of setting up their scanners, of setting
- 8 up their central scanner.
- 9 We go through exercises of scanning
- 10 ballots, tabulating results, all of those things
- 11 that a county will have to do to execute an
- 12 election, whether it's a general election, a general
- 13 primary, or a special election.
- And it's the intention of CES to continue
- 15 providing those training opportunities for counties
- 16 if they wish to take them. Some counties will do
- 17 that. Some counties will spend a lot of time
- 18 educating themselves, gaining more information.
- 19 Other counties, they're going to contract with the
- 20 vendor for support, and they will probably do that
- 21 for some years to come.
- Q. And I believe you said that Diebold
- 23 provided similar tech support for the DRE system in
- 24 the first year or two to what Dominion provided in
- 25 the first year or two of this system; is that right?

Page 192 That is correct. 1 Α. 2 Why does Georgia introduce new systems in Q. 3 that way? Meaning why does it put the election 4 system into actual elections and then rely on the 5 vendor to provide tech support, rather than getting 6 its election officials trained to be self-sufficient 7 before it's actually used in elections? 8 MS. LaROSS: Objection to the form of the 9 question. 10 THE WITNESS: Elections happen on a set 11 schedule, and whenever you transition from one 12 set to another, the elections calendar is not 13 going to stop and elections have to be executed 14 on those dates and times. So the State of 15 Georgia, through its rollout of voting systems 16 statewide, in both instances did engage the vendor for assistance. 17 And in other locations outside the state 18 19 of Georgia, it's a high level of expectation 20 that vendors are providing support and services 21 to local county elections offices in the 22 execution of elections. 23 There are probably very few counties in 24 the entire nation that are completely

self-sufficient and have no reliance in any

25

Page 193 way, shape, or form on vendor support. 1 BY MR. CROSS: 2 Right. But you -- with a system like 3 Q. Dominion, right, understanding elections have to 4 5 continue, you could use the DRE system while you're 6 training people on the new system in parallel so 7 that your election workers would be more proficient 8 with the new system before it's used in actual 9 elections; right? That would be an option. MS. LaROSS: Objection to the form of the 10 11 question. 12 THE WITNESS: Well, again, in 2019, the 13 State of Georgia continued using the DRE system 14 while we were in the process of procuring and 15 acceptance testing the new voting system, and 16 counties were being trained on the new voting 17 system while they were still using the DRE 18 system. 19 So at some point in time, there has to be 20 a transition from System A to System B, and 21 when you're dealing with a statewide 22 transition, it -- it's not the easiest 23 execution of operation. 24 BY MR. CROSS:

Q. Right.

Page 194 And since it's not the easiest execution 1 2 of operation, why not have a longer ramp-up period 3 to train folks on the new system? MS. LaROSS: Objection as to form of the 5 question. THE WITNESS: Whenever rolling out a 7 system, you have to follow -- follow upon some 8 timeline that has been decided upon. And that was our task at hand in 2019 and 9 10 2020, was following through on a legislative 11 decision to change the voting system and to 12 transition to the system that we have today. 13 BY MR. CROSS: 14 And there was a Court-ordered injunction Q. 15 prohibiting the DRE system beyond 2019; right? 16 Α. That is correct. 17 Q. And -- and -- strike that. 18 One of the things that you guys had to do 19 during the transition was to set up the new private 20 network for the State EMS for Dominion; right? 21 Α. Yes. 22 MS. LaROSS: Objection as to form of the 23 question. 24 Go ahead. 25 THE WITNESS: Yes, that is correct.

Case 1:17-cv-02989-AT Document 1368-4 Filed 04/13/22 Page 195 of 309 Page 195 1 BY MR. CROSS: 2 And that actually did not get set up until Q. 3 the summer of 2020; right? That is correct. 4 Α. 5 0. Why did it take -- well, strike that. 6 The -- the Dominion system was announced publicly in August of 2019; right? 7 8 That is my recollection, yes, sir. Α. 9 And how long before the public Ο. 10 announcement was the decision made to go with the 11 Dominion system? 12 That, I -- I -- that, I don't know. Α. Ι 13 can't answer that question. 14 Q. When did you first learn that the Dominion 15 system was going to be the one that was going to be 16 used? 17 It was in the summer of 2019, at the 18 conclusion of the evaluation committee's review of 19 RFPs and the negotiation between the procurement

- 20 office for the State of Georgia and the selected
- 21 vendors.
- Q. Let me ask you this way: How long before
- 23 the public announcement did you learn that Dominion
- 24 was going to be the new system so that you could
- 25 start getting ready for that transition?

```
Page 196
1
               MS. LaROSS: Objection as to form of the
2
          question.
               THE WITNESS: I think I found out about it
 3
          the same time the public was finding out about
 4
 5
               It was generally in the same time frame.
 6
     BY MR. CROSS:
               When you say "same time frame," do you
7
          Q.
     mean within weeks?
 8
9
               Within weeks, within days.
          Α.
10
          Q.
               Okay. So given that the -- the decision
11
     had been made by the summer of 2019, why did it take
12
     a year to get the -- the private network set up for
13
     the State on the Dominion EMS?
14
               MS. LaROSS: Objection to the form of the
15
          question.
16
               THE WITNESS: Again, a question for the IT
17
          department, for they are the ones that were
18
          putting that system together.
19
               In 2019, we were still in an environment
20
          of supporting elections for the remainder of
21
          2019 under the old system, and CES was fully
22
          engaged in that, as well as in the process of
23
          testing the 30-something-thousand pieces of
24
          equipment that were coming in to the state for
25
          distribution as part of the new system.
```

Page 197 So as all of that testing was going on, we 1 2 were also in the process of acquiring a new facility that was going to be the -- the 3 housing location for CES. Prior to the summer 5 of '19, CES was housed in the Twin Towers downtown across from the State Capitol, but it 6 7 was relocated out to Marietta in the summer of '19. And during that process was when all the 8 9 infrastructure was being built and put in place to facilitate their -- the actions that CES 10 11 were having to undertake. 12 The building of election projects was 13 going to be something that was later on in our 14 operation, because the vendor was going to be 15 engaged in building those projects. 16 We did have computers in our facility that 17 had the election applications installed. These 18 computers were standalone computers, not 19 connected to any network in any way, shape, or 20 form, that we would then use to interact with 21 elections projects when election projects were 22 prepared and made ready to -- distribution then 23 to the county. 24 So even though we didn't have the full 25 infrastructure built and in place, we had

Page 198 things in place that allowed us to execute the 1 2 tasks that we needed to execute during that time frame. 3 BY MR. CROSS: 4 5 So what was -- what changed between whatever infrastructure you set up for the Dominion 6 system beginning in 2019 until the private network 7 was set up that you have in place today that was set 8 9 up sometime in summer of 2020? 10 MS. LaROSS: I object to the form of the 11 question. 12 THE WITNESS: The dedicated computers that 13 we used to interact with the Dominion 14 application were being housed in what we 15 design- -- what we call our training room 16 within CES. 17 So whenever we had to interact with an 18 elections project that had been built by 19 Dominion and before it was distributed to a 20 county, it was placed on these standalone 21 Election Management computers, similar to what 22 were housed -- similar to what were in place at 23 the county level, and then we would interact 24 with those projects for proofing purposes and 25 for packaging for distribution to the

Page 199 individual counties. 1 2 What was being configured at the time was our internal infrastructure that would allow us 3 to be able to sit in our individual offices and 4 5 have not only a public-facing computer, which 6 we had, but also a private network computer 7 that would be tied in to the Election Management System and application that was 8 9 being placed on the private server. 10 BY MR. CROSS: 11 Q. So before the current private network, 12 when the new Dominion system rolled out in 2019, you set up a -- an EMS network in the -- the training --13 14 the IT training room in your office? 15 It was not an EMS network; it was an Α. 16 isolated computer. It wasn't -- these computers 17 were not plugged into one another. They were 18 isolated computers. All they were plugged into was 19 a power source. 20 When you say "computers," do you mean Q. 21 desktop computers? Servers? Or what do you mean? 22 Α. I mean a -- a -- a Election Management 23 computer similar to what you would see in the county 24 today. 25 Q. How many of those were there?

Page 200 There were two dedicated computers. 1 Α. 2 And what were they connected to? Q. 3 A power outlet. Α. Ο. That was it? 5 Α. That was it. 6 They weren't connected to each other Q. 7 either? They were not. 8 Α. 9 Why did you have two? Q. Because that's what we had, was two. 10 Α. 11 No, I'm sorry. Why did you have -- why Q. 12 did you need two, instead of just one, to run the 13 system at that time? 14 Well, we had two because we're trying to Α. support the production of 159 county project files 15 16 in the same time frame. So we wanted to have more 17 than one person working on these tasks at that time 18 if possible. 19 But if the computers weren't connected to 20 each other and you have multiple people working on 21 those two computers at the same time, how do you --22 how did you synchronize the data across those two 23 computers? 24 Α. We weren't needing to synchronize the data 25 between those two computers. Those -- one computer

- 1 would have a project file for Fayette County;
- 2 another computer would have a project file for
- 3 Spalding County.
- 4 We were checking project files independent
- 5 of one another, one at a time, to make sure that
- 6 they are correct and then also producing the project
- 7 file for delivery to the county. So you don't --
- 8 you work on one project file at a time. You -- you
- 9 don't synchronize project file data from project
- 10 file to project file.
- 11 Q. So each of the two computers, in this 2019
- 12 to early 2020 time frame, that you were using for
- 13 the Dominion election system, each one was fully set
- 14 up with the Dominion Democracy Suite that you needed
- 15 to run the -- the Election Management software?
- 16 A. It was set up with EED, which is the
- 17 Election Event Design application; it was set up
- 18 with RTR, which is the Results Tabulating &
- 19 Reporting application. And those are the two
- 20 primary applications that we interact with when we
- 21 are building and constructing an elections project.
- The computers, to my recollection, also
- 23 had the Adjudication Client application installed on
- 24 them, but that is not an application that's used
- 25 during the -- the production of an elections

- 1 project.
- 2 And I think those were the three
- 3 applications installed from a Dominion Suites
- 4 perspective -- from a Dominion Suite perspective.
- 5 O. So what's on the current State Dominion
- 6 EMS server that's used to administer the -- the
- 7 Dominion election system?
- 8 A. On the server currently is EED -- or the
- 9 applications that we have on our workstations are
- 10 EED, are RTR, the Adjudication Client. Those are
- 11 the three applications that we have on our
- 12 workstations that are -- and these are the
- 13 workstations that are connected to the private
- 14 network. Those are the three applications.
- 15 Q. What do you use RTR for?
- 16 A. RTR, our Results Tabulating & Reporting,
- 17 we have to -- when we are building an elections
- 18 project, one of the checks that we do on the back
- 19 end before we send it to the county is we have to
- 20 open up RTR to make sure that the project file will
- 21 create the proper formatted export file.
- So we have to make sure that the proper
- 23 export file format has been in -- that is in place
- 24 and is active so that when the project file is
- loaded at the county level, that they are able to

- 1 produce the export file that they need for
- 2 submission to the Secretary of State's ENR page.
- 3 And we also validate that RTR can produce
- 4 the election summary report that it needs to produce
- 5 and also the statement of votes cast report.
- 6 Q. Do election results data get stored on the
- 7 State EMS server?
- 8 A. It does not.
- 9 Q. So what goes onto the EMS server after an
- 10 election is done, if anything?
- 11 A. After an election is over with -- are you
- 12 talking about after a county has completed the
- 13 election and then they send in their backup copies
- 14 of the project postelection?
- 15 Q. Yeah, you've gotten their backup copies of
- 16 the project, you've gotten their ENR data,
- 17 everything that you get from the counties.
- 18 A. Well, ENR data, that is transmitted from
- 19 the county elections office to the Secretary of
- 20 State's Election Night Reporting System.
- 21 But postelection, county election
- 22 officials are supposed to create an election backup
- 23 copy of their election project and submit that to
- 24 the Secretary of State's office.
- When that jump drive is received, that

- 1 jump drive is extracted from the transport bag that
- 2 the county uses to send that information back to the
- 3 State, and then that USB drive is placed inside a
- 4 bin and that bin is then placed in a secured room.
- 5 We have no reason to take that jump drive returning
- from the county and plug it back into our -- our
- 7 private environment.
- If we need to look at that project file
- 9 for some reason, then that jump drive is going to be
- 10 plugged into one of our Election Management System
- 11 training computers that we have in our training
- 12 room. And, again, those are computers that are only
- 13 plugged into a power source, and they do have the
- 14 applications necessary to open the project and view
- 15 the information within the project.
- But the -- the postelection project files
- 17 are never reintroduced into our Election Management
- 18 System on the private system.
- 19 Q. Is there a log maintained of -- of the
- 20 election project data coming back from the counties?
- 21 A. Is -- is there a log? Do we notate what
- 22 we got -- do we note for whom we got something back?
- 23 Q. Yes.
- A. I don't believe I create a physical record
- 25 that indicates what that is. If I'm questioned by a

Page 205 county -- now, the county -- when the county 1 2 certification materials are returned to the State, 3 the State goes through an inspection of what is returned and they make note of what is returned at 5 that point in time. 6 And then the Secretary of State's office 7 downtown brings -- by way of an investigator, brings out the returned jump drives that we then place into 8 a bin and put into a secured room. So there's 9 record of what a county returns, but that's done by 10 11 a different portion of the Secretary of State's 12 office, not CES. 13 0. So what efforts, if any, are made at the 14 Secretary's office to ensure that counties comply 15 with the rule requiring them to provide this data 16 back to the State? 17 MS. LaROSS: Objection to the form of the 18 question. 19 THE WITNESS: I can only speak to what 20 I -- what I just mentioned, is that the -the -- the certified returns are returned to 21 22 the Secretary of State's office downtown, and 23 then those -- those packages are opened and 24 people with the Secretary of State's office

downtown inspects what has been delivered and

25

Page 206 1 then, to my knowledge, make note of what the 2 county has returned. BY MR. CROSS: 3 So your office doesn't have responsibility 5 for tracking the -- this data, these files from the counties? 7 Α. No. 8 And are you talking the postelection data 9 or the preelection database files? 10 I'm talking about the postelections, what Α. we're discussing right now. 11 12 Ο. Okay. That's what I thought. 13 So the counties also have to provide to 14 the Secretary a copy of the Election Management 15 System database for that county before the election; 16 right? 17 Α. No. 18 Q. Okay. That's not -- that's not a 19 requirement? 20 No, that is not a requirement. Α. 21 So going back to the setup of the Dominion Ο. 22 system in 2019 and 2020, given your -- you say that 23 you are able to run the -- the Dominion system on 24 two standalone computers.

Why did you bother to transition to what

25

Page 207 you say now is the private network that has a -- a 1 central server and then multiple computers connected 2 to it? 3 MS. LaROSS: Objection as to form of the 5 question. THE WITNESS: We have employees. They have offices, and we like for our employees to 7 be able to sit at their desk and do their job 8 9 in their desk next to their public computer, as 10 well as their private computer, as opposed to 11 having to go into one office to get their email 12 and then go around to another office to 13 interact with a Election Management computer. 14 We felt like it would be easier for us to 15 do our task if we could be able to sit in our 16 offices and access both systems at the same 17 time, with one being in the protected, isolated 18 environment and the other one being in the 19 standard SOS environment. 20 BY MR. CROSS: 21 And just so I understand, when you say 22 they're -- the two computers are on the two 23 different environments, the two computers sit in the 24 same employee's office, it's just that one has an 25 Internet connection and the other has a hard-line

- 1 connection to the private network; is that right?
- 2 A. That is correct.
- 3 Q. And sorry if I asked you this before.
- 4 How many employees have that setup, those
- 5 two computers?
- 6 A. One, two, three, four, five, six, seven --
- 7 seven employees.
- 8 Q. And what are their -- I don't need all
- 9 their names.
- 10 What -- what are their titles or roles,
- 11 generally?
- 12 A. There's myself, and then I have four
- 13 election coordinators and those are the people that
- 14 are responsible for building election projects.
- And then I have my two election system
- 16 specialists, and their involvement is in the
- 17 proofing of the project files that are constructed
- 18 by election coordinators and in the packaging of
- 19 those projects once they've been approved by county
- 20 review.
- 21 (Jenna Conaway entered the deposition.)
- 22 BY MR. CROSS:
- Q. Does anyone else have access to the
- 24 private network room?
- 25 A. My IT support has access to the private

Page 209 1 server room. 2 In case of emergency, we do have a card 3 key swipe that will allow us to get into the server room, but it's -- but it's contained in a locked key 4 5 The -- the lock -- I maintain the key to that 6 lockbox, and me and my election -- my election 7 system specialist can get to that key in order to 8 open that lockbox in order to gain that swipe card 9 access. 10 So only two people have that key? Q. 11 Α. There's only two people that have that --12 well, have that physical key, yes. 13 Ο. So only two people have access to that 14 lockbox? 15 Α. That is correct. 16 All right. Grab Exhibit 15, please. Q. 17 (Plaintiffs' Exhibit 15 was marked for 18 identification.) 19 THE WITNESS: Okay. I'm looking at it. 20 MS. LaROSS: Sorry. What exhibit are we 21 I apologize. on? 22 MR. CROSS: 15, 1-5. 23 MS. LaROSS: Thank you. Excuse me. 24 BY MR. CROSS: 25 Do you have it? Q.

Page 210 Yes, I'm looking at it. 1 Α. 2 Okay. Sorry. Hold on one second. Q. 3 All right. So Exhibit 15 is an email that 4 Kevin Rayburn sent to you, several folks at the 5 Secretary's office, and some folks at the -- at 6 Dominion on June 8, 2020; right? 7 Α. Correct. And the subject line is "continuing ENR 8 Q. issues." 9 10 Do you see that? 11 Α. I do. 12 If you come down to the bottom of the Q. document, the last page, the middle of that page, 13 14 you'll see that the first email in here is from Ryan 15 Germany on June 8, 2020. 16 Α. Yes. 17 Ο. And he writes in the second sentence -- or 18 midway through the first sentence, "...we still have 19 79 counties that have errors in their ENR upload 20 file. It seems that the Dominion techs in those 21 counties did not properly implement the corrections 22 that we identified last week. This is completely 23 unacceptable. If ENR is not successful tomorrow, 24 then we do not have a successful election."

25 Do you see that?

- 1 A. I do.
- 2 Q. And we are literally on the eve of the
- 3 June 9 primary at this point; right?
- 4 A. We are.
- 5 Q. What do you recall about the ENR upload
- 6 issues that were occurring at this time?
- 7 A. My recollection of what this is relating
- 8 to is when the election projects were built for the
- 9 June primary, they're called export codes. We have
- 10 to assign a code to state-level races. The contests
- 11 themselves have to have an ID number so that when
- 12 the export file is generated, the ENR system knows
- 13 that this -- this candidate and its result is tied
- 14 to the governor's race or it's tied to the U.S.
- 15 Senate race.
- When the project files were built, those
- 17 codes were put in place for State races, and in
- 18 addition, they also put in export codes for the
- 19 individual candidates below there.
- The ENR system was not expecting there to
- 21 be a numeric value for the individual candidates.
- 22 In fact, it did not need that. But with the -- but
- 23 with that value being in place and in the export
- 24 file, it would not load properly into the ENR
- 25 system.

Page 212 So the resolution required going back into 1 the election project and removing those -- those 2 3 numbers -- and they're in an area that's called an external ID field -- is removing those numbers from 5 all -- all state races that had candidates. candidate had an external ID number, it had to be 6 7 cleared out, and if any local candidate in any local race had an external ID number entered, it had to be 8 9 cleared out, so that the only items in the system that would have an external ID number would be 10 11 state-level contests and nothing more. 12 And once that -- once that correction was 13 made, a new export file was generated and then 14 submitted to ENR for processing, and it would then 15 be -- it's successfully processed. So if you come up to the email from Kevin 16 17 Rayburn here, in the last sentence, he writes "...we 18 are seeing techs trying to upload March zero files 19 They need to be very careful not into the June ENR. 20 to do that." 21 Do you see that? 22 I do. Α. 23 What are March zero files? Q.

A. Well, again, this gets back to the -- the fun we had in 2020. We were scheduled to have a

- 1 March PPP in 2020, and election project files were
- 2 generated and distributed to a number of counties
- 3 for execution of the March PPP. But there was never
- 4 a March PPP. The March PPP was rescheduled to then
- 5 be held in conjunction with the May 2020 general
- 6 primary.
- 7 So a new election project had to be built
- 8 for all 159 counties that incorporated the -- the
- 9 March PPP race and placed it on the May 2020 ballot,
- 10 and then that combined ballot of the PPP and the --
- 11 and the planned May primary was then further
- 12 rescheduled until June 9.
- So when it came time to do an election
- 14 upload, there were some ballots that were issued in
- 15 connection with the March PPP, and those ballots
- 16 still had to be counted. So counties that had
- 17 gotten that original PPP project and had issued
- 18 ballots in the original PPP had to count votes and
- 19 tabulate them in that PPP March project.
- What this is referring to is that when you
- 21 would upload an Election Night Reporting file, if
- you're generating it from the May 2020 primary,
- 23 which was being used for the June election, that
- 24 export file had to feed into the -- the June 9 ENR
- 25 page. But there also was a second ENR page for

- 1 upload of the March results that needed to be
- 2 collected and tabulated.
- 3 So counties were actually doing two
- 4 Election Night Reporting uploads at the end of the
- 5 general primary. Some of the votes were going into
- 6 the original March framework, and that database only
- 7 had two races in it, which was the presidential
- 8 race, Democratic and Republican, but the primary
- 9 database had those two races plus all the other
- 10 statewide and local races that were part of the
- 11 general primary.
- Q. When you say "PPP," you mean presidential
- 13 preference primary; right?
- 14 A. Yes, sir. I'm sorry. I should -- I
- 15 should -- I should have explained that.
- Q. No, no, that's fine. Just so we're all
- 17 clear.
- And why -- why was it a serious problem
- 19 to -- for Dominion techs to upload the March zero
- 20 data?
- 21 A. This gets back to how ENR operates, is
- 22 that if it sees a file, it's trying to load that
- 23 file into -- into the application, but the
- 24 application is expecting the file to contain a lot
- 25 more information because it's trying to feed

Page 215 information to a lot more races, a lot more 1 2 contests. 3 But the file that was coming over from the county from a March election did not have that same 4 5 litany of information, so it would -- it didn't 6 match the -- it didn't match the slot that it was 7 trying to be placed into. 8 All right. Grab Exhibit 16, please. (Plaintiffs' Exhibit 16 was marked for 9 10 identification.) 11 THE WITNESS: Okay. 12 BY MR. CROSS: 13 Ο. And you see Exhibit 16 at the top is an 14 email from Chris Harvey --15 Α. Yes. 16 -- on June 9, 2020. Q. 17 That's what you've got; right? 18 Α. That is what I see, yes, sir. 19 Okay. So if you come down to the middle 20 of the first page, you'll see there's an email. 21 says "managementescalationissues." 22 Do you see that? 23 I do. Α. 24 Q. Are you familiar with that email account? 25 Α. I am not.

Page 216 That's not something you've seen at the 1 Q. 2 Secretary's office? 3 I am not familiar with that, no, sir. I do not know what that is. 4 5 Okay. And then this -- this is an email June 9, 2020, 9:46 a.m., so we're a little while 6 7 into the presidential primary that day; right? 8 Yes, sir. Α. And then in all caps, it reads "MACHINES 9 Q. 10 NOT WORKING, NO PAPER BALLOTS AVAIL." 11 Do you see that? 12 Α. I do. And if you come down, you'll see that 13 Q. 14 there's a signature block here that indicates the 15 email is from Tasheena Lockett, the customer service 16 team lead at the Georgia Secretary of State. 17 Do you see that? 18 Α. Yes. 19 Do you know her? Q. 20 I do not. Α. 21 And so there's a report from a caller. Ιt 22 says "Nature of call: Caller states she has 23 been" -- sorry. I'll try it again.

"Nature of call: Caller states she been

at this location since 6AM. She states not one

24

25

Page 217 machine is working and they do not have any paper 1 ballots." 2 3 Do you see that? 4 Α. I do. And fair to say the June primary rollout 5 6 of the Dominion system was a bit chaotic; right? 7 MS. LaROSS: Objection as to the form of the question. 8 9 THE WITNESS: That was a very -- that was 10 a very busy day, yes. BY MR. CROSS: 11 12 There were a lot of challenges that arose Ο. 13 with the new BMD system at counties around the 14 state; right? 15 Α. Yes. And, in fact, there were counties like 16 17 Cobb County, among others, that had to rely pretty 18 heavily on paper ballots as a backup because of the 19 challenges with the BMD system; right? 20 MS. LaROSS: Objection as to form of the 21 question. 22 THE WITNESS: I believe there were a 23 number of locations that when they started out 24 the day, that they did have to transition over 25 to the emergency paper ballot because the poll

Page 218 1 workers were not successful in powering on the 2 equipment as they should have been. BY MR. CROSS: 3 And that's just one of the problems. 4 5 There were also problems where the BMD equipment, 6 even when powered on, didn't function as it was 7 supposed to. That happened in some cases; right? 8 I'm -- I suspect that was the case, but I 9 can't think of a direct example. But I will say 10 yes. 11 Okay. What emergency paper back- --Q. 12 strike that. 13 What plan did the Secretary adopt as an 14 emergency paper backup for the 2020 election, if 15 any? 16 MS. LaROSS: Objection as to form of the 17 question. 18 THE WITNESS: It's my understanding that 19 they had -- Secretary of State's office had 20 instructed counties that as a cause of 21 emergency, that if something were to transpire 22 where the BMD was not operational, that they 23 should have preprinted copies of hand-marked --24 hand-fillable ballots available to poll workers 25 for distribution to the voters.

Page 219 Those hand-marked paper ballots can be 1 2 scanned by the ICP scanners that are in place at the polling locations on election day. 3 BY MR. CROSS: 4 5 Did you at some point see a written plan for using emergency paper ballot backups for the 6 7 2020 election, the June 2020 election? I don't recall seeing very much of the 8 9 instructional documentation for process of managing 10 polls that was being sent out from the elections 11 division to counties to try to get them ready for 12 the first rollout. There was a -- a high number of training materials and official election 13 14 notifications and such that went from Mr. Harvey's 15 office to the counties to get them ready for that 16 election. 17 So I'm sure that there were those things, 18 but I can't remember -- I can't say to a fact that I 19 saw every single one of those. 20 If someone were to ask you for a copy of a emergency paper ballot backup plan for the June 2020 21 22 election, is there a document that you could put 23 your hands on and say, "Here it is"? 24 MS. LaROSS: Objection to the form of the question. 25

```
Page 220
1
               THE WITNESS:
                             I do not know of a document
 2
          of that nature, but if I was looking, I would
 3
          probably go on to the Firefire -- excuse me,
 4
          the Firefly system that the State has for
 5
          distributing materials of that nature to the
 6
          counties. And it would be my assumption that
7
          those documents would be there if they existed.
 8
     BY MR. CROSS:
9
               One of the challenges that counties ran
          0.
10
     into in June 2020 was that they had too few paper
11
     ballots on hand, given the problems with the BMD
12
     system; right?
13
               MS. LaROSS: Objection as to form of the
14
          question.
15
               THE WITNESS:
                             There was a -- there was a
16
          high level of turnout on the morning of June 9,
17
          and when -- when the equipment is not working
18
          and you have to go -- fall back to that
19
          emergency, there were probably locations that
20
          were running out of those emergency ballots,
21
          yes.
22
     BY MR. CROSS:
23
               And you said your understanding was that
24
     the counties were supposed to have some number of
25
     preprinted ballots on hand as a contingency for that
```

Page 221 situation; right? 1 2 That is correct. Α. How were the counties supposed to do that? 3 Q. 4 What was -- what was the plan, if there was one, for 5 counties to figure out how many paper ballots they needed, where they would get them, who would pay for 6 7 it, how they'd be transported, all the logistics 8 that would go into that. 9 MS. LaROSS: Objection to form of the 10 question. 11 THE WITNESS: Well, again, counties 12 execute elections, and counties have always 13 been putting together backup plans to keep 14 balloting going, no matter what election system 15 may have been in operation. 16 And the use of a paper ballot in a polling 17 location in case of equipment failure has been 18 in practice for -- for many years. We've 19 referenced them for a long time as, "Well, you 20 just issue them a provisional ballot in case of 21 emergency." 22 But the State had changed the vernacular on those things to say, "No, let's -- we 23 24 will -- you know, it's an emergency ballot. 25 don't have to worry about whether it needs to

Page 222 be counted or not. These voters have proven, 1 2 you know, they're on the registration list. 3 They're in the polling place. We will issue them a ballot on paper and it will be scanned 5 and their vote counted. It doesn't have to go through a provisional double-check." So 6 7 counties have -- will always work to have those emergency things in place. 8 9 Counties are responsible for executing the 10 election. The cost of printing ballots is a 11 county expense. Counties have ballots printed 12 for mail-out purposes, they have ballots 13 printed for provisional purposes, and they have 14 ballots printed for emergency purposes. 15 MS. LaROSS: David, whenever we could, I'd 16 appreciate a break. MR. CROSS: Sure. Yeah. Just a few more 17 18 minutes, if that's okay. 19 MS. LaROSS: Yes, totally fine. 20 you. 21 BY MR. CROSS: 22 I guess what I'm trying to understand is 23 for -- given you had a new system that was in place 24 in June of 2020 and this was going to be the first 25 statewide use of the system in Georgia for

- 1 elections, did -- did the Secretary's office provide
- 2 any particular plan to the counties for how to --
- 3 how to prepare to use paper ballots as an emergency
- 4 backup in that election if they needed to?
- 5 MS. LaROSS: I object to the form of the
- 6 question.
- 7 BY MR. CROSS:
- 8 Q. Or did they leave that to the discretion
- 9 of the counties?
- 10 A. The State, you know, from my -- in my
- 11 opinion, they did provide information to the
- 12 counties through educational means.
- I remember at the State conferences
- 14 leading up to this and the regional meetings
- 15 discussing about, you know, making sure you have an
- 16 emergency plan, that you have ballots available, we
- 17 can't stop -- voting has got to continue, if you
- 18 have an equipment issue, that you still issue
- 19 ballots.
- 20 You know, was there a plan -- a,
- 21 quote/unquote, plan that was drafted and shared to
- 22 individual counties about "Here's what the State
- 23 recommends you do"? I cannot speak to that. I do
- 24 not recall seeing that.
- Q. Are you aware of any counties using their

Page 224 BMDs to print a ballot for voters at the precinct on 1 2 election day? 3 Α. No. Q. You're not aware of Chris Harvey, for 5 example, ever giving authorization to any county to 6 do that? 7 MS. LaROSS: Object to the form of the question. 8 9 THE WITNESS: You can't use a BMD to print 10 a hand-marked paper ballot to give to a voter. BY MR. CROSS: 11 12 Ο. And what's the basis for that belief? 13 Α. I have never seen a hand-marked paper 14 ballot be produced from our BMDs to be handed to a 15 voter to fill in to then have scanned. I have never 16 seen our BMDs print out a ballot in that format at 17 all. 18 Now, counties have what's called a mobile 19 ballot printer, and a mobile ballot printer is 20 actually a printer that's housed in their elections 21 office. And the mobile ballot printer, in essence, 22 is a big printer, and a computer is connected to 23 that printer and PDF files can be extracted from the 24 Election -- Election Management project and taken 25 over to that computer that's connected to the

- 1 printer and you can print out PDF files, which would
- 2 be the hand-marked paper ballots. And then those
- 3 ballots could be taken to a polling location and
- 4 could then be scanned and recognized by the scanner.
- 5 That could be done, and I believe that
- 6 there were counties on election day in need of
- 7 printed ballots that did do that.
- 8 Q. You've never heard that the Dominion BMDs
- 9 that Georgia currently has can be used as on-demand
- 10 ballot printers at the precincts?
- 11 A. I have never heard that, and I have never
- seen a ballot-on-demand be printed out from the BMD
- 13 that is a hand-marked paper ballot format.
- 14 Q. All right. Two quick questions and then
- 15 we'll take a break, if that's okay.
- 16 A. Sure.
- 17 Q. Just going back to what we talked about
- 18 before on the -- the -- the transi- -- the -- sorry.
- We've talked a lot about this private
- 20 network that was set up for the Dominion system in
- 21 the summer of 2020; right?
- 22 A. Yes.
- 23 Q. Okay. You said the reason of the
- 24 transition, if I understood you right, from the
- 25 system that you had in the training room when you

Page 226 were first rolling this out to what you have now was 1 2 that it made a lot more sense, it was easier for the 3 workers who have access to those computers to be able to have them in their office together, rather 5 than have to go from one office to another. 6 Did I get that right? 7 Α. Correct. And why would the workers, during the 8 9 course of the day, need access to both computers? 10 Α. Well, if you're an elections -- if you're 11 an elections coordinator and you're building an 12 elections project, you're obtaining information from the county related to the contests, the candidates. 13 14 You're also pulling information from eNet 15 that indicates, "Here are the precincts. Here are 16 the combos." 17 Having the ability to actually have that 18 displayed on a computer screen in front of you on a 19 monitor to your right while you are turning and 20 working on a completely different computer in a 21 completely different network environment and you're 22 keystroking in that information, instead of having 23 to have a lot of different pieces of paper flying 24 around, you can have all of that information on 25 display on your public monitor and then sit at your

Page 227 private computer and key the information in. 1 2 Okay. And one last question. Q. Are you aware of any forensic examination 3 4 that's ever been done of the computers or the server 5 that sits on the Dominion private network to 6 determine whether it's ever been compromised in any 7 way or -- or accessed in any unauthorized fashion? 8 MS. LaROSS: Objection to form of the 9 question. 10 THE WITNESS: The Dominion -- the 11 Dominion-maintained system? 12 BY MR. CROSS: 13 Ο. Yeah. Let me be clear. 14 So the -- the private network that now 15 exists as of the summer of 2020 that's used to 16 main- -- run the Dominion system at the Secretary's 17 That's what we're talking about. 18 Α. Okay. All right. So -- so state the 19 question again, please. 20 Are you aware of any forensic examination 21 of any of that equipment, meaning the computers, the 22 server, any part of the equipment that makes up that 23 private network, to determine whether there's ever 24 been any compromise or unauthorized access?

A. I am not aware of one.

```
Page 228
          Q.
1
               No.
2
               MR. CROSS: All right. Yeah, let's take
          a -- let's take a break.
3
               VIDEOGRAPHER: The time is 3:04 p.m.
 4
5
          We're off the record.
6
               (Off the record.)
7
               VIDEOGRAPHER: The time is 3:30 p.m.
          We're on the record.
 8
9
     BY MR. CROSS:
10
              Okay. Mr. Barnes, let's grab the next
          Q.
11
     exhibit, which I think is 17.
12
               (Plaintiffs' Exhibit 17 was marked for
13
          identification.)
14
                            Okay.
               THE WITNESS:
15
    BY MR. CROSS:
16
              And if at any point, Mr. Barnes, you need
17
    to take a break, just say the word; okay?
18
          Α.
              Yes, sir. Thank you.
19
               Including if you need to stop.
          Q.
20
              No, I appreciate it. Yeah, the sugar
          Α.
21
     today has been extremely high, but I have been
22
     powering through.
              Okay. Well, I'm sorry to hear that.
23
          Q.
24
     Hopefully that's not my fault.
25
               It's not -- it's not all your fault.
          Α.
```

Page 229 I have been told I'm very sweet, so I 1 Q. don't know. 2. 3 MS. LaROSS: It may not be personal at all, David. I'm not sure. 4 5 BY MR. CROSS: Q. All right. Let me know when you've got 7 17. I'm looking at it. 8 Α. 9 Okay. Let's see. Q. 10 All right. So Exhibit 17 is an email that you received from Kevin Rayburn on June 9, 2020; 11 12 right? 13 Yeah, it was sent to Scott Tucker and Α. 14 myself. 15 Yeah. And if you look at the -- in Q. 16 Mr. Rayburn's email, he writes to you and Mr. Tucker and copying Ms. Smothers at his -- or at Dominion 17 18 and Mr. Feehan at Dominion. He writes "Is there someone at Dominion making calls? I am concerned 19 20 they are giving incorrect information. One tech 21 reported a person named Jennifer (or Jessica) told 22 him to take certain corrections that set them back. 23 And now Jefferson has worsened their file." 24 Do you see that? 25 I do. Α.

- 1 Q. Do you recall this situation?
- 2 A. I don't recall that specific situation,
- 3 but this is -- in just scanning the rest of the
- 4 document, seems to be, you know, in -- in line with
- 5 what we were discussing earlier.
- 6 Q. In what respect?
- 7 A. It's discussing a "CHOICE External ID for
- 8 county races" in that row there for Appling. That's
- 9 what we were -- that's what I was mentioning earlier
- 10 as what was causing the problem with the Election
- 11 Night Reporting files that the counties were
- 12 generating and sending up to the State for ENR
- 13 checking purposes.
- Q. Okay. So you don't recall a specific
- 15 situation where Dominion was -- techs were giving
- 16 direction to counties that were creating problems?
- 17 A. I -- no, I don't recall a situation where
- 18 the instructions they were giving were creating
- 19 problems, but it could have been a scenario where
- 20 the instructions they were giving -- that the tech
- 21 was not understanding fully themselves and, thus,
- 22 creating a problem.
- Q. Okay. All right. Grab Exhibit 18,
- 24 please.
- 25 A. Sure.

```
Page 231
1
               (Plaintiffs' Exhibit 18 was marked for
          identification.)
2
3
               THE WITNESS: Okay. I have it up.
     BY MR. CROSS:
 4
 5
          Ο.
               And you see Exhibit 18 is an email from
 6
     Leigh Combs to Chris Harvey at the Secretary's
7
     office on June 9, 2020?
 8
          Α.
               Yes.
9
               And do you know Leigh Combs?
          Q.
               She is an election liaison for the
10
          Α.
     Secretary of State's office.
11
12
              Okay. Do -- the election liaisons, do
          Ο.
13
     they work with CES or do they work with Chris
14
     Harvey's department, or what was their role?
15
               Election -- election liaisons report to
     the elections director -- at the time that was Chris
16
17
     Harvey -- and they work in the downtown office of
18
     the Secretary of State's elections division.
19
               Okay. So Ms. Combs writes here "
          Q.
20
21
22
23
24
               Do you see that?
25
          Α.
               I do.
```

Page 232 Do you know what it means when she writes 1 Q. 2 3 4 What that means is there are two ways to 5 activate a voting session on the BMD. One is by creating a voter access card from the Poll Pad, with 6 7 that voter access card containing the needed activation code. 8 The other way is by what's called poll 9 10 worker ballot activation, where a poll worker 11 inserts a poll worker voter -- a poll worker card, 12 smart card, into the smart card reader on the front of the BMD. 13 14 The poll worker then keys in an 15 eight-digit code that's associated to that poll worker card and to that election, and then it gives 16 17 the poll worker the ability to do a ballot 18 activation where they are then asked for a ballot 19 activation code that then enables and brings up the 20 ballot on the touchscreen. And then the voter can 21 interact with the ballot on the BMD touchscreen and then have the BMD produce the printed ballot. 22 23 The default way is to use the card, right, Q. 24 rather than the activation code?

The expected way is for us to create the

25

Α.

Page 233 voter access code from the Poll Pad, yes. 1 2 The secondary way is poll -- is poll worker activation if the Poll Pads are not 3 functioning as expected. 5 Ο. All right. Grab Exhibit 19, please. 6 (Plaintiffs' Exhibit 19 was marked for 7 identification.) 8 THE WITNESS: Okay. I see it. 9 BY MR. CROSS: 10 All right. So Exhibit 19, do you see 11 there's an email at the top from Cynthia Willingham 12 to Scott Tucker at Dominion and Chris Harvey and Kevin Rayburn at the Secretary's office and then 13 14 cc'd to some others? 15 A. Yes, I see that. 16 You see this is dated June 11, 2020? Q. 17 Α. Yes, sir. 18 If you come down to the bottom, you'll see Q. 19 Cynthia Willingham is the supervisor [audio 20 interruption] --21 That's correct. I see that. Α. 22 COURT REPORTER: Excuse me. It froze up 23 on my end. Can you repeat that? I have, "If 24 you come down to the bottom, you'll see Cynthia 25 Willingham is the supervisor" --

Page 234 MR. CROSS: Yeah. 1 2 BY MR. CROSS: 3 If you come down to the bottom, Cynthia Q. 4 Willingham is indicated as the supervisor of 5 elections for Rockdale County Board of Elections; 6 right? 7 Α. Yes, that's what I see. Is she still there in that role? 8 Q. 9 She is. Α. 10 Okay. And have you seen this email Q. 11 before? 12 Α. No, sir, I have not. 13 Okay. If you come down, there's one Q. 14 particular point I wanted to ask you about. 15 If you look at the top of the second page, 16 do you see where it begins "Election Night," with a 17 closed parentheses, and then it says "As Scott knows..."? 18 19 Yes, I see that. Α. 20 And he or she writes, "As Scott knows, Q. 21 during the scanning of the by mail ballots last 22 week, our Tech, purged the scanned ballots, not 23 once, but twice on two different days." 24 Do you see that? 25 I do. Α.

- 1 Q. And this is sent on June 11, 2020, so two
- 2 days after the presidential primary; right?
- 3 A. Yes.
- 4 Q. Do you know why a Dominion tech would have
- 5 the ability to purge scanned ballots in the Dominion
- 6 election system?
- 7 A. The Dominion system, when you are loading
- 8 election results, when you are loading images
- 9 collected by the scanner, they are uploaded through
- 10 RTR and housed inside of the -- the file structure
- of the elections project. And that's where they're
- 12 retained during the counting process, and then once
- 13 the election is completed and -- and certified,
- 14 those records stay in that possession.
- Whenever you're in the elections project
- and you're going through the process of counting
- 17 votes, there are times where you have loaded a file,
- 18 you've loaded a result file, but you may not have
- 19 loaded the images that are also paired with that
- 20 result file. And then you may be attempting to do
- 21 the adjudication process, and you've got to have
- 22 both of those things in place in order for the
- 23 adjudication application to operate, it has to have
- the result file and it has to have the ballot
- 25 images.

- If it doesn't have those things, then you
- 2 have to remove the uploaded result file or the
- 3 uploaded images and reload them in. And the
- 4 process -- one of the [audio interruption] use in
- 5 that process is called purging of results, and it is
- 6 a way of clearing out results from the system and
- 7 then making it ready for then uploading those --
- 8 that informational pieces back into the system for
- 9 tabulation.
- 10 Q. So are you suggesting that what the
- 11 election supervisor is complaining about here was
- 12 actually appropriate by the Dominion tech, it's what
- 13 they're supposed to do?
- 14 A. Again, I -- this is the first time I've
- 15 seen this email, so I don't really even know what
- 16 they are discussing at the time.
- I am just speaking to the fact that if a
- 18 mistake was made in the process of uploading
- 19 information into RTR, that you do want to clear out
- 20 the mistake and then begin anew, making sure that
- 21 you are uploading things properly.
- 22 O. I see.
- But you don't understand why the Dominion
- 24 tech here purged the scanned ballots twice? You
- 25 don't know the reason in this particular instance;

Page 237 is that right? 1 2 Α. I do not know the reason in this 3 particular instance. All right. Grab -- what are we up to? 5 think we're up to 20. Yeah. Grab Exhibit 20, 6 please. 7 (Plaintiffs' Exhibit 20 was marked for identification.) 8 9 THE WITNESS: Okay. I'm looking at No. 20. 10 BY MR. CROSS: 11 12 And Exhibit 20, that's an email that you Ο. 13 sent to Scott Tucker on June 12, 2020; right? 14 It is. Α. 15 And if you come down to the bottom, the first email on the bottom of the -- of the second 16 17 page, there's an email from Charlton Elections --18 well, more precisely, it's an email from Brenda 19 Hodges, who's the supervisor of elections in 20 Charlton County, on June 12, 2020; right? 21 Α. That is correct. 22 And Brenda emails you and Chris Bellew; Q. 23 right? 24 Α. Yes. Yes, she does. 25 And if you look at the third sentence of Q.

Page 238 her email, she puts "We have made corrections to the 1 2 Ballot ID's and all of those numbers are good, but 3 the NP votes are doing crazy things in that it is adding the REP and DEM votes together for a Total 5 Votes Cast number and that is really throwing off 6 our numbers still. I am 915 votes over what it 7 should be." Do you see that? 8 9 Α. I do. And in this time frame, in June of 2020, 10 Ο. 11 there were a number of complaints or concerns that 12 came in from counties where the vote cast number was not consistent with the Election Night Reporting 13 14 tabulation; right? 15 MS. LaROSS: Objection as to form of the 16 question. 17 THE WITNESS: State the question again. 18 I'm sorry. It sort of broke up on me. 19 BY MR. CROSS: 20 Q. Yeah. Sorry. 21 Do you recall in this June 2020 time frame 22 that a number of counties alerted the Secretary's 23 office, including you, that their total votes cast 24 number was not the same as their ENR vote tallies?

I do recall that.

25

Α.

Page 239 And what was the reason for that? 1 Q. Was 2 there a particular reason that you recall? Was it a 3 variety of reasons? In relation to Charlton County, I believe 5 the issue at hand here was they were actually dealing with a dual database for the general 6 7 primary. They had an initial database generated, 8 and before election day an error was found in that 9 original database. I think it related to a county 10 commission race, that it didn't have a candidate it needed to have or it had a -- something of that 11 12 nature. I think it was a local race. 13 And in order to resolve that, we actually 14 had to have a second election project generated and 15 provided to the jurisdiction for loading into their election equipment. 16 17 But because they had already begun voting 18 on the initial project file, in that there were 19 races on ballots that were not impacted by the 20 error, they continued to collect ballots and votes 21 during the advance voting period in that initial 22 election project, and then on election day, they 23 were using the new election project that had been

25 What they were doing at -- on postelection

corrected and the mistake corrected.

24

Page 240 time were trying to get the results from the initial 1 2 general primary ballot tabulated using the -- the 3 initial project file and then manually keying in the results from that original election project file 4 5 into the corrected election project file so they 6 could -- they could generate a single consolidated 7 report, election summary report and statement of 8 votes cast report, that showed all votes collected for the election, combining both of those two 9 10 project files to get a final result and also to 11 create an export file that would be then uploaded 12 into the Secretary of State's Election Night Reporting System that would report all the votes 13 14 tabulated in the process. 15 And I -- I recall that when they were 16 going through this process of doing this manual entry, it is a very arduous task to do. And they 17 18 were given -- given instructions by Dominion on how 19 to do this manual entry, and the instructions that 20 were given did not seem to be correct and that they 21 have -- they had to keep going back and correcting 22 mistakes that kept happening. 23 And then eventually they were able to get 24 a tech that was well versed on the manual entry

process actually to Charlton County to get the whole

25

- 1 process resolved and cleared.
- Q. Was that the same problem other counties
- 3 ran into when their votes cast count did not match
- 4 their ENR tallies, or were there other issues that
- 5 arose?
- 6 A. There were a couple of instances of the
- 7 manual entry that took place. I can think of -- I
- 8 believe Charlton had to go through a manual entry
- 9 exercise. I believe Chatham County had to also go
- 10 through a manual entry exercise.
- 11 Those are the two that I remember. There
- 12 may have been a couple more. And so those are the
- 13 two that I can think of.
- Q. Okay. All right. Grab Exhibit 21,
- 15 please.
- 16 (Plaintiffs' Exhibit 21 was marked for
- identification.)
- 18 THE WITNESS: Okay. I'm looking at it.
- 19 BY MR. CROSS:
- Q. Right. So Exhibit 21 is an email from
- 21 Chris Harvey to Ryan Germany on June 19, 2020;
- 22 right?
- 23 A. Yes.
- Q. If you come down to the bottom, this is
- 25 another email from Brenda Hodges at Charlton County.

Page 242 1 That's the first email in the thread. 2 Do you see that? 3 I'm getting there. Α. Middle of the --Ο. 5 Α. Yes, I see it. 6 Q. And that's June 19, 2020. 7 You see that; right? 8 I do. Α. 9 So this is again talking about how she Q. found a difference in the numbers when she was 10 11 trying to certify the results. 12 You see that in the second paragraph? 13 I'm reading it. Α. 14 And then she goes on "The Dominion Q. 15 Regional Manager came earlier this week and finagled with the Ballot ID's to get the number of votes cast 16 17 to be correct and in doing this some of my votes are different." 18 19 Do you see that? 20 I do. Α. 21 Is this the process you were just talking 22 about with the manual entry or is this something 23 different, or do you know? 24 Α. I think it's related to, but I'm not 25 100 percent certain.

- 1 Q. She then goes on in the next paragraph
- 2 "When I called the Regional Manager and told him
- 3 about the problem, he told me 'I don't have time to
- 4 worry about it right now and it doesn't matter
- 5 because he won.' This was in reference to the
- 6 Sheriff's race, but there are other races with
- 7 different vote totals. Needless to say that was
- 8 like throwing ice water in my face because" -- and
- 9 then she puts in all caps -- "because IT DOES
- 10 MATTER!!!!! He was in Tattnall County trying to
- 11 help them get their numbers to work as well due to
- 12 [their] craziness with the Ballot ID's causing the
- 13 vote totals to be way over what they should be."
- 14 Do you see that?
- 15 A. I do.
- 16 Q. Did you get involved in this particular
- 17 situation? Have you seen this before?
- 18 A. I don't recall seeing this particular
- 19 email. Again, I was -- I was involved in relation
- 20 to their manual entry and at least made aware of the
- 21 manual entry operations that they were having to go
- 22 through in Charlton County. I don't have a
- 23 recollection of what she's discussing in regards to
- 24 the ballot IDs.
- 25 Q. The conversation she attributes to the

- 1 Dominion regional manager, who reportedly told her
- 2 that he didn't have time to worry about the
- 3 difference in the numbers she was seeing and it
- 4 didn't matter because the candidate had won the
- 5 sheriff's race, is that direction consistent with
- 6 what you would expect from Dominion?
- 7 A. I would hope that anybody involved in
- 8 elections would never say something of that nature.
- 9 It would be my hope and expectations that if a
- 10 county is having issues with their election and has
- 11 concerns about whatever their election results may
- 12 be, what they are indicating, that they would work
- 13 to get it resolved so that those questions are
- 14 answered.
- 15 Q. And you don't -- you don't know what was
- done here because you hadn't seen this before; is
- 17 that right?
- 18 A. This one I do not recall and I do not
- 19 remember seeing.
- 20 Q. All right. Grab Exhibit 22, please.
- 21 (Plaintiffs' Exhibit 22 was marked for
- 22 identification.)
- 23 BY MR. CROSS:
- Q. Just let me know when you have it.
- 25 A. Yeah, I've got -- I'm sorry. I've got it.

```
Page 245
               Do you see Exhibit 22 at the top is an
 1
          Q.
 2
     email that you sent to -- the address is
 3
     clinchelections@clinchcounty on July 9, 2020?
          Α.
              Yes, sir.
 4
 5
          Ο.
               And you're responding to an email that
 6
     came in from -- it looks like Laina Ballance, the
     Clinch County elections supervisor, on the same day.
 7
 8
               Do you see that?
 9
          Α.
               I do.
10
          Q.
               And she wrote to you then "
11
12
13
14
15
16
17
18
               Do you see that?
19
          Α.
               I do.
20
               And you responded "
          Q.
21
22
23
               Do you see that?
24
          Α.
               I do.
25
               And -- and we had talked earlier -- I
          Q.
```

Page 246 1 thought you had testified that there was never a 2 time when you would tell a county that found broken 3 seals on BMDs to just replace the seals and continue to use them. 5 6 Α. 7 8 9 The election data seal is located on the 10 right-hand side of the device, on the top right-hand 11 side, and those are the seal areas that I had 12 mentioned earlier that are controlled by the county. 13 The seal on the left-hand side is not 14 noted as any type of poll worker location. That's 15 all on the right-hand side. 16 Right. But aren't -- I guess help me understand, then. 17 18 I mean, I -- I understand the ones on the 19 left are put on by the State; the ones on the right 20 are put on by the county. But isn't it still a 21 concern that they have got two BMDs that were 22 supposed to be securely stored and they have broken 23 seals at all? 24 Α. Well, again, they're in the process of 25 doing L & A testing and discovered that two of them

Page 247 had -- had broke seals when they were starting to do 1 2 L & A testing. 3 Well, it would be up to them to put the seals on the devices at the end of L & A testing 4 5 when it says completed. 6 Right. But why wouldn't you -- why Q. 7 wouldn't you want to undertake some investigation to 8 figure out whether the seals are missing on these 9 two BMDs because somebody tampered with them? 10 Because this equipment is going through Α. 11 logic and accuracy testing and she's referencing the 12 seals on the right side of the unit that would be opened and resealed during logic and accuracy 13 14 testing. 15 Right. But you understand that she's Q. saying that 16 17 18 ; right? 19 MS. LaROSS: Objection as to form of the 20 question. 21 THE WITNESS: A normal practice is to 22 remove seals from devices to begin logic and 23 accuracy testing and then to place new seals 24 upon those devices at the completion of logic 25 and accuracy testing.

```
Page 248
1
     BY MR. CROSS:
2
               So are you saying that you read this email
          Q.
     to mean that an elections county -- an elections
3
     supervisor for Clinch County emailed you to say that
 4
5
 6
7
 8
9
10
               That is how I interpret that email.
          Α.
11
          Q.
               Okay. Did you pick up the phone to call
12
     her and find out if that's what she meant?
13
               I do not recall doing that, no, sir.
          Α.
14
               Well, sitting here reading it now, do you
          Q.
15
     think maybe what she actually meant was
16
17
18
     Did that reading ever occur to you?
19
               MS. LaROSS: Objection to form of the
20
          question.
21
               THE WITNESS: That -- excuse me.
                                                  That may
22
          be the way I was reading it today as I read it.
23
               And, again, I would still point to they
24
          are going to go through a logic and accuracy
25
          testing on this device to get some level of
```

Page 249 assurance that the system is operational. 1 2 And also there's no mention to any seal breakage on the left-hand side of the device, 3 which would be those seals that are placed 4 5 there by the State. 6 So at -- in reading this email, I don't 7 feel like any advice was given contrary to what we would normally do. 8 9 BY MR. CROSS: 10 Q. Even if she meant that 11 ; is that right? 12 13 Even so. Because when you start taking Α. equipment out of storage and bringing it forward to 14 15 do testing, there are times when seals break in that 16 process. 17 Ο. And you don't think it would be a better 18 practice to actually investigate why the seals are 19 broken or missing before just putting new seals on 20 and putting the -- the equipment into an election? 21 MS. LaROSS: Objection to form of the 22 question. 23 THE WITNESS: Again, the equipment was in 24 the process of going through logic and accuracy 25 testing, so a level of testing was going to be

- done on the equipment and was done on the
- 2 equipment before use.
- 3 BY MR. CROSS:
- 4 Q. And when you got back to Ms. Ballance, was
- 5 it your belief at this time that logic and accuracy
- 6 testing would detect malware or any other compromise
- 7 with the equipment?
- 8 A. It was my -- my understanding of the logic
- 9 and accuracy process is that they do a process of
- 10 validating the version that is installed on the
- 11 device, and that involves looking at a hash value of
- 12 that version.
- 13 And then they perform an operational test
- 14 to confirm that the system is producing the ballots
- 15 as intended and that the ballots are then scanned
- 16 and counted as reflective to what is on the ballot.
- 17 So they were executing their logic and accuracy
- 18 test.
- 19 Q. I'm sorry. Are you saying that the
- 20 hash-matching test we talked about earlier, you
- 21 consider that part of the logic and accuracy
- 22 testing?
- 23 A. That is, I believe, documented in the
- 24 logic and accuracy outline of how counties can
- 25 verify the hash that is installed on the BMD device.

- 1 Q. So when counties do their regular logic
- 2 and accuracy testing before an election, is it your
- 3 understanding that they're also matching the hash
- 4 values for the applications on there?
- 5 A. They are matching -- they have the ability
- 6 to view the hash signature of the ICX application.
- 7 Q. But is that required of them as standard
- 8 logic and accuracy testing?
- 9 A. It is -- my recollection of the logic and
- 10 accuracy procedures is it is -- it is outlined in
- 11 the procedures to review the hash.
- 12 Q. And when you sent this email on July 9,
- 13 2020, were you under the belief that logic and
- 14 accuracy testing, including the hash value match
- 15 that you've described, would detect malware or a
- 16 compromise with the equipment?
- 17 A. I can only speak to the fact that those
- 18 were the procedures that counties were taking to
- 19 complete their logic and accuracy testing.
- Q. Right. But as of 2020, were you under the
- 21 belief that that testing would detect malware or
- another compromise on the voting equipment?
- MS. LaROSS: Object to the form of the
- 24 question.
- 25 THE WITNESS: Those were the tests that

```
Page 252
          are in place for counties to execute on their
1
 2
          equipment.
     BY MR. CROSS:
3
               That's not my question, Mr. Barnes.
 4
          Ο.
 5
               My question is: In 2020, were you under
 6
     the belief that the logic and accuracy testing that
7
     you've described would detect malware or any other
8
     compromise of the voting equipment in Georgia?
9
               MS. LaROSS: Object to the form of the
10
          question.
11
               THE WITNESS:
                             It was my belief that the
12
          tests that the counties were undertaking would
13
          give them some level of confidence that the
14
          voting system was matching to what had been
15
          certified for use by the State previously.
16
     BY MR. CROSS:
17
          Q.
               So is that a "yes" or a "no" to my
18
     question?
19
               That's a yes.
          Α.
20
               All right. Grab Exhibit 23, please.
          Q.
21
               (Plaintiffs' Exhibit 23 was marked for
22
          identification.)
23
     BY MR. CROSS:
               Just let me know when you've got that.
24
          Q.
25
               I am looking at it.
          Α.
```

- 1 Q. All right. And if you need time to read
- 2 through it, let me know.
- But just to make sure we're looking at the
- 4 same thing, do you see at the top it's an email from
- 5 Richard Barron at Fulton County on August 4, 2020,
- 6 to Dwight Brower, Derrick Gilstrap, and Timothy
- 7 Cummings?
- 8 A. That is what I'm looking at.
- 9 Q. Okay. And then if you come down to the
- 10 bottom of the second page, you'll see that it starts
- 11 with an email from Rick Barron to Chris Harvey and
- 12 Blake Evans on August 3, 2020.
- 13 A. Yes, sir.
- Q. And then if you look at the second --
- 15 well, show you the full context. Sorry. Back up.
- You see "Subject" line "questions on new
- 17 proposed procedures" in Mr. Barron's email?
- 18 A. Where in -- where in relation on the
- 19 document?
- 20 Q. So if you come to the first email on the
- 21 thread, bottom of the second page, the subject line
- 22 Mr. Barron put was "questions on new proposed
- 23 procedures."
- 24 A. Yes.
- 25 Q. And "Importance" says "High."

Page 254 Do you see that? 1 2 Α. Yes. 3 And then in his second paragraph, he writes "The County wants us to have our techs meet 4 5 the poll manager at the polling place to ensure all 6 equipment powers up. They want us to break all 7 seals, power up the BMDs to ensure that all of the 8 circuits have enough juice to power those units 9 where they are plugged. They then, want us to reseal everything for Tuesday morning." And then he 10 11 goes on to ask "Is all of this kosher and legal?" 12 Are you with me? 13 Yes. Α. 14 And then Mr. Harvey responds at the top of Q. 15 the -- top half of the first page "I think that plan 16 is possible, depending on some details," and then he 17 quotes an SEB rule -- or actually multiple SEB 18 rules. 19 Do you see that? 20 I do. Α. 21 Were you involved with this situation at Q. 22 all? 23 I was not. Α. 24 Q. As the head of EC- -- sorry. Strike that. 25 As the head of CES, do you have any

- 1 understanding as to whether the procedure that
- 2 Mr. Barron identified here about breaking all the
- 3 seals, powering up the BMDs, and then resealing
- 4 everything, whether that complies with the -- the
- 5 standards in Georgia for election security?
- 6 MS. LaROSS: Objection as to form.
- 7 THE WITNESS: It is my assumption in
- 8 reading this that what Mr. Barron is
- 9 referencing in regards to breaking all the
- seals is not physically breaking every single
- seal that's present on the BMD, but breaking
- the seal that allows you access to the power
- button that allows you to power on the BMD and
- then resealing that one location with a new
- seal after the machine had been powered on.
- 16 That is my assumption, being that I just read
- this email for the first time.
- 18 BY MR. CROSS:
- 19 Q. So you just -- you don't -- because you
- 20 haven't seen this before or dealt with it, you don't
- 21 know one way or the other what Mr. Barron was
- 22 referring to?
- 23 A. That is correct, I do not know.
- Q. But if he was -- if he literally meant
- 25 breaking all the seals, that would not be the

Page 256 appropriate procedure; right? 1 2 MS. LaROSS: Object as to form. 3 THE WITNESS: Correct. Breaking all the seals -- poll workers are only supposed to be 4 5 opening one sealed compartment on the BMD, and 6 that is the lower right-hand side. 7 BY MR. CROSS: 8 A poll worker should only be breaking a 9 single seal on a BMD on the lower right-hand side? 10 Correct. They have to open that seal the Α. 11 morning of the election in order to power the device 12 on. 13 Once the device is powered on, they are 14 instructed to close that door and place a new seal 15 on that door and notate that seal that's placed on 16 their opening and closing poll worker -- excuse me, 17 opening and closing polling place recap form. 18 Q. Okay. All right. Let me grab the next 19 exhibit. 20 (Plaintiffs' Exhibit 24 was marked for 21 identification.) 22 BY MR. CROSS: 23 All right. Grab Exhibit 24, please. Q. 24 Α. Sure. 25 Okay. I am looking at it.

- 1 Q. All right. So Exhibit 24, do you see the
- 2 top is an email from Merritt Beaver to Dave Hamilton
- 3 on August 24, 2020?
- 4 A. Yes.
- 5 Q. And at this time, Dave Hamilton was the
- 6 chief information and security officer for the
- 7 Secretary's office; right?
- A. I believe that was his role, yes, sir.
- 9 Q. Do you know who fills that role today?
- 10 A. I am not 100 percent sure. There has been
- 11 some turnover in the SOS IT, so I do not know the
- 12 name of the individual that's currently holding that
- 13 position.
- Q. Do you ever, in your work in CES, work
- 15 with a -- a vendor called Fortalice?
- 16 A. I have not worked with Fortalice. I know
- 17 that Fortalice is a company that the IT department
- 18 has used, I believe, for security assessment and
- 19 such of infrastructure that the SOS IT is involved
- 20 with.
- 21 Q. So you, yourself, have not had any
- 22 communications or meetings with Fortalice?
- 23 A. I have had one meeting with Fortalice, but
- 24 that was under guidance from our counsel. But that
- is the only interaction I've ever had with

Case 1:17-cv-02989-AT Document 1368-4 Filed 04/13/22 Page 258 of 309 Page 258 1 Fortalice. 2 When you say a meeting with Fortalice Q. 3 under quidance from your counsel, what do you mean? I was asked to meet with Fortalice in 4 5 their offices in Washington, D.C., in -- at a 6 request of our attorneys in this case. 7 Q. When was --MS. LaROSS: And, David, this is the --8 9 connected to the document that the Court has 10 already ordered is subject to the attorney work 11 product privilege. So, you know, anything 12 about -- or substantively about that meeting or connected in any way with that document is --13 14 is privileged under the court order. 15 BY MR. CROSS: 16 When was that meeting, Mr. Barnes? 17 Α. I believe it was in 2019, I believe. 18 think it was in maybe April of 2019, April or May, I 19 think. 20 And without getting into the substance of 21 what was discussed, what was the -- what was your 22 understanding as to the purpose of that meeting?

understanding as to the purpose of that meeting?

MS. LaROSS: I -- I object and I'm going

to instruct him not to answer. I think that

does fall within the Court's order and the

```
Page 259
1
          privilege.
2
               MR. CROSS: The purpose of the meeting --
3
               MS. LaROSS: Yes.
               MR. CROSS: -- is privileged?
 4
 5
               MS. LaROSS: Yes.
 6
               MR. CROSS: We'll disagree on that.
7
     BY MR. CROSS:
               Who was at that meeting?
 8
          Q.
               My recollection was members of Fortalice
9
          Α.
10
     and myself.
11
          Q.
              Anyone else?
12
          Α.
               My recollection, it was me and -- and
13
    members of Fortalice.
14
               Were there any lawyers in that meeting?
          Q.
              I do not recall if we had a lawyer present
15
          Α.
16
     in the meeting room.
               And you -- you traveled up to D.C. for
17
          Q.
18
     that meeting; is that right?
19
          Α.
               I did.
20
              How long was that meeting?
          Q.
21
               It was one day.
          Α.
22
               And did this concern the Dominion
          Q.
23
     equipment or the DRE equipment?
24
          Α.
               The DRE equipment.
25
               Did you ever participate in any meetings
          Q.
```

```
Page 260
     with Dominion regarding the -- sorry. Strike that.
1
 2
               Did you ever participate in any meetings
3
     with Fortalice regarding the Dominion equipment?
 4
          Α.
               I have not.
 5
               So this meeting that you had with
     Fortalice regarding the DRE equipment, what was
 6
7
     discussed there?
 8
               MS. LaROSS: I object to the form of
9
          the -- not the form of the question. I object;
10
          I think it's privileged and within the scope of
11
          the Court's order. So I'm going to instruct
12
          him not to answer.
13
               MR. CROSS: What's the basis of that?
          The -- the Court's order regarded something
14
15
          totally different.
16
               MS. LaROSS: It's my understanding that
17
          the Court's order pertains directly to this.
                                                         Ι
18
          may -- you and I may disagree on that.
19
               MR. CROSS: But help me understand the
20
          basis, though. The Court's order regarded
21
          Dominion BMD equipment that Fortalice looked at
22
          in November of 2019. It has nothing to do with
23
          this. So what's the basis for the instruction?
24
               MS. LaROSS: As I stated, it is -- I -- I
          believe that it is within the Court order.
25
```

```
Page 261
1
              MR. CROSS: Okay. But can you help me
2
         understand what the linkage is you're drawing?
         You just don't know?
3
              MS. LaROSS: I can -- let -- you can bring
 4
5
         up the order and we can discuss it, but that's
 6
         my understanding of the order.
7
              MR. CROSS: Okay.
8
    BY MR. CROSS:
9
         Q. Mr. Barnes, are you going to decline to
10
    answer questions about that meeting at the direction
11
    of your counsel?
12
         Α.
              I am.
13
              MR. CROSS: All right. We'll reserve on
14
         that.
    BY MR. CROSS:
15
16
         Q. All right. Do you have an exhibit in
17
    front of you?
18
         A. 24?
19
         Q. Yes.
20
         A. Yes, sir.
21
              All right. So, again, we're looking at an
         0.
22
    email from Merritt Beaver to Dave Hamilton
23
    August 24, 2020; right?
24
         A. Yes, sir.
25
         Q. And if you come down, there's an email --
```

```
Page 262
     the first email in the thread is from Dave Hamilton
1
     on August 21, 2020.
2
3
               Do you see that?
          Α.
              Yes, sir.
5
          Q.
              And he writes "
 6
7
9
10
11
12
               Do you see that?
13
               I do.
          Α.
14
               Do you agree with Mr. Hamilton's
     assessment, in your role as the head of CES, that
15
16
17
18
               It has been the custom of the Secretary of
19
     State's office that if -- that we do not disclose
20
     information that we feel like could be damaging to
21
     the voting system.
22
               And in this email, I don't know what
23
    Mr. Hamilton is referencing or talking about in --
24
     is this talking in reference to the voting system or
25
     such? I don't know.
```

Case 1:17-cv-02989-AT Document 1368-4 Filed 04/13/22 Page 263 of 309 Page 263 And what kind of information could be 1 Ο. 2 damaging to the election system if disclosed 3 publically? Well, if you have complete, unfettered 4 5 access to the applications and have the ability to 6 go in and manipulate them at the code level, then 7 you may be able to make the system do something that 8 it's not supposed to do. What other kinds of information would be 9 0. 10 damaging to the election system if publicly disclosed? 11 12 MS. LaROSS: Objection to form of the 13 question. 14 THE WITNESS: Well, again, unfettered 15 access into the voter registration system gives you access to -- which is a part of the voting 16 17 system -- is personal data information, date of 18 birth, driver's license numbers, information 19 that is contained in those voter files. 20 The voting system, the voter registration 21 system, are all components that our office work

22 to keep secure.

- 23 BY MR. CROSS:
- 24 Q. The -- the voting equipment in Georgia is
- supposed to be kept in secure facilities across the 25

Page 264 state; right? 1 2 It's supposed to be kept in Α. 3 county-maintained locations with efforts to keep it 4 secure, yes, sir. 5 So given that, why would you ever have to worry about Why would you 6 7 ever have to worry about information being damaging to the election system, since it's locked up? 8 9 MS. LaROSS: I object to the form of the 10 question. THE WITNESS: Indi- -- individual voters 11 12 touch voting machines with every election. 13 People witness the tabulation of votes in 14 elections offices where equipment is out and in 15 full view of people. Those offices become 16 hectic on election night. There are a lot of 17 people around. 18 So keeping the system secure in relation 19 to physical access, but also keeping 20 information secured in relation to how systems 21 operate, is also important. 22 BY MR. CROSS: 23 What's the -- you mentioned individual 24 voters touch voting machines at every election. 25 Why -- why does that matter, from a

Page 265 security standpoint? 1 2. MS. LaROSS: Objection to form of the 3 question. THE WITNESS: Voters interact with 5 devices. That means they touch devices. touch these devices under the purview of poll 6 7 workers. They touch these devices under the purview of other voters at the same time. 8 We're doing everything we can do to make 9 10 sure that when a voter is interacting with that 11 system, that they have no way of interacting 12 with the system to introduce anything 13 nefarious. 14 That is the reason that we put seals in 15 That is the reason that we have poll 16 watchers that are watching things. That is the 17 reason that we have poll workers who are 18 watching things constantly, is to make sure 19 that when there is added activity of voters, of 20 individuals in the polling place, when people 21 are in the process of doing logic and accuracy 22 testing, that all of these protocols, these 23 procedures, are maintained and in place to try 24 to protect and keep the voting system safe. 25

Page 266 1 BY MR. CROSS: 2 And the security of that system depends, Q. 3 in large part, on being able to trust all the 4 individuals who have access to it; right? 5 That is correct, we have a level of trust 6 with those people that work in the elections 7 environment. 8 Except the Secretary of State has 9 repeatedly argued in our case that they cannot be 10 trusted with hand-marked paper ballots. 11 How do you reconcile those two positions? 12 MS. LaROSS: I object to the form of the 13 question. 14 Policymakers are going to THE WITNESS: 15 make decisions on how tasks are executed. 16 the legislative body of the State of Georgia 17 has instituted that we have this system in place, and that's the system that we use. 18 19 BY MR. CROSS: 20 Well, that's not quite right. Q. 21 The legislature in Georgia did not require 22 a BMD-based system that uses QR codes; right? 23 MS. LaROSS: Object to the form of the 24 question. 25 The -- the legislature THE WITNESS:

```
Page 267
          passed a resolution indicating that the State
1
 2
          would have a uniform system of voting, and
 3
          protocols have been put in place for that
          system to be a BMD design.
 5
               And then the Secretary of State put out a
 6
          bid for a BMD-based voting system, and that bid
7
          was answered by vendors. Those responses were
          reviewed. The procurement process isolated the
 8
 9
          system that we have, and that is the system
10
          that we are using.
     BY MR. CROSS:
11
12
               The answer to my question is "yes"; right?
          Ο.
     The legislature in Georgia did not require a BMD
13
14
     system that uses QR codes.
15
               We're agreed on that; right, sir?
16
               MS. LaROSS: I object to the form of the
17
          question.
18
               THE WITNESS:
                             The legislature did not put
19
          into the code a BMD device with QR code, that
20
          is correct.
21
     BY MR. CROSS:
22
               That's a decision that the Secretary,
          Q.
23
     Secretary Raffensperger, made; right?
24
               MS. LaROSS: Objection to form of the
25
          question.
```

```
Page 268
                             The RFP process, through
1
               THE WITNESS:
 2
          evaluation of proposals, selected a BMD system
 3
          that uses a QR code.
     BY MR. CROSS:
 4
 5
               So coming back to the question I asked you
     a moment ago that I don't -- I don't think you
 6
7
     actually answered, how do you reconcile the position
 8
     that you have an election system the security of
9
     which depends, in large part, on trusting everyone
10
     who has access to it with the position repeatedly
11
     taken by Secretary Raffensperger that those people
12
     cannot be trusted with access to hand-marked paper
13
    ballots?
14
               MS. LaROSS: Object to the form of the
15
          question.
16
               THE WITNESS: I -- excuse me.
17
          member of the Secretary of State's office, and
18
          my job is to work hand in hand with county
19
          election officials that are -- that have the
20
          task of executing elections.
21
               So from my point of view and from my -- I
22
          reconcile in my mind that our job is to work to
23
          empower and enable those county election
24
          officials to do the best job that they can.
25
               Again, policymakers, who are -- who are
```

```
Page 269
          above me, may have differing opinions on what
1
          counties can do and what counties can't do.
2
          And those decisions they will be held
 3
          accountable for by the voters.
 5
               So my job, I will continue to work with
 6
          county election officials and do the best I can
7
          to help support them.
     BY MR. CROSS:
 8
9
              And you said policymakers can be held
     accountable by the voters. In fact, the Georgia
10
11
     Republican party has made explicit in its platform
     calling for hand-marked paper ballots in the State
12
13
     of Georgia.
14
               Are you aware of that?
15
               MS. LaROSS: I object to the form of the
16
          question.
17
               THE WITNESS: I believe I'm aware of that,
18
          but I'm -- I haven't read that recently.
19
          believe that is the case.
20
     BY MR. CROSS:
21
               And do you have a personal view on the
22
     reliability of hand-marked paper ballots as a voting
23
     system for Georgians?
24
               MS. LaROSS: I object to the form of the
25
          question.
```

Page 270 THE WITNESS: Election vendors have 1 2 designed a various litany of voting systems. Some are -- some use nothing but hand-marked 3 paper ballots that go through scanners. 5 use a combination of BMD-generated ballots with and without bar code. Some are old optical 6 7 scan systems. And there are still jurisdictions that are using old lever machines 8 that haven't been produced in a long time. 9 10 Some jurisdictions are using paper ballots that 11 are hand-counted. Each jurisdiction, each 12 state, and in some cases each county, makes the determination of what equipment they use. 13 14 I once did research trying to figure out 15 how reliable optical scan ballots were in 16 relation to undervotes. I undertook that in 17 2001, early 2002, and found that optical scan 18 systems at that time had a high level of 19 undervote capture. 20 Now, systems have improved since then, and 21 if policymakers make a decision that the State 22 of Georgia needs to transition away from its 23 current system into a different system, we'll 24 be ready to help implement that system and keep 25 moving forward.

Page 271 BY MR. CROSS: 1 2 Mr. Barnes, let me come back to the Q. 3 question I asked you. 4 Do you have a personal view --5 irrespective of what any jurisdiction is doing around the country, as someone who's been working 6 with elections for two decades, do you have a 7 personal view on whether hand-marked paper ballots 8 9 are a reliable method of voting? 10 MS. LaROSS: I object to the form of the 11 question. 12 THE WITNESS: I think any system that 13 jurisdictions use, whether it's a BMD system 14 that's been through federal testing and state 15 testing, whether it's an optical scan system 16 that's been through federal testing and state 17 certification testing, a hand-marked paper 18 ballot system that's been through levels of 19 testing, I believe all of those voting systems 20 are reliable for use by whatever jurisdiction 21 chooses to use them. 22 BY MR. CROSS: In fact, Georgia does currently process 23 24 millions of hand-marked paper ballots through its

absentee voting system; right?

25

Page 272 1 Α. It does. 2 And you certainly would not suggest Q. 3 there's anything unreliable about that system; right? 4 5 I would not suggest that. I believe it is 6 very reliable. 7 Are you aware that the current Dominion Q. 8 system can process, scan, tabulate hand-marked paper 9 ballots at the precincts on election day? 10 MS. LaROSS: Objection as to form of the 11 question. 12 THE WITNESS: The -- the ICP scanner that 13 is sent out to a polling location on election 14 day has the ability to process either a 15 hand-marked paper ballot or a BMD-generated 16 ballot. 17 BY MR. CROSS: 18 Q. Are you aware that BM- -- sorry. Strike 19 t.hat.. 20 Are you aware that Georgia is the only 21 state in the country that uses BMDs as the primary 22 means of voting statewide? 23 MS. LaROSS: I object to the form of the 24 question. 25 I am not certain on that. THE WITNESS:

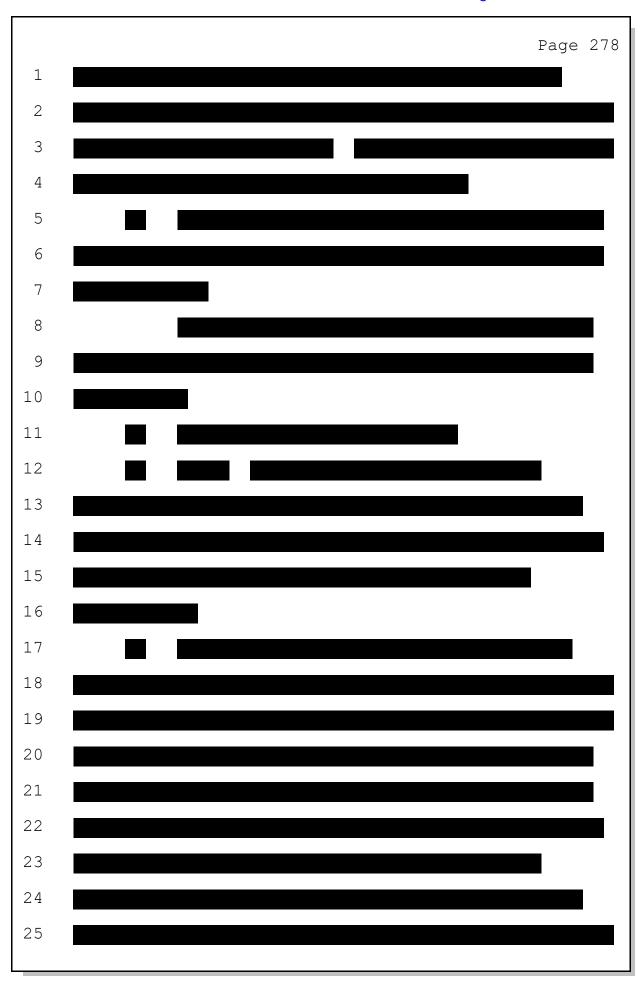

```
Page 273
     BY MR. CROSS:
1
 2
               Would it surprise you to learn that that's
          Q.
3
     true?
               MS. LaROSS: Object to the form of the
 5
          question.
               THE WITNESS: I -- I don't -- I don't know
7
          if it would surprise me or not. I know that
 8
          Georgia has been using an electronic form of
9
          voting for almost 20 years now, that there were
10
          states that instituted electronic forms and
11
          have now transitioned back to hand-marked paper
12
          ballots or optical scan ballots, and
13
          continue -- and there are jurisdictions that
14
          continue to assess and adopt new systems.
15
     BY MR. CROSS:
16
              Are you aware that scanners now have
17
     developed to the point that they can flag under- and
18
     overvotes on hand-marked paper ballots at the point
19
     at which the voter scans the ballot so that the
20
     voter can then go back and indicate whether they
     intended that or not?
21
22
          Α.
               I am.
23
               MS. LaROSS: Objection as to form.
24
               THE WITNESS: Excuse me.
25
               I am.
```

- 1 BY MR. CROSS:
- 2 Q. And are you aware of whether the current
- 3 Dominion scanners have that capability in Georgia?
- 4 A. I am aware, and they do.
- 5 Q. Do you know if that's turned on?
- 6 A. The system currently is configured to
- 7 reject overvotes, so any overvote that's introduced
- 8 into the scanner is flagged and sent back to the
- 9 voter.
- 10 An undervoted ballot is not rejected,
- 11 because the voter has the right to undervote a
- 12 ballot.
- 13 Q. So one question on terminology.
- In the emails that I've seen, sometimes
- 15 there's discussion of "tabulator," as distinct from
- 16 "BMD."
- 17 What's the tabulator?
- 18 A. Okay. A tabulator -- the way I reference
- 19 it, a tabulator is a device that counts ballots.
- 20 Q. So that would be --
- 21 A. There are three -- there are three types
- 22 of tabulator in our election project.
- 23 There is -- a BMD is a classification of
- 24 tabulator. It does not tabulate votes, but it does
- 25 count the number of ballots it produces.

Page 275 An ICP, which is a polling place scanner, 1 is a tabulator. It counts votes, it counts every 2 ballot that's scanned, but it also tabulates a 3 result from that scanned ballot. 4 5 And then the ICC, the central scanner, is a tabulator. It counts ballots as ballots are 6 7 passed through in the scanning process, but it also 8 tabulates the result from those scanned ballots. Got it. Okay. Thank you. 9 Ο. 10 All right. Let me pull up the next exhibit. 11 12 (Plaintiffs' Exhibit 25 was marked for identification.) 13 14 BY MR. CROSS: 15 All right. Grab Exhibit 25, if you would. Q. 16 MR. CROSS: Are you doing all right, 17 Mr. Barnes? 18 THE WITNESS: Yeah, I'm hanging in there 19 with you right now. 20 MR. CROSS: Okay. 21 THE WITNESS: And you said 25? 22 BY MR. CROSS: 23 Q. Yes, sir. 24 Α. Okay. I am on -- I've got it open. 25 Okay. Do you see Exhibit 25 is an email Q.

```
Page 276
     from Blake Evans to Gabriel Sterling and Chris
1
2
     Harvey on September 10, 2020?
3
          Α.
               Yes.
               Okay. And if you come down -- let's see.
5
     If you come down, the email immediately below is an
 6
     email from Gabe Sterling forwarding on an email from
7
     Rick Barron on September 10, 2020.
8
               Do you see that?
9
          Α.
               I do.
10
               And Mr. Barron's email has the subject
          Q.
11
     line "
12
               Do you see that?
13
               I do.
          Α.
14
               And then if you come down to the
          Q.
15
     second-to-last paragraphs -- it's the top half of
16
     the second page just above where Rick signs off
17
                " -- do you see the paragraph that
     begins "
18
19
          Α.
               I do.
20
               And here, Mr. Barron writes to
          Q.
21
    Mr. Sterling "
22
23
24
25
```

```
Page 277
 1
 2
               Do you see that?
 3
               I do.
          Α.
               MS. LaROSS: David, I did have a question.
 4
 5
          I'm sorry to interrupt, but this is a document
 6
          that's been marked AEO, so this ought to be a
 7
          confidential portion of the deposition, all
          questions about this document.
 8
 9
               MR. CROSS: Okay. Understood.
10
               MS. LaROSS: Thank you.
11
               MR. CROSS: And we don't understand why
12
          it's AEO, but we -- we'll just reserve on that.
13
          I understand your -- your position.
14
                            Thank you.
               MS. LaROSS:
15
     BY MR. CROSS:
16
17

20
21
22
23
24
25
```

```
Page 279
1
2
3
 5
 6
          Q. All right. Let me grab the next one.
7
               (Plaintiffs' Exhibit 26 was marked for
          identification.)
8
    BY MR. CROSS:
9
10
          Q. Just let me know when you've got that.
         A. Okay. Sorry. I'm refreshing.
11
12
          Q.
              Okay. I think it's 26.
13
              Okay. I've got it open.
          Α.
14
               All right. So at the top, this is an
          Q.
15
    email from Scott Tucker to you that you received on
    September 29, 2020; right?
16
17
          Α.
              Yes.
18
          Q.
              And it begins with an email that
19
    Mr. Tucker sent you on the same date.
20
               Do you see that at the bottom?
21
          Α.
              I am looking at it now.
22
               And Mr. Tucker wrote "You have received
          Q.
23
     access to a DVS File Share from Scott Tucker."
24
               Do you see that?
25
               I do.
         Α.
```

Page 280 And below, he writes "Michael, here are 1 Q. the instructions for updating the software on the 2 ICX." 3 Do you see that? 5 Α. I do. 6 And do I understand correctly that this Q. 7 was instructions involving the software change on the BMDs we talked about earlier that Pro V&V 8 characterized as de minimis? 9 10 Α. Yes. 11 Q. And then you write back "My password is 12 not accessing the link." 13 Do you see that? I do. 14 Α. And he writes "Try the standard sos 15 Q. 16 password." 17 Is there -- is there a -- what does he 18 mean by "standard Secretary of State password"? 19 I'd have to recall what we were putting in 20 place there now. There -- when we first build an 21 Election Management -- or when Dominion were putting 22 together the initial Election Management computers, there was a -- a -- a starting point username and 23 24 password that we use on that system. But then once 25 it was assigned to an individual county, then that

- 1 county had an updated password assigned to that
- 2 administrative sign-in point.
- 3 So my assumption here is that he's talking
- 4 about that password that we use just on the initial
- 5 structure of the file, before it is then replaced by
- 6 individual and county passwords.
- 7 Q. So that standard password was still in use
- 8 at this time; right?
- 9 A. Well, again, when we build individual
- 10 projects or build -- build out the server for a
- 11 county, it was -- had a password that we assigned to
- 12 it during its setup and testing phase.
- 13 And then after it has been completed and
- 14 tested and we knew where it was going to be assigned
- 15 at the county, once it was assigned at the county,
- 16 that password was updated with a new county-specific
- 17 password.
- 18 Q. Did the standard password work for you
- 19 here? There's no follow-up email from you that's --
- 20 A. I -- you know, I don't recall.
- 21 Q. Do you have any reason to believe it
- 22 didn't?
- 23 A. I -- I don't know. I can't remember. I
- 24 mean, I know we got the file from that
- 25 Dominion-controlled site, but I can't recall if that

- 1 password or a different password was used to access
- 2 it. I do not know.
- 3 Q. And one other question about -- I forgot
- 4 to ask earlier on this change in the BMD software in
- 5 September, October of 2020.
- It went from Democracy version ending in
- 7 .30 to .32. Was there a .31, or did they skip that?
- A. I don't know if there was a .31. We were
- 9 only provided .32.
- 10 Q. And you were originally using .30; is that
- 11 right?
- 12 A. That is correct.
- Q. Does the Secretary's office provide any
- 14 requirements for the counties on instructions for
- voters on the importance of reviewing their BMD
- 16 ballots?
- MS. LaROSS: Objection to form of the
- 18 question.
- 19 THE WITNESS: The Secretary of State's
- office, you know, educated counties that when
- 21 they're training their poll workers, their poll
- workers that are stationed near the ICPs should
- 23 be instructing voters to please review their
- 24 ballot, make sure it is correct before entering
- 25 it into the scanner.

Page 283 Did the Secretary of State's -- has the 1 2 Secretary of State's office written a document 3 outlining those procedures? I would have to check. I am not sure. 5 BY MR. CROSS: 6 Based on your experience with this system Q. and with elections over the years, is it important 7 for voters to review their BMD ballots? 8 9 I think it's important for a voter to always review their ballot, whether it was on a DRE 10 11 before they hit "Cast," whether it's been printed 12 from a BMD and before it's inserted into a scanner. If they were filling out a paper ballot, before they 13 14 return it to the elections office, they should 15 always double-check it. Do I have reason to believe that if it's 16 not correct, the system is going to do something 17 18 nefarious? No. If it's not -- if it's something 19 that the system is not expecting to receive, it's 20 not going to take it. 21 Well, if the ballot has a QR code that is Ο. 22 of the type that the scanner is designed to 23 tabulate, but it -- it captures different selections 24 than the voter intended and actually casts on the 25 BMD, the scanner's not going to kick that out;

```
Page 284
    right?
 1
 2.
               MR. CROSS: Shoot. He's freezed.
 3
               COURT REPORTER: Yeah, I don't hear
          anything.
 5
               VIDEOGRAPHER: Yeah.
 6
              MR. CROSS: I think we lost --
 7
              VIDEOGRAPHER: Would you like to go off
 8
          the record?
 9
              MR. CROSS: It's funny, we can see Diane,
10
         but Michael's gone.
11
              MS. LaROSS: I think Michael's screen
12
          froze.
13
              MR. CROSS: Oh.
14
               VIDEOGRAPHER: Would you like to go off
15
         the record, Counsel?
16
              MR. CROSS: Yeah.
17
               VIDEOGRAPHER: The time is 4:39 p.m.
         We're off the record.
18
19
               (Off the record.)
20
               VIDEOGRAPHER: The time is 4:42 p.m.
          We're on the record.
21
22
               MR. CROSS: So, sorry, let me get back to
23
          where I was.
24
               Did I really say "he's freezed"? That's
25
          terrible. That's terrible. That's what I
```

```
Page 285
          said. Okay. I wish I got an errata.
1
                                                 That's
2
          embarrassing.
    BY MR. CROSS:
3
               Okay. All right. So the question I was
 4
          0.
 5
     asking you, Mr. Barnes, was: If the ballot has a QR
 6
     code that is of the type that the scanner is
7
     designed to tabulate, but it captures different
8
     selections than the voter actually cast on the BMD,
9
    the scanner would still -- would still tabulate
10
     that; right?
11
               MS. LaROSS: Object to the form of the
12
          question.
13
               THE WITNESS: The scanner is designed to
14
          tabulate what is contained within the QR code.
15
    BY MR. CROSS:
16
              Based on your experience with elections
17
    over the years and what you know about the current
18
    environment of -- of threats -- sophisticated
19
    threats to U.S. elections, would you personally be
20
    more comfortable with an election system that does
21
    not use QR codes, where voters can actually read
22
    what's going to get tabulated?
23
               MS. LaROSS: I object to the form of the
24
          question.
25
               THE WITNESS: What I can speak to is I do
```

Page 286 have confidence, and continue to have 1 2 confidence, in the voting system that we have, 3 which just uses a QR code to interpret the intent of the voter. 5 But in our use of the voting system, through testing, continued testing, through 6 7 federal testing, state testing, logic and accuracy testing, postelection audits that are 8 9 done, that what is -- the hand count that was 10 redone of all the voting ballots generated by 11 BMDs in the November '20 election that 12 correlated what the QR code had calculated 13 versus what the eyes read on the ballot from 14 the text format, I have a high level of 15 confidence that the voting system that we use, 16 which does have a QR code, is showing accurate 17 intent of the voter. 18 BY MR. CROSS: 19 All right. Well, I want to break that 20 down into some pieces, but first let me come back to 21 the question I asked you, which is: Would you 22 personally prefer a system that does not tabulate a 23 QR code, but instead tabulates human-readable text 24 where voters know that what's going to get tabulated is what they, themselves, can read? 25

Page 287 MS. LaROSS: Object to the form of the 1 2 question. THE WITNESS: Vendors are going to 3 generate voting systems based upon the demand 5 of the marketplace. And at the time, at the time that the 6 7 State of Georgia was in the marketplace looking 8 for a voting system, the procurement process 9 gave us the system that we have, which I do 10 have confidence in. 11 The State of Georgia will make a decision 12 moving forward in the future on whether to 13 maintain the system as we have or to transition 14 to other systems. There is some discussion of 15 transitioning to hand-marked paper ballots 16 or -- that may be hand counted, that may be 17 processed through scanners, and the 18 policymakers in place will make the decision 19 that they feel is best for the State of 20 Georgia. I'm not in a position to where I can 21 make that decision on what the system will be. 22 I have confidence in hand-marked paper 23 ballot systems that are procured -- that 24 vendors are putting forth; I have confidence in 25 electronic systems that vendors are putting

```
Page 288
          forth. I feel like the vendor community is
1
 2
          doing a good job of putting products out there
 3
          and giving options to counties and states on
          what to select.
 4
 5
     BY MR. CROSS:
 6
               Mr. Barnes, let me try it again.
          Q.
 7
               Yes or no, do you have a personal
     preference -- do -- would you personally feel more
 8
9
     comfortable casting a ballot in Georgia elections
     where the -- where the portion that's getting
10
11
     tabulated is what you, yourself, can read? Just yes
12
     or no?
13
               MS. LaROSS: Objection to form of the
14
          question.
15
               THE WITNESS: I support the voting system
16
          that we have today. I like the QR code from a
17
          reliability standpoint, that when a computer is
18
          reading something, it reads that code, it
19
          interprets it, and it translates what is in
20
          that code. And I feel confident that what's in
21
          that code is what the voter has intended to be
22
          placed in that code.
23
     BY MR. CROSS:
24
          Q.
               But you've already said that you have no
     doubts about the reliability of the system scanning
25
```

Page 289 human -- I'm sorry -- scanning hand-marked paper 1 2 ballots; right? 3 MS. LaROSS: I object to the form of the question. 5 THE WITNESS: Yes, I have confidence that 6 our system is scanning hand-marked paper ballots properly and reflecting the intent of 7 8 the voter. 9 We have a system that actually gives us 10 both options and we are currently using both 11 options, and I have confidence in both options. 12 BY MR. CROSS: 13 Ο. Well, under the -- under the new Georgia 14 statute, it's not as easy to vote absentee as it 15 used to be; right? 16 MS. LaROSS: Objection to the form of the 17 question. 18 THE WITNESS: There have been changes to 19 the election statute in Georgia in reference to 20 when absentee ballots -- the length of time 21 absentee ballots can be issued prior to an 22 election, the amount -- how those absentee 23 ballots are returned to the county elections 24 office for tabulation purposes. There have 25 been changes to the election statute, yes.

Page 290

- 1 BY MR. CROSS:
- 2 Q. You said at the time that this system was
- 3 selected -- let me just get what you said, because I
- 4 want to make sure I get it right.
- 5 You said "...at the time that the State of
- 6 Georgia was in the marketplace looking for a voting
- 7 system, the procurement process gave us the system
- 8 that we have..."; right?
- 9 A. Yes, sir.
- 10 Q. Were you aware that before the Secretary's
- 11 office announced that it was adopting this BMD
- 12 system, the Secretary's own election security
- 13 expert, Michael Shamos, testified that you should
- 14 not use QR codes in election systems?
- MS. LaROSS: I object to the form of the
- 16 question.
- 17 THE WITNESS: I am not aware of that.
- 18 BY MR. CROSS:
- 19 Q. And you also testified that demand is a
- 20 significant driver of the types of election systems
- 21 that are produced by vendors; right?
- 22 A. I believe so, yes.
- Q. And as the head of CES for Georgia, you
- 24 actually play a pretty meaningful role in -- in
- 25 shaping that demand; right?

Page 291 1 MS. LaROSS: Objection to the form of the 2 question. THE WITNESS: 3 My role at CES is to become a high-level user of the voting system that the 4 5 State of Georgia has selected for use, whatever 6 that system may be. 7 BY MR. CROSS: Are you familiar with the SAFE Commission? 8 Q. I believe that was a commission that the 9 Α. 10 Secretary of State instituted, yes. 11 Ο. And, in fact, Governor Kemp, when he was 12 the Secretary of State, created the SAFE Commission 13 to advise on what the next election system should 14 be; right? 15 I believe that is true, yes. 16 And are you familiar with Professor Wenke Lee. 17 18 Α. I remember meeting Professor Lee, yes. 19 In what context did you meet Dr. Lee? Q. 20 I believe I met him at one of the Α. 21 commission meetings. 22 Q. And did you talk with him about his views? 23 Not directly one-on-one, no, sir. Α. 24 Q. Did you share any personal views of your 25 own with him or anyone on the SAFE Commission about

```
Page 292
    the election system?
1
2
               MS. LaROSS: Objection as to form.
               THE WITNESS: My recollection of
3
          interaction with the SAFE Commission is I
 5
          attended one meeting of the SAFE Commission.
                                                        Ι
 6
          think I attended a meeting that they had in
7
          Savannah. But that was my interaction with the
 8
          SAFE Commission.
    BY MR. CROSS:
9
10
               Do you recall that Dr. Wenke Lee was the
          Q.
11
    only cybersecurity expert who served on the
12
     SAFE Commission, and he was hand-selected by
13
    Governor Kemp?
14
               I believe that to be the case.
          Α.
15
              And are you aware that --
          Q.
16
               COURT REPORTER: Excuse me. I -- excuse
17
         me. I'm sorry. I have an emergency. Just
18
          give me one second. Sorry.
19
               VIDEOGRAPHER: The time is 4:51 p.m.
20
         We're off the record.
21
               (Off the record.)
22
               VIDEOGRAPHER: The time is 4:52 p.m.
23
          We're on the record.
24
    BY MR. CROSS:
25
               Sorry. I think you answered this yes, but
          Q.
```

Page 293 I'm not sure she got it, so let me just ask the 1 2 question again, Mr. Barnes. Do you recall that Dr. Wenke Lee was the 3 only cybersecurity expert on the SAFE Commission, 4 5 and he was selected by then-Secretary Kemp? 6 MS. LaROSS: I object to the form of the 7 question. THE WITNESS: Yes, that's my recollection. 8 9 BY MR. CROSS: 10 Were you aware that Dr. Wenke Lee objected Q. 11 to using BMDs in the State of Georgia and 12 specifically urged the adoption of hand-marked paper 13 ballots? 14 MS. LaROSS: Object to the form of the 15 question. 16 THE WITNESS: I seem to recall that 17 Dr. Lee wrote a -- I'll phrase it as a 18 dissenting opinion of what the -- what the 19 SAFE Commission found -- issued. 20 BY MR. CROSS: 21 And in particular, his opinion was that in 22 the current environment of threats to U.S. 23 elections, BMDs are not sufficiently secure and, instead, hand-marked paper ballots should be used; 24 25 right?

```
Page 294
1
               MS. LaROSS: Objection as to form.
 2
               THE WITNESS: I believe that's what he
 3
          stated.
     BY MR. CROSS:
 4
 5
               I just want to make sure we all understand
 6
     where we are.
7
               Georgia has an election system that the
8
     sole cybersecurity expert on the SAFE Commission
9
     objected to; Dr. Michael Shamos, who was the
10
     election security expert in this case for the
11
     Secretary, objected to; and that the current
12
     election security expert for the State, Dr. Juan
     Gilbert, has said he doesn't disagree with any of
13
14
     the technical vulnerabilities Dr. Halderman has
15
     found.
16
               And just so I understand, you feel, as the
17
     head of CES, in light of all that, this is a system
18
     that voters should have confidence in; is that
19
     right?
20
               MS. LaROSS: Object to the form of the
21
          question.
               THE WITNESS: I feel like through the use
22
23
          of this voting system, that the voting system
24
          proved itself in the November 2020 election,
25
          where the ballots were not only counted once by
```

Page 295 the scanners that were used in the polling 1 2 locations with the ballots that were produced 3 from the BMDs, but counted by hand using the text format on the ballot, came to the same 5 result as the scanners were count -- counted, and then, thirdly, were counted a third time 6 7 using the central scanners and tabulated a result that again was in line with what was 8 found in the previous two counts. 9 10 So I feel like the voting system in 11 Georgia is a reliable, trustworthy voting 12 system. There will be others that do not agree with that opinion, but I feel like we do have a 13 14 safe and secure voting system in Georgia. 15 BY MR. CROSS: 16 It doesn't concern you, as the head of 17 CES, that there's not a single election security 18 expert that has endorsed this system on the behalf 19 of the Secretary, literally not one? 20 MS. LaROSS: I object to the form of the 21 question. 22 THE WITNESS: We always want to have 23 people that like the things that we do, and we 24 feel like we have done an extremely good job of 25 instituting a new voting system, making sure

Page 296 1 that it's accessible to our voters, and that it 2 is reflective of what the voters wish to purvey 3 to the State when an election takes place. BY MR. CROSS: 4 5 Can you identify one cybersecurity election expert that has endorsed the current 6 7 Georgia system as a reliable voting system? 8 I cannot. 9 Ο. Is voter confidence in that system 10 important? Voter confidence in all that we do as the 11 Α. 12 elections divisions important. It's important that they have confidence in the people that run 13 14 elections. It's important that they have confidence 15 in the systems that we use. It's important that 16 they have confidence in the voter registration 17 system. 18 And we work day in and day out doing what 19 we can to secure the system that we have. 20 But if you're confident that the system is Q. 21 secure, particularly in an environment now where 22 there have been extraordinary claims made about the 23 reliability of that system, why not just have an 24 election security expert analyze it, examine it, and 25 offer an opinion on whether it's reliable?

```
Page 297
1
               MS. LaROSS: I object to the form of the
2
          question.
               THE WITNESS: I'm sure if the
3
          Secretary of State decided that he wanted to do
 4
 5
          that, that that would get done.
 6
     BY MR. CROSS:
7
              And as you sit here, you don't know why
          Q.
8
     he's not decided that; right?
9
               MS. LaROSS: I object to the form of the
10
          question.
               THE WITNESS: I do not.
11
12
     BY MR. CROSS:
13
          Q. Do you think voters would have more
14
     confidence in a system that did not use QR codes,
15
     where what was getting tabulated, they could
16
     actually read for themselves?
17
               MS. LaROSS: I object to the form of the
18
          question.
19
               THE WITNESS: I don't know. Voters have
20
          confidence in systems, and it seems like in
21
          today's environment, voters only have
22
          confidence in systems that -- where the people
23
          that they supported in the election won and
24
          they don't have -- they don't have good
25
          confidence in systems when their candidate of
```

```
Page 298
          choice doesn't win.
1
               So the -- the world of elections is -- is
 2
          continually under -- under a lot of stress and
3
 4
          strain as we try to do the work that we can to
 5
          allow voters their voice on the direction of
 6
          the country, of the state, and of their
7
          counties.
     BY MR. CROSS:
 8
9
               Mr. Barnes, we'd certainly agree that we
     find ourselves in a pretty sad condition on how some
10
11
     voters view the election system, but doesn't that --
12
               MS. LaROSS: Object --
13
     BY MR. CROSS:
14
               -- why doesn't that raise all the more for
          Q.
15
     the Secretary to bring someone in and do a robust
16
     examination of this system and say, "I've looked at
17
     it and I have reasonable confidence that it's not
18
     compromised, it's reliable, and you can trust it"?
19
               MS. LaROSS: I object to the form of the
20
          question.
21
               THE WITNESS: Well, before the system was
22
          ever procured by the State, it went through a
23
          federal testing lab for inspection against and
24
          validation with the federal voting standards
25
          for voting equipment. So we had some level of
```

```
Page 299
          confidence even before procurement that the
1
2
          voting system in place is operational and
3
          secure and functioning properly.
               Whatever the Secretary of State chooses to
 4
 5
          do from this point forward on how to analyze
 6
          the voting system, whether it be this voting
7
          system, whether it be a different voting
          system, I'm sure that task will get executed
 8
9
          and -- and done thoroughly and to the desire of
          the Secretary of State whenever he, she, or
10
11
          whomever makes that decision.
12
     BY MR. CROSS:
13
               All right. And then just finally,
          Ο.
14
    Mr. Barnes, you mentioned the audit a few times as
15
     validating the reliability of the election system,
16
    but I want -- I want to make sure we understand the
17
    audit.
18
               The audit that was done on the
19
    November 2020 presidential election at most
20
     validated the results of that election, not any
     individual vote that was cast.
21
22
               You understand that; right?
23
               MS. LaROSS: Object to the form of the
24
          question.
25
                             The -- the ballot -- the
               THE WITNESS:
```

Page 300 ballots, both hand-marked paper ballots and 1 2 BMD-generated ballots, were put through 3 scanners the first time they were counted and a result was obtained. They -- the State then undertook the task 5 of doing a hand count of those ballots, both 6 7 hand-marked paper ballots and BMD-generated ballots. In the BMD-generated ballots, they read the text that was on the ballot to confirm 9 10 whether that was a vote for President Biden or 11 for then-President Trump. And the calculations of both of those 12 13 exercises resulted in the same result. 14 didn't come back with the exact same totals, 15 which is normally the case when you're 16 recounting paper, whether it's hand-marked 17 paper ballots or BMD-generated ballots, because 18 it's a hand process versus an electronic or 19 computer-driven scanning process. 20 So we have reason to believe that what was 21 placed into the machine by the voter, then 22 generated by the BMD, was then accurately 23 reflected by the BMD printout not only in text, 24 but also in QR code. 25

Page 301 1 BY MR. CROSS: 2 You understand that during the audit that Q. 3 you've just talked about, there was never any effort 4 made when reading the human-readable portion of a 5 particular ballot to see whether the QR code on that 6 ballot captured the same selections? Are you aware 7 of that? 8 MS. LaROSS: Objection to form of the 9 question. THE WITNESS: I am aware that during the 10 11 audit, that they focused on the text on the 12 ballot solely, that they were not correlating back the text to the QR code at the time. 13 14 BY MR. CROSS: 15 So the ballot would -- sorry. Strike Q. 16 that. 17 The audit that we're talking about would 18 not catch a situation where the human-readable text 19 had different selections than the QR code on a 20 particular ballot. That would not be captured; 21 right? 22 It's my understanding that the audit that 23 they undertook was solely looking at the text and 24 were not engaging the QR code at that time.

Q. Do you know why a decision was made not to

Page 302 conduct at least some reliable statistical sampling 1 2 of ballots to compare the QR codes to the 3 human-readable text to make sure that they actually 4 correspond? 5 MS. LaROSS: Objection to the form of the question. 6 7 THE WITNESS: I was not privy to the discussions outlining how the audit was going 8 9 to be performed, so I don't know if those -- if 10 those discussions were discussed or not. BY MR. CROSS: 11 12 If you wanted to know, who would you ask? 0. I believe the people that were involved in 13 Α. 14 that discussion at the time, I believe Kevin 15 Rayburn, who was the deputy general counsel for the Secretary of State's office at the time was the --16 17 was the preeminent audit person in the Secretary of 18 State's office at the time. So I believe he was 19 involved with the discussions on the steps that 20 would be taken in that process. And --21 Ο. 22 I don't think he had left the Secretary of State's office yet at that time. I know he is now 23 24 working for EAC, but I'm -- I might be tying up my 25 calendar a little bit.

Page 303 And that's Kevin Rayburn you're talking 1 Q. 2 about? 3 Yes, sir. Α. Mr. Barnes, do we agree that the fact that 4 5 there has not been any known compromise or 6 widespread fraud in Georgia elections to date, that that does not mean that that can never happen in the 7 8 future? Are we agreed on that? 9 MS. LaROSS: Object -- objection as to 10 form of the question. THE WITNESS: We never know what can 11 12 happen in the future. If something bad can 13 happen -- I think Murphy's Law is if something 14 bad can happen, it can happen. 15 So that's why we have the procedures and 16 protocols in place to try to prevent bad things 17 from happening, but none of us can see into the 18 future. 19 BY MR. CROSS: 20 Were you aware that Theresa Payton, the 21 head of Fortalice, testified in this case that it's 22 not a question of when a U.S. election will get 23 hacked, but if? 24 MS. LaROSS: Object to the form of the 25 question.

```
Page 304
 1
               THE WITNESS: I am not aware of that
 2
          testimony.
 3
               MR. CROSS: All right. Sorry I took you a
          little longer than you asked. I apologize
 4
 5
          about that. Let me let you get out of here.
 6
               And we will -- we'll keep it open. I'm
 7
          not going to litter the transcript. I'm going
 8
          to let him out. We'll send you a letter,
 9
          Diane, on -- on how to proceed.
10
               VIDEOGRAPHER: Okay. This suspends the
11
          deposition. The time is 5:04 p.m. and we are
12
          now off the video record.
13
               (Deposition suspended at 5:04 p.m.)
14
               (Pursuant to Rule 30(e) of the Federal
15
          Rules of Civil Procedure and/or O.C.G.A.
16
          9-11-30(e), signature of the witness has been

1	COURT REPORTER DISCLOSURE
2	
3	Pursuant to Article 10.B. of the Rules and Regulations of the Board of Court Reporting of the Judicial Council of Georgia which states: "Each court reporter shall tender a disclosure form at the time of the taking of the deposition stating the arrangements made for the reporting services of the certified court reporter, by the certified court reporter, the court reporter's employer, or the referral source for the deposition, with any party to the litigation, counsel to the parties or other entity. Such form shall be attached to the deposition transcript," I make the following disclosure:
4	
5	
6	
7	
8	
9	
10	
11	I am a Georgia Certified Court Reporter. I am here as a representative of Veritext Legal Solutions. Veritext Legal Solutions was contacted to provide court reporting services for the deposition. Veritext Legal Solutions will not be taking this deposition under any contract that is prohibited by O.C.G.A. 9-11-28 (c).
12	
13	
14	
15	
16	Veritext Legal Solutions has no contract/agreement to provide reporting services with any party to the case, any counsel in the case, or any reporter or reporting agency from whom a referral might have been made to cover this deposition. Veritext Legal Solutions will charge its usual and customary rates to all parties in the case, and a financial discount will not be given to any party to this litigation.

      RE: Curling, Donna v. Raffensperger, Brad
          2/11/2022, Michael Barnes (#5081041)
 5
          The above-referenced transcript is available for
 6
 7
      review.
          Within the applicable timeframe, the witness should
8
 9
      read the testimony to verify its accuracy. If there are
10
      any changes, the witness should note those with the
      reason, on the attached Errata Sheet.
11
12
          The witness should sign the Acknowledgment of
      Deponent and Errata and return to the deposing attorney.
13
      Copies should be sent to all counsel, and to Veritext at
14
      cs-midatlantic@veritext.com
15
16
17
       Return completed errata within 30 days from
     receipt of testimony.
18
19
        If the witness fails to do so within the time
     allotted, the transcript may be used as if signed.
